The World's Leading C64 Word Processor Just Got Better... AGAIN!

NEW!

No Brag. Just Fact.

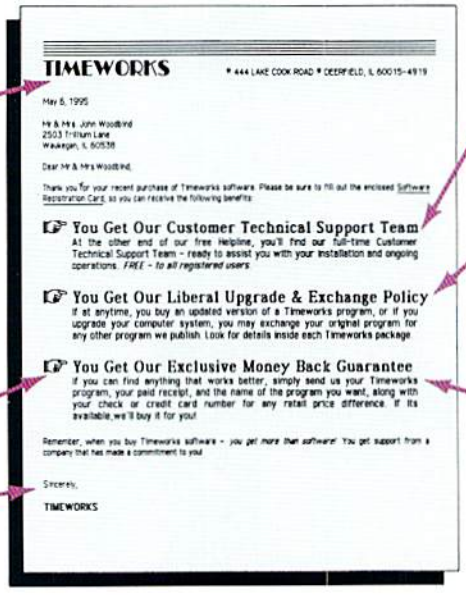

WORD WRITER 4 now combines the *indisputable* word processing power of WORD WRITER 3 with *fonts, mini-graphics, text layout,* and *superior quality printouts!*

And now the facts!

We've added:

- **Premium Quality Fonts:** Choose from over 300 possible type-style combinations. You get eight built-in fonts—in sizes 9 to 72 points—with 5 special effects.

  The fonts included in this program use a high density printout format (72 x 120 DPI), and appear 33% sharper than GEOS fonts (which can also be used with this program).
- **Over 90 "Ready-to-Use," Built-in Mini Graphics**
- **2-Way Printout:** Print out your document in *two* ways! Use the *High Speed Text Mode* to quickly proof your text. Or, select the *Font Mode to* print premium quality documents—using the fonts and mini-graphics included in the program.

Mr & Mrs John Woodbind
2503 Trillium Lane
Waukegan, IL 60538

Dear Mr & Mrs Woodbind,

Thank you for your recent purchase of Timeworks software. Please be sure to fill out the enclosed Software Registration Card, so you can receive the following benefits:

You Get Our Customer Technical Support Team
At the other end of our free Helpline, you'll find our full-time Customer Technical Support Team - ready to assist you with your installation and ongoing operations. *FREE - to all registered users*

You Get Our Liberal Upgrade & Exchange Policy
If at anytime, you buy an updated version of a Timeworks program, or if you upgrade your computer system, you may exchange your original program for any other program we publish. Look for details inside each Timeworks package

You Get Our Exclusive Money Back Guarantee
If you can find anything that works better, simply send us your Timeworks program, your paid receipt, and the name of the program you want, along with your check or credit card number for any retail price difference. If it's available, we'll buy it for you!

Remember, when you buy Timeworks software - *you get more than software!* You get support from a company that has made a commitment to you!

Sincerely,

TIMEWORKS

- **Text Layout:** Mix and match font sizes; modify margins; and vary line spacing—at the press of a key—*anywhere* in your document!
- **Continuous Formatting & Word Wrap:** Maintain your margins throughout your document—*even as you edit your text*. No need to press return at the end of a line—the program does it for you!
- **Text Importing:** Import documents from WORD WRITER 3; or convert text from WORD WRITER 128, GEOWRITE, PAPERCLIP, PAPERBACK WRITER, FLEET SYSTEM, WORDPRO 3 PLUS, BETTER-WORKING WORDPRO, and other popular C64 word processors.*
- **Text Exporting:** The documents you create with WORD WRITER 4 can be converted for use with GEOS, or to ASCII and PETASCII for use with your modem.

PLUS! NOW AVAILABLE!
NEW FONT ACCESSORY PACK!

Sharpen Your Commodore™ Skills and Build a Great Software Collection

ONLY $6.65!

Monthly Software for your Commodore 64 or 128™ Computer.

Learn From the Experts

Draw on the vast experience of our editors to provide you with carefully selected software you can use each month, from spreadsheets to role-playing games, from telecommunications to accounting to recipe programs. With easy-to-use documentation, you will master each new application with confidence and ease.

Become Experienced Inexpensively

Without investing a fortune, LOADSTAR will help you to see why your Commodore 64 or 128 is the most versatile and powerful tool you own. You will know more about your Commodore, its capabilities, and software for it, than you would have thought possible. At $6.65 a month, LOADSTAR is the best value in software today.

Try our Monthly Software for Three Months

Every month your postman will bring you the latest issue of LOADSTAR, contained on unprotected 5¼" diskettes. Each issue is chock-full of great software, including utilities, games, home and business applications, and educational programs. Order now and you will receive the "Best of LOADSTAR" absolutely free.

Reviewers Love LOADSTAR!

". . .I highly recommend Loadstar. If you can afford only one disk service, make it Loadstar. . ."
STEVE LEVIN, COMMODORE MICROCOMPUTERS

Subscribers Love LOADSTAR!

"The music and graphics are totally superb. Some of the best I have ever seen" . . . . . STEVEN T. BOSTON

Contents of Issue #46

- **BASIX 64 & 128** ML variable LISTer.
- **Desert Duel** You're the turret gunner on a Rommel-rousing tank.
- **Hugo 128** Produce your own VCR movie on a shoestring budget.
- **Easy Keys** Define C64 function keys.
- **Fractals 128** See and print intriguing patterns using recursive logic.
- **BridgeBrain** Play bridge against your computer for fun and practice.
- **Solitaire** Three classic card games, including "Aces Up."
- **Plus** Computer Juicer, Match Me, Exterminator, One for One, *and more!*

Commodore 64 and Commodore 128 are trademarks of Commodore Business Machines. Print Shop is a trademark of Broderbund Software.
Available at Waldenbooks, B. Dalton Booksellers, and fine bookstores everywhere (cover price $9.95). Apple II and IBM PC versions also available.

FREE the "Best of LOADSTAR" – a collection of fourteen of the best programs from recent issues – when you order the next 3 issues of LOADSTAR for your Commodore 64 or compatible computer. Contents are as follows:

Side 1	Side 2
Diskovery	Gallerie d'Art
Customizing LOADSTAR	Nature Quest
Glory Quest	Weather Conversions
Pyramid Power Struggle	VisiCalculator
Cybermine	Creeping Chromosomes
Laser Show	Sign Language Tutor
Editor in Chief	Last Things Last

Your Satisfaction Guaranteed

If you are not satisfied with your purchase for any reason, return your first issue for a full $19.95 refund. The "Best of LOADSTAR" is yours to keep. You can't lose.

Yes! Please rush my free "Best of LOADSTAR" and start my 3 month subscription to LOADSTAR for my Commodore 64 or 128 for only $19.95 postage paid. I understand that this is a **trial subscription** and that I am under no obligation to continue beyond three months. (*Overseas $27.95*)

C-64/128 Screens Shown

Guiding a Destroyer Escort through hostile waters during World War II was no glamour detail. Despite its formidable array of weaponry, the escort ship was always vulnerable to attack — from airplanes, surface ships, and submarines — and only the captain's resourcefulness, and the accuracy of his gunners, could keep the convoy on course and out of harm's way.

- **Six different routes to navigate — each with different dangers, each requiring different strategies—between the United States, Great Britain, Murmansk and Gibraltar!**
- **Three variable levels of difficulty keep the game constantly challenging for any player!**
- **Blast enemies in any direction with torpedoes, anti-aircraft guns, depth charges or a five-inch gun!**
- **Seven different, detailed battle scenes, from the navigation center to damage reports!**
- **Many thrilling hours of exciting arcade game action!**

RUNning Ruminations

In his best-selling book, *Cultural Literacy*, E. D. Hirsch, Jr. includes an index of information—famous people, places, phrases, terms, dates—that literate Americans should be acquainted with.

The book, which makes interesting and challenging reading, is Hirsch's response to declining American literacy and, as he says, "focuses sharply on the background knowledge necessary for functional literacy and effective national communication." Hirsch, an English professor, teamed up with an historian and scientist to compile this index to American literate culture, aimed at the common reader with a high school level of literacy. His list tests the reader's knowledge on a broad range of topics—from Aphrodite to Zeus, agnosticism to Zionism, Athens to Zurich.

Cultural literacy today requires knowledge of computers.

While he makes no claims that his is a definitive list, noticeably absent are terms relating to computer technology. The *RUN* staff identified the following as the only computer-related terms on the list: bit, byte, computer, data, magnetic tape, mainframe, megabyte, microchip, personal computer (PC), RAM, ROM, software.

The following supplemental list attempts to answer the question, "What computer terms should literate people know?" and identifies computer terms and phrases that are now widely used in our culture. It's not trivia; it's part of living in the late twentieth century. I invite readers to submit additions to this list that reflect basic knowledge shared by the computer-literate community.

$52D RECTANGLES FOR YOUR COMMODORE

Rectangles 64/128 draws rectangles in both 64 and 128 40-Column modes. The subroutine in lines 60–100 makes the rectangles. To use the routine in your program, set variable SC to a screen location corresponding to the top-left corner of your rectangle. Variables HT and WT determine the height and width of the rectangle, CL represents the color and CH is the character that draws the rectangle.

$52F BLISS-FUL RUN PAINT SPACE FINDER

After I typed in the seemingly interminable listings for RUN Paint (*RUN*, March 1989), the program refused to work when I ran it. I found the cause: spaces I'd neglected to enter properly in the Data statements.

Since *RUN*'s Checksum doesn't check for spaces except for those between quotation marks, I've written an enhancement that you can put in any *RUN* listing that uses the hex loader format. Just add this routine to the hex loader and run it. Any lines where you've mistyped spaces print to the screen for you to fix. Delete lines 1, 2 and 1000–1060 when you've finished typing in the listing.

```

—PETE BLISS, MELBOURNE, FL

$530 DON'T LET YOUR FINGERS DO TOO MUCH WALKING

The next time you type in a hex loader program, such as RUN Paint (*RUN*, March 1989), give your fingers a break. Use the C-128's numeric keypad to quickly and easily type in numbers, and your right hand will stay in one place on the keyboard. My program helps you further by redefining the F1, F3, F5, F7, + and − keys to type in the letters A–F, and the period key to type in spaces. It also removes the need to use the shift key for hexadecimal entries.

In addition, the F2 key places the word DATA and a space after a line number; F4 lists the directory; pressing F6 with the cursor in front of a filename in a directory automatically loads that program; and F8 saves a listing. ►

ZOOM!™

LEVEL 50.
WHERE NO MAN HAS GONE BEFORE.
BE THE FIRST.

ZOOM! is a new and dynamic game that is unlike anything you've ever dared before. Not a simple eat-em-up...but an electrifying race against all odds through level after exciting level! So much more intense than an arcade game that it will sizzle your joystick. Packed with sparkling graphics and astonishing animation, **ZOOM!** spells light years of concentrated and compelling game play for the entire family.

Read the reviews, see a demo, and *you* be the judge.

"**ZOOM!** is the best arcade-strategy game I have ever seen on any home computer"
Computer Play

"**ZOOM!** is one of the best C64 games you can play"
★★★★★ *INFO*

"**ZOOM!** is definitely one of the best arcade-style games available"
Amigo Times

"The game itself...is very addicting, and we have the sore hands to prove it"
Computer Shoptalk

$531 TWO COMPUTERS AND A TELEVISION

If you use a television as a monitor (this trick doesn't work with a computer monitor), share it with two computers at the same time. You need two RF modulators. Connect one of the modulators to the television and plug the first computer's RF cable into that modulator. Then attach the two UHF wires of the second modulator to the two screws on the bottom of the first modulator. Finally, plug the RF cable of the second computer into the second modulator. (Still with me?) The sliding switch on the first modulator toggles between computer displays, and the switch on the second modulator toggles between the second computer and the television.

—CATHERINE STEFKO, ROCHESTER, NY

$532 LINE NUMBER ELIMINATION

If you need to take line numbers out of Basic programs, just type in one of these Pokes:

C-64: POKE 22,35
C-128: POKE 24,37

To get the line numbers back, type in one of these Pokes:

C-64: POKE 22,25
C-128: POKE 24,27

—JEFF KOESTER, WATERMAN, IL

$533 THE UNCOMMON COMMA

With Commodore Basic and the Print statement, you can use the comma in uncommon ways. My program puts the comma to work by printing four columns of three items each. To make two columns of six items each, beginning at column 10, change line 40 of the program to:

```
40 FOR I=1 TO 12:PRINT A$(I),,:NEXT
```

The comma also indents lines in printer output. Try this command on your printer:

```
10 OPEN 4,4,7
20 PRINT#4,,"THIS LINE IS INDENTED 10 SPACES"
30 PRINT$4:CLOSE4
```

```

$535 GETTING THE ROW TO PRINT

Magic Trick $511 (March 1989) shows one way to clean the print head when a row of dots refuses to print. I own Okidata 120 and 180 printers, and both use ribbon cartridges. From time to time, the plastic protect tabs on them go out of alignment so that misprinting results. Realigning the protect tab gives a print head that prints like new.

—JOSEPH CHRISTIE, NEW YORK, NY

$536 COOLING OFF THE POWER SUPPLY

Most C-64 users have their own ways of keeping their computer's power supply cool, such as pointing a fan at it, leaving space around all sides of the unit for circulation, and so on. Append my program, Short Circuit 64, to your programs, and your computer automatically lets you know, audibly and visually, of an impending "meltdown."

```

for your IBM or Compatible, Tandy,

To Computer Users,

Now you can tell your computer what you want and your computer can write your programs for you in minutes to your custom design—easily and without requiring any programming background from you. . . with QUIKPRO + II.

A Breakthrough In Micro Computer Technology

You know your computer is fantastically fast. . . once it knows what to do. Programs and software are what makes it happen. Every task your computer performs for you requires some kind of program. Until now, you could only get programs in just one of two ways: buy a canned package that many times doesn't meet your needs or hand over hundreds or thousands of dollars for a custom programming job. Now, you have a better choice. . .

Programs Without Programming

Automatic programming is what it's all about. And, with QUIKPRO + II the Automatic Program Writer, your computer can actually write programs for you. You can quickly generate a new individual application program when you want it with QUIKPRO + II . Each program you create is a completely stand alone program that will run in the standard BASIC language you already have on your own computer.

Best of all, **you do not have to become a programmer** to use QUIKPRO + II. The QUIKPRO + II software becomes your personal programmer, waiting to do your work for you any time of the day or night you choose to use it.

QUIKPRO + II comes complete in its own vinyl storage binder, with 80 page manual and disk ready to use.

How To Get Over ½ Off

Like all successful software QUIKPRO + II was originally sold for well over $100 per copy, and we have sold thousands. So why are we willing to let you buy at less than half price? . . . because our tests prove that at $29.50 we sell over ten times as many. Obviously this cuts our costs because of the huge volume, so **we pass all savings directly to you.**

So, ORDER Now. Call Toll-Free 24 Hours or Mail in your Order. This offer is limited to those computer types listed on the Special Discount Order Form.

APPLICATION CHECKLIST

Here are a few of the thousands of possible applications you can do with QUIKPRO + II. . . And most can be created in a few minutes.

BUSINESS USES
Customer Filing
Master Files for General Ledgers
Accts. Receiv.
Accts. Payable
Telephone Logs
Telephone Lists
Hotel/Travel/Data Reservations
Property Control
Library Catalogues
Inventories
Key Employee Data

EDUCATIONAL USES
Student Records
Grade Records
Teacher Lists
School Lists
Program Design
Course Design
Tuition Data
Enrollment Data
Property/Equipment
Athletic Schedules
Player Statistics
Test Scores
Menus

HOME & HOBBY USES
Personal Records
Check Lists
Club Rosters
Telephone Directories
Recipe Files
Medical Information
Insurance Records
Tax Records
Christmas Gift Lists
Deposit Files
Due Dates
Mortgage Data
Travel Records

Not to mention the unlimited number of general filing, and crossfiling, technical and scientific uses.

d get QUIKPRO + II GRAM WRITER

TRS-80 or Apple Computers.

The All-In-One Program

The custom programs you can generate from the new QUIKPRO + II will let you perform Personal Filing, Fast Data Retrieval, including Changes, Deletions and Searches. You can selectively Print Custom Letters, all kinds of forms (if you have a printer). This new feature is called **Free Form Reporting**. You can even include calculations in the programs you create. QUIKPRO + II is perfect for creating inventory programs. You can use QUIKPRO + II to prepare letters and selectively address the letters to only certain people. And of course you can **SORT** your reports so that they print out information in the order that you want it, or print out only certain information. In fact, you can actually use QUIKPRO + II to create an easy to use Data management program or a simple spread sheet. You can do all of this and more with this All In One Program . . . and the best part is that **you need no BASIC programming experience.**

How Does It Work?

You can do it simply by answering easy questions that appear on your screen. You won't have to learn any Computer commands or special Programming Lanuages. Instantly the QUIKPRO + II software instructs the computer to write efficient error free, BASIC Programs and puts the **Programs right onto your own disk, ready for you to use.**

The resulting custom program is truly a separate BASIC program. You can list it. You can modify it. You can customize it to you own liking. You can actually see what makes it tick.

What People Say About QP Software

From a GENERAL CONTRACTOR/CONSTRUCTION COMPANY owner:

*"The program seems to be good and I must compliment you on the documentation. It is the **best** of its kind that I have seen."*

From an INSURANCE AGENCY MANAGER:

*"I would like to compliment you on . . . **an excellent . . . program."***

From a HOBBYIST USER out in Oklahoma:

"I thought I would drop a quick note about QUIKPRO. I have it running and it ***will do** what I bought it for. I am very pleased with it . . ."*

This from a Vice-President of a Federal Savings & Loan:

*"In the past several weeks, I have used QUIKPRO software on four **different** programs. I am pleased with the results achieved so far. With your help over the telephone, I have created an /ISI file for a **large** data file that was **already** in existence, and the data file now works with an input program created by QUIKPRO."*

NEWS AND NEW PRODUCTS

For a change, this column can present announcements for new products other than just games.

Compiled by HAROLD R. BJORNSEN

SAVAGE FISH!

MENLO PARK, CA—Rainbird (3885 Bohannan Drive, Menlo Park, CA 94025) has announced the release of two games for the C-64.

In **Savage**, you must use all your skill, determination and lightning-fast reactions to battle the onslaught of seedy monsters and menacing skulls, then rescue your maiden and recover the special powers imprisoned deep in the castle's labyrinth. $29.95.

The Seven Deadly Fins, an interdimensional group of anarchists, are on the loose, and you're a goldfish. From the rain-soaked forests and London recording studios to the farthest reaches of time and space, **Fish!** will eventually confuse, dazzle and, perhaps, kill you. $39.95.

Check Reader Service number 409.

"EMPTY-V" ET AL

NEW YORK—Hi Tech Expressions (584 Broadway, Suite 1105, New York, NY 10012) presents three new C-64 games.

Remote Control, based on MTV's parody of prime-time game shows, tests your knowledge of rock and roll and junk trivia from the 60s, 70s and 80s. Players answer up to three questions in nine categories to win points and advance to the End Game Round. Single- and multiple-player options are included. $12.95.

Working alone or in teams, **Fun House** players start out by answering trivia questions and move on to contests, such as Bobbing for Bagels, The Ping Pong Palace and Fun House Grand Prix. After accumulating points, players win the chance to enter the three-story Fun House, filled with obstacles. $12.95.

Jim Henson's **Muppet Adventure**, an interactive mystery adventure, challenges you to solve a series of puzzles, riddles and clues and get past obstacles and road blocks, making selections based on the individual personality of each Muppet, such as Miss Piggy, Kermit, Gonzo and Fozzie Bear. $12.95

Check Reader Service number 410.

THREE FROM BRODERBUND

SAN RAFAEL, CA—Broderbund Software (17 Paul Drive, San Rafael, CA 94903) is distributing three new titles for the C-64.

Hydlide presents a fantasy scenario that carries you from medieval villages into outer space, where you confront everything from dragons to robots. As you battle, you must think fast, choosing the correct weapon and the best strategy. $34.95.

SimCity lets you control an entire city or design your own from scratch. Seven international cities are simulated in detail, animated with traffic, construction, planes and boats. It's your job to improve the quality of life by taking action against natural disasters, pollution, crime, land values and traffic. $29.95.

As Luke Skywalker in **Star Wars**, you must maneuver an X-wing fighter through attack waves in an attempt to destroy the most evil weapon ever conceived—the Death Star. $29.95.

Check Reader Service number 405.

FOUR-WARD TO ADVENTURE

REDWOOD CITY, CA—Epyx (PO Box 8020, Redwood City, CA 94063) has released four new adventure games for the C-64.

In **Devon Aire in "The Hidden Diamond Caper"**, players assume the role of Devon Aire, a friendly, reformed felon who has been hired by a wealthy widow to find her priceless jewel collection, which has been stashed by her late husband in many different places in the maze-like manor. Finding the jewels won't be easy: Guarding the gems are monstrous mutants, pig-mice and killer canaries. And, even when you do manage to find all the jewelry, you'll still need to figure a way out of the manor. $29.95.

Plotting to rule the depths, the insidious Yellow Shadow has spread its network across the ocean floor. As a top-secret government agent, you must seek and destroy these venomous villains. Using sophisticated sensory devices, you'll scan the deep in your state-of-the-art submarine to locate the enemy base. Then, as the **Undersea Commando**, you must deploy a deadly arsenal of weaponry to blast the enemy out of the water. $29.95.

The Barbarian has defeated the warriors of Drax, freeing Princess Mariana from their evil spell. Drax has fled to the dungeons beneath his castle, vowing vengeance. As either the Barbarian or Princess Mariana in **Axe of Rage**, you must hack your way through three levels before entering the fourth level, the Inner Sanctum of Drax. The various levels require different fighting skills as you encounter new breeds of monsters before the final confrontation. $34.95.

In **Curse Buster**, an evil sorcerer has put a curse on the prince and princess, turning them into most pitiable creatures who are doomed forever to hop through the murky depths of his dungeon. As the prince and princess, the only way players can regain their royal personages is to find their way back to the palace, facing dragons, evil spirits and poisonous snakes on the way. $29.95.

LAND HO!

HEROD, IL—**Eight Bells Voyager** is a voyage-planning, dead-reckoning aid software package for the navigator who wishes to use it for coastal or offshore voyages, for students of navigation and the armchair navigator as well. With it, users may determine rhumb-line and great-circle courses and distances between any two geographical points. Users may also type in the latitude and longitude of a series of up to 50 passage waypoints, calculating all true courses and distances between each successive waypoint, cumulative distances at each waypoint, distance to go at each waypoint and total distance. It also calculates times of arrival.

Waypoint files can be printed (dot

matrix and daisywheel printers) and saved to disk for future reference.

Also, the program caculates and prints steaming times for any speed entered, in days, hours and minutes. Available for the C-64 for $39.95 (plus $2.00 postage and handling) by mail order only. Heartland Maritime Software, PO Box 25-RU, Herod, IL 62947.

Sony's color 3½-inch disks let you color-code your filing system.

Compute in Color

NEW YORK—Sony Corp. (9 West 57th St., New York, NY 10019) has 3½-inch floppy disks in several colors for Commodore's 1581 disk drive. The **MFD 2DD** double-sided, double-density disks come in red, yellow, blue, green and white to allow you to devise your own color-coded filing system. Disks are available in packs of ten and retail for $39.99.

Now, *That's* a Word Processor!

DEERFIELD, IL—Timeworks (444 Lake Cook Rd., Deerfield, IL 60015) has released **Word Writer 4**, a word processor for the C-64 and the C-128 in 40-Column mode. The package now includes eight built-in fonts in sizes 9 to 72 points; over 90 ready-to-use symbols and mini-graphics; a text-layout feature that allows you to mix and match fonts and type sizes, modify margins and vary line spacing anywhere in a document; continuous formatting and word wrap; an 85,000-word spelling checker with integrated thesaurus containing over 60,000 synonyms; a built-in outliner; and an 80-Column Print Preview mode. It's available for $39.95.

Check Reader Service number 400.

GEOS Upgrade

BERKELEY, CA—Berkeley Softworks (2150 Shattuck Ave., Berkeley, CA 94704) has released **GEOS 128 2.0**, an upgrade to the original graphic environment operating system for the C-128. Included is geoWrite 2.1, a word processor with options to mix text and graphics, expand margins to eight inches, search and replace phrases and create multiple columns, headlines and borders. Also included are geoSpell, an 80-column spelling checker; and geoPaint, a high-resolution graphics workshop that utilizes 14 graphics tools, 32 brush shapes and 32 painting patterns to stretch, scale and overlay images, edit graphics pixel by pixel, and stop pattern fills in progress.

The deskTop supports two disk drives (1541, 1571 or 1581 drives) and a RAM expansion unit that offers multiple file selection and displays the date and time. Its geoMerge feature creates customized form letters and labels, Text Grabber imports text from any Commodore word processor, and the Desk Accessories—including a calculator, note pad, alarm clock, screen preference manager and photo and text managers—are accessible from within any application. $69.95.

Crankin' 'Em Out

IRVINE, CA—BDT Products (17152 Armstrong Ave., Irvine, CA 92714) introduces a four-bin sheet-feeding system that automatically feeds paper and envelopes into laser printers such as the Commodore-compatible Epsons, Okidatas and Stars. The **Model 890 LaserFeeder** features three paper bins, each storing up to 220 sheets, and a bin for up to 60 envelopes. You can feed three different types of paper, such as letterheads, second sheets, memos, miscellaneous forms (invoices, call reports, purchase orders), or 660 sheets of one paper type, offering over one and one-half hours of continuous printing. The system retails for $1795.

It Was a Dark and Stormy Night. . .

LIGONIER, IN—Country Road Software (70284 C.R. 143, Ligonier, IN 46767) offers **StoryWriter 128** to help you write better stories. With the program, you put your ideas into one of six windows (Setting, Plot, Protagonist, Antagonist, Conflict and Climax). You are prompted throughout the process with questions to help you structure your story plan. You may jump from window to window, scrolling the contents to add, edit or delete. Nine help screens are provided, including Figurative Language, Theme, Dialogue, Humor and Irony, and Paragraph Construction. Available for the C-128 for $12.

Check Reader Service number 408.

Read My Mind

KUTZTOWN, PA—Free Spirit Software (PO Box 128, Kutztown, PA 19530) introduces **ESP Tester** for the C-64 and the C-128 in 80-Column mode. The program uses the methods developed by the Foundation of Research on the Nature of Man to test human subjects' powers of extrasensory perception. Results are then displayed on the screen or may be printed with a Commodore-compatible printer. It's available for $24.95.

Check Reader Service number 402.

A Search to Remember

MIAMI—In **Search for the Titanic**, a simulation for the C-64, you begin as an inexperienced oceanographer, gaining a reputation by finding and exploring lost vessels, and thus earning the resources needed for the Titanic search. After earning points by exploring ten or more wrecks, you can search, locate and dive for the Titanic shipwreck. Successful exploration will reveal digitized pictures from actual photos of the Titanic as it appears on the ocean floor today. The game features about 75 wrecks for you to explore; a choice of four ships, more than 100 crew members and a complete range of technical and scientific equipment with which to outfit an expedition; 47 points of call; over 100 navigational maps and charts; realistic weather patterns and currents; weather radar, sonar, magnetometers and minisubs; and real-time action with a "time warp" feature. Available from Intracorp (14160 SW 139th Court, Miami, FL 33186) for $34.95.

MAIL RUN

Our technical editors offer some simple solutions to help users type in RUN Paint.

THE SMELL OF RUN PAINT, THE ROAR OF THE CROWD

I'm a *RUN* subscriber, and I thoroughly enjoy your magazine. When I received the March issue, I typed in the listing for RUN Paint. The program runs perfectly, and I'm impressed with its versatility.

—JEFF BASKOFF
DELTONA, FL

You've finally come up with a truly superb program in your March 1989 issue—RUN Paint! It created the four new programs just like the article said it would.

However, when I ran them, I got an error message.

I called your editorial offices and expected to get the brush-off, but after several helpful phone conversations with Technical Manager Lou Wallace, I found my errors, and the program now works beautifully. Thanks to Lou and the *RUN* staff for being so helpful.

—PASTOR DONALD FROMER
CLEAR BROOK, VA

I've entered the RUN Paint program from the March 1989 issue of *RUN*, and it is terrific! Please extend my compliments and appreciation to programmer Robert Rockefeller.

—HUGH MCMENAMIN
PEORIA, IL

Thanks for you letter, Hugh. Many of our readers have had some trouble entering the RUN Paint listing, since it's so long. Readers just have to be patient and enter the program precisely, being especially careful not to omit or add any spaces, which seems to be the problem in most cases. Also refer to last May's edition of RUN *for further information on typing in listings in the article "Troubleshooting Troublesome Type-ins."*

Readers who'd rather receive the RUN Paint listing already on disk can get it on the March–April edition of ReRUN and also on the RUN Works disk, both of which include additional programs. To order, remit $16.67 for ReRUN or $24.97 for RUN Works to IDG Communications/Peterborough, Attn: Special Products, 80 Elm St., Peterborough, NH 03458.

—EDITORS

OFF TO A RUNNING START

For a long time I've tried entering programs from *RUN* without much success until I read your "Learn To Walk Before You RUN" tutorial that you publish from time to time (see February 1989). And the biggest help to me is your Checksum program. It sure saves me time finding my typing errors. Thank you and Checksum programmer Bob Kodadek for it. Now, for the first time, the programs in *RUN* actually *run* for me.

—ROY T. COLLEY
HUGHESVILLE, PA

RUN SCRIPT ALERT

Queries from several new RUN *readers who received the RUN Script promotional disk for subscribing to the magazine prompt us to clarify the instructions, which state: "Load and run either version of RUN Script, then load in the documentation by pressing F1, followed by the 'l' key." The "l" key is a lowercase L (not the number 1), an abbreviation for "load."* RUN *regrets that this has been misunderstood.*

—EDITORS

NOT SO "AMAZING"

The "Amazing" program (*RUN*, April 1989) looked interesting, so I took some time to type in its fairly long listing. When I ran it, I was greeted with a joke that was in bad taste. I do have a sense of humor, but my time is valuable. Please don't do this again.

—LUIS GONZALES
WOODLANDS, TX

Although it took me eight days to type in the April Fool's program, Amazing! (*RUN*, April 1989), and a great deal of hair pulling, primal screaming and tear shedding, I finally got it to run.

My wife and children have been trying unsuccessfully for 12 years to "get" me on April Fool's day. However, I have to replace pride with chagrin, embarrassment and humiliation—you got me! It was a lot of work (and good practice) typing in the listing, and it was a good learning experience.

Thank your brilliant programmer, Harold Bjornson, for lightening my load and making me laugh, and thanks to *RUN* for being the kind of magazine that's not above a good joke now and then.

—CHESTER O. COOK
WINDHAM, ME

While the program is functional and runs as published, its too-good-to-be-true claims should not be taken seriously. Some readers did enjoy the April Fool's program, but we concede that, for a joke, it was much too long to type in. Rest assured that programs of this nature will never again be published in RUN.

—EDITORS

MORE STUFF ON OLD STUFF

The March 1989 Mail RUN was certainly entertaining. While I'm not an anti-gamer, I'm not particularly interested in games, either. I do wish, however, that you'd publish more articles on established productivity programs. I bet there are readers like myself who'd appreciate hints and tips on older productivity software.

—WILLIAM J. KEEN
HARLEYSVILLE, PA

VALUES AND RESPONSIBILITY

The November 1988 issue of *RUN* has a program listing called "Hail to the Chief," which is both a trivia game and a gambling game. As the father of two young children, I am aware of how impressionable they are. If you teach a person that gambling is harmless, then that person will rely on Lady Luck for his or her success.

Since your magazine is read by adults and children, you have a responsibility for what happens to those who use your

product. All of us are accountable for how we influence others. Please consider the values your applications are teaching, for they do teach values.

—DAVID E. PAUL, D.MIN.
ASHLAND, KY

SOMETHING TO BEEF ABOUT

It did my old heart good to read the "RUNning Ruminations" editorial in the March 1989 issue of *RUN* about the shortage of Commodore peripherals. I've tried to find a 1750 RAM expansion unit since last October without success. It makes me laugh when Commodore claims enough units were manufactured to meet the demand. I have my name on five waiting lists, so maybe I'll get one yet.

—DONA PRUDHOMME
NEWPORT, NH

NOTHING TO BEEF ABOUT

With regard to David Dunson's letter in the March 1989 issue of *RUN* (Mail RUN, "C-128 R.I.P."), I recently bought a C-128 locally, and a few weeks later I bought two 1571 disk drives from the same dealer. He told me that he can "get all he wants" of the C-128 and 1571 drive. Mr. Dunson should look around his area a bit. I could have bought three used systems, and the 128 and drive are still available, at least in this area.

—JAMES LAMBERT
HASTINGS, NE

KEEP 'EM RUNNING

I've a few things to say to readers who put down games and say we have no need for them ("Down with Games," Mail RUN, March 1989).

The hours of enjoyment and the wide choice of C-64 games lured me into getting a C-64 computer at age ten. Since then, I've learned about the world's fighter planes, weather, nuclear submarines, battleships and aircraft carriers.

My biggest accomplishment with computers, though, has to be the user group I founded with a friend. The group started around games and game playing, and it's now ten members strong, with half of them over the age of 30. The topics now discussed at the meetings range from games to word processors to programming, and I have the computer gaming industry to thank for my beginning interest in computers.

So I hope you'll keep the games running in *RUN*.

—JOSEPH NEVINS
HACKETTSTOWN, NJ

For other readers wishing to expand their computing horizons, please see "Flight of the Condors," for gamers; "Type Invaders," for typing practice; "Calorie Counter," for watching your weight; and "Quick Writer 128," for those in need of an 80-column word processor. There's something for everyone in this issue of RUN.

—EDITORS

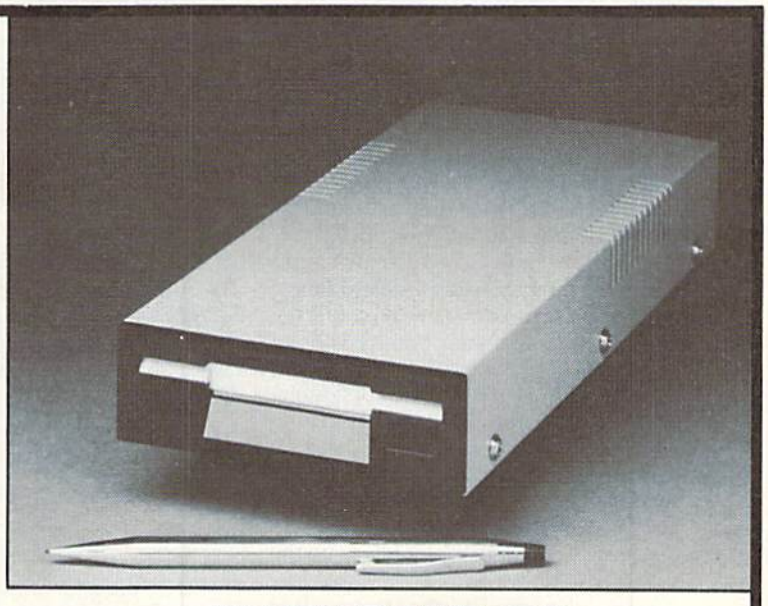

A CALL TO READERS

This page is your stage, so stand up and say a few words. Extend praise, air grievances or offer hands-on advice and information.

Send your letters to Mail RUN, 80 Elm St., Peterborough, NH 03458. Each letter must include the writer's name and complete address. RUN *reserves the right to edit letters for style, clarity and space.* ■

RAMPAGE ..... A+

Monster Movie Madness

If you quietly cheered during Godzilla's stroll through Tokyo or shed a tear when King Kong took his big dive in New York, then Rampage is for you. The C-64 version of the coin-op hit has all the building-stomping and people-chomping you could ask for.

Playing alone or with a friend, you control one of the game's three gigantic "heroes"—Lizzie the Lizard, Ralph the Wolf or George the Ape. Although they have slightly different talents, mayhem and destruction are their trademarks.

Guided by either a joystick or the keyboard, your monster climbs up and down city skyscrapers, punching holes in walls. Eventually the structures weaken and crumble to dust. Once all the buildings on a screen have been leveled, you're transported to the next city.

Unfortunately, the life of Lizzie and her friends is not without some major headaches. Many of the buildings, for instance, have electrical appliances that automatically turn on and off. If one of these devices is touched at the wrong time, you receive a nasty shock. The cities' residents, who don't take kindly to the creatures' adventures, drop grenades from windows and dispatch tanks and helicopter gunships. The damage they inflict saps your strength, and the game ends when your vitality ebbs to zero. Restoring energy, however, comes from gobbling the towns' defenders and other "goodies" that appear during your reign of terror.

Although Rampage is indeed filled with violence, it isn't necessarily mindless. In fact, some thought is needed to earn big point totals and advance to the game's higher levels.

Game play is embellished by excellent sound and graphics, and even better animation. Especially well done are the beasts' constantly changing facial expressions, which add humorous touches to the program.

Rampage is a very entertaining software package. It offers great sensory effects, mental challenges and simultaneous two-person play. But perhaps the game's greatest attraction is the guilty pleasure that it provides the legions of moviegoers who secretly love those magnificent cinema monsters of old. *(Activision; distributed by Mediagenic, 3885 Bohannon Drive, Menlo Park, CA 94015. C-64/$34.95.)*

George the Ape doesn't look too pleased; get ready for more building bashing in Rampage!

—WALT LATOCHA
OAK PARK, IL

REPORT CARD

A Superb!
An exceptional program that outshines all others.

B Good.
One of the better programs available in its category. A worthy addition to your software library.

C Average.
Lives up to its billing. No major hassles or disappointments here.

D Poor.
This program has some problems. There are better on the market.

E Failure.
Many problems; should be deep-sixed!

1581 TOOLKIT ..... B+

Software that Pays Attention to 1581 Owners

The subtitle of this program is "Ten Essential Utilities for Commodore 1581 Owners." This is, perhaps, an overstatement. Useful, yes; but essential only for those who are into heavy-duty disk editing or programming on the 1581.

The ten utility programs on the disk are: a data copier, file copier, directory editor, track and sector editor, track and sector tracer, pattern searcher, partition creator, formatter, error scanner, and relocatable fast loader. All of the utilities can be used with up to four 1581 drives that are assigned device numbers 8 through 11.

The track and sector tracer in my review copy failed to operate. Of the other nine, only the file copier can be used in conjunction with drives other than the 1581. That's too bad, because most 1581 owners I've met are more interested in moving programs from the 5¼-inch to the 3½-inch format than they are in transferring data between two 1581s.

However, other than my problem with the track and sector tracer, the utilities worked flawlessly. The data copier can duplicate a disk in about two minutes using two 1581s. For single drive owners, the program requires approximately ten minutes and 16 disk swaps.

The track and sector editor is similar in function to what's found on the 1581 demo disk. Among its features are a disassembler that displays the sector under examination in disassembly code, and a printer output that dumps the current buffer contents to any printer capable of emulating the Commodore 801/1525.

For me, one of the program's high- ►

NOTE: Due to publishing lead-times, product prices and specifications are subject to change without notice. R3F

lights is the partition creator. When loaded, all 80 tracks and their sectors are shown on a four-color track marker bar at the top of the screen. When open, available tracks are yellow, those in use by the DOS or files are red, and current partitions are blue. The cursor, which can be slid across the bar, is black. Current partitions hang down, like icicles, from the track marker. There's even a level indicator to show whether you're currently examining the root directory or a partition level. Creating a partition is fast, clear and painless.

Another great idea in the Toolkit is the pattern searcher. Somewhat like searching for a record in a database file, you enter the data you're looking for, and the utility checks the disk and finds the areas where matches occur. Patterns can be entered as hex, decimal or ASCII data, or a combination of all three. After the bytes matching your entry have been located, you can view or edit the sector in question.

The error scanner examines the disk for any DOS errors. Errors are displayed on the screen or sent to the printer. The fast file copier, directory editor and fast formatter worked without any problems.

The relocatable fast loader, designed for use with the C-64 or 128 in 64 mode, offers up to a 900 percent increase in file loading speed. What sets it apart from other fast-load utilities is that you can change its location in memory.

Included in the 1581 Toolkit is what amounts to an 11th utility—the Disk Command. Disk Command is a DOS wedge that allows the use of all standard disk commands, including changing partitions, without having to resort to the Open command.

The documentation, *The 1581 DOS Reference Guide*, is an in-depth examination of the 1581. Although technical in nature, it's easy to read and covers everything from drive commands to known bugs in the 1581 design (and how to correct them).

As I mentioned earlier, this package isn't for everyone. Owners of 1581s who only use their devices for file storage, and who have no intention of editing their disks or writing programs with it, can easily live without this package. However, for those who can't look at a device without wanting to know how it works, who reach for a technical manual and screwdriver whenever they get a new piece of hardware, this program is a must. *(Software Support International, 2700 NE Andresen Rd., Vancouver, WA 98661. C-64, C-128/$39.95.)*

LEVITTOWN, PA

GRAND PRIX CIRCUIT ..... A+

Automotive World Racing At Its Best

Computer drivers become your competitors on the international circuit in this racing simulation. Each computer opponent has its own style of racing, so you're guaranteed a challenge every time you hit the track.

GET MAXIMUM OUTPUT

Since you've put in a few hard earned paychecks into a Commodore system, how can you be sure you'll ever get more than just a few video games out?

Well, you could start by booting up GEOS 2.0. The hard working software that's easy to use and easy on your wallet.

You see, with GEOS 2.0 you don't need to memorize complicated keyboard commands. All you need to remember is this:

Point and click.

GEOS 2.0 shows you options, and you point to your selection. Then all you do is click your mouse or joystick.

Pretty simple, huh?

WE PUT A LOT MORE IN, SO YOU COULD GET A LOT MORE OUT.

GEOS 2.0 squeezes the absolute maximum out of Commodore 64's and 128's with an array of applications you can use millions of ways. In fact, millions of people do.

The important thing is that with GEOS 2.0, you can create outstanding documents with outrageous graphics. That's because GEOS 2.0 includes geoWrite (an advanced, full-featured word-processor), and geoPaint, a graphic workshop with over 32 different tools and patterns.

With geoPaint, you can draw almost anything. Invert, mirror or rotate it. Then stretch and scale and save it in your GEOS 2.0 Photo Album for use later. You can mix text and graphics. Or trade them back and forth.

GEOS 2.0 even comes with its own deskTop, which lets you manage your files and disks easily and efficiently. There's a calculator, note pad and alarm clock, too. And GEOS 2.0 is LaserWriter™ compatible. Which means you get a better looking document and a harder working system that's easier to learn

After selecting which team to drive for (McLaren, Ferrari or Williams), you're off to qualify for races in Brazil, Germany, Italy, Canada, Monaco, Britain, Japan or Detroit. Qualification serves two purposes: it determines your starting lineup position in the pack and lets you familiarize yourself with the track's layout. Even if you qualify, however, blown tires, engine problems, aggressive drivers or murderous curves could force you out of competition. If you do finish in the top six, your team is awarded points, and just as on the real Grand Prix Circuit, the team with the highest point total at the end of the year claims the title of World Driving Champion.

Your view of the action is from the cockpit, where instrumentation includes a tachometer and speedometer. An active gear box and rearview mirrors mean that you must focus your attention both inside and outside the car. Another indicator, the damage gauge, gives clues as to when you should pull into the pits for maintenance.

Your view from behind the wheel in Grand Prix Circuit: notice the car on your right!

Grand Prix Circuit is probably the best of its genre. From your viewpoint directly behind the wheel, the graphics and sense of movement and speed seem to push the C-64 to its limits. However, you won't have much time to enjoy the scenery. As the white lines of the road start coming at you and your competitors begin jockeying for position, you'll find it difficult keeping the car out of the ditches. If you're prone to motion sickness, you may want to find another game: Once you hit 140 mph and spin out on a curve, you'll think you're on somebody's perverted idea of a merry-go-round.

Each of the available three cars has its own performance characteristics and quirks. The higher performance cars can be a real chore to handle, especially without the automatic shifting offered at lower levels of play. In fact, if you're used to other racing games, you might find yourself spending more time off the road than on it, because the Grand Prix vehicles are *too* responsive.

The documentation supplied with the game is concise, easy to read and quick to get you into the action. Also, thankfully, you can save your current circuit to disk, because racing for up to 100 laps per game can take a few hours.

Grand Prix Circuit is much more than just another racing simulation. It's a game that manages to capture the feel, excitement and competitive spirit of racing. I believe that this program will be- ►

FOR MINIMUM INPUT.

than those space alien games your cousin Phil keeps dragging home.

INCREASE YOUR OUTPUT WITH A TURBO.

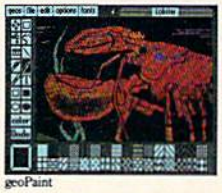

For flat out fast performance, GEOS 2.0 even comes with a diskTurbo, which cranks up your Commodore five to seven times its normal operating speed.

GEOS DeskTop

Now, if all that weren't enough, it also converts other programs' text in a heartbeat. And then checks your spelling with geoSpell. And comes with a mail merge for stamping out labels and form letters. And eleven built-in fonts. And a file manager.

The bottom line is that GEOS 2.0 can do just about anything expensive PC's can do, including

geoPaint

one thing they can't:

Share data with all our other GEOS 2.0 applications.

A HARD WORKING FAMILY.

Now, if you like the idea of what GEOS 2.0 can do by itself, just think what life would be like if you could share text, graphics and information amongst a whole family of applications.

Well, that's what you get with our entire GEOS line. There's a spreadsheet, a database and a desktop publisher. Not to mention a chart program, accessories and over 53 additional fonts.

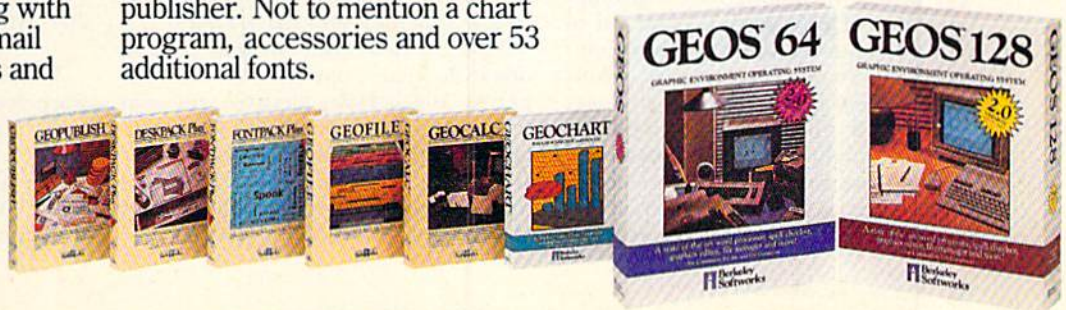

So if you'd rather take more from your Commodore and less from your wallet, insist on GEOS 2.0. For a minimal investment, it'll do more than just make your documents look a whole lot better. And that could pay out handsomely for you.

GEOS 64 2.0 $59.95 GEOS 128 2.0 $69.95
For orders only, call (800) 443-0100 ext. 234 (California residents add 7% sales tax.) $4.50 US/$8.50 foreign shipping and handling. Allow six weeks for delivery.

BILOXI, MS

POCKET AUTHOR ..... B

Create Your Own Teaching Applications, And More!

Advertised as a "professional authoring language" for the C-64, Pocket Author can be used to write interactive teaching programs. Also a creativity tool that adds over 160 commands to Basic, Pocket Author makes it easier for the user to program music and sprites, modify character sets, create screen graphics and access disk files—the sort of things that can be used to turn a scrolling text lesson into an interesting learning experience. Even if you're not a fan of writing teaching software, these new Basic-level commands mean you no longer have to resort to machine language programming to make use of sprites or sound on the C-64.

Pocket Author features statements that support structured programming not found in regular Basic, including branches to named labels (instead of line numbers), labeled subroutine calls, repeat/while loops and block conditionals. Most of these control structures are standard in the C-128's Basic 7.0; Pocket Author brings them to the 64.

Facilities for displaying application menus and commands for inputting menu choices using the keyboard, mouse, joystick or light pen are included. Menus can overlap, and overlays can be stored away and retrieved with simple commands.

Pocket Author also provides a system that retrieves help screens from disk at the touch of a function key. A Help Maker utility lets you create such screens for your own applications.

To design lesson software with Pocket Author, you write a dialogue module—text (a lesson) followed by a prompt (question). The learner is expected to type a response, which is then compared to a list of correct answers. Hints may be given if the response is wrong. At the end of the module, optional feedback might be provided based on the learner's response. Pocket Author keeps track of the time spent in the module, the number of attempts made to answer the question, matched responses, and so on. This information can be saved as a statistical record of the learner's progress.

Pocket Author's documentation is thorough and well written, with each chapter referencing a different feature. This makes it easy to look up particular features, but doesn't give the prospective buyer a good overall view of the package's power. Sample programs provided on the disk are helpful in demonstrating how to integrate Pocket Author into Basic programs, but these short examples still suffer from limited viewpoints. The package would be much improved by a sophisticated demo program that explores as many different features as possible.

Although Pocket Author adds a number of powerful functions to standard 64 Basic, the package is not magic. In order to realize the program's full potential, you must still understand programming fundamentals. Moreover, since Pocket Author programs are interpreted and not compiled, you must first load Pocket Author into the computer before you can use a Pocket Author program. This means that if you wish to write teaching software or other applications in the Pocket Author environment, the end user must also have a copy of Pocket Author. However, if you're willing to cope with this requirement, Pocket Author provides a powerful program-development environment that is sure to increase your productivity. *(Digital Solutions, Inc., PO Box 345, Station A, Willowdale, Ontario, Canada M2N 5S9. C-64/$59.95.)*

—MICHAEL BROUSSARD
HERNDON, VA

ZOOM! ..... B+

Addictive, Animated Arcade Action!

Zoom! resembles the classic maze arcade game, PacMan. However, this software's maze of crisscrossing lines is like latticework. Your goal is to complete the trek over the maze while avoiding nasties like Jaggernauts, Wormlets, Angleheads, Spheroids and Black Holes.

Most of these critters climb up and down the maze, trying to thwart your moves. Black Holes destroy your on-screen character immediately upon contact, while the other monsters try to wear you down. You score points by gliding over the money bags and cash registers shown on the interlocking paths.

Zoomers: On your marks, get set, go! And watch out for that Anglehead!

When you successfully complete a maze, another one appears. There are 20 difficulty levels in all. You're given one-player, two-player and competition game options.

A special feature of Zoom! is its ability to drop bombs and blow up sections of the maze. Pressing your firebutton temporarily creates a crack in the area you occupy and prevents any travellers (including yourself) from crossing that segment. You can strategically plant these booby traps to help you defeat the enemy.

Additional goodies you can harness in your favor are Candy to speed you up; Glue to retard monsters; and Magic Potions to make you ghostly. And there are also the mysterious Question Marks, which can do almost anything—good or bad. Eat one; you'll see!

This game offers tingly music and sound effects, but I especially liked the graphics. The spirited characters throw a party for your eyes, and the animation flows smoothly.

Though not a PacMan clone, Zoom! obviously shares similarities with the yellow gulper. But Zoom! runs on its own two feet. *(Discovery Software, 163 Conduit St., Annapolis, MD 21401. C-64/$29.95.)*

DESIGNASAURUS C

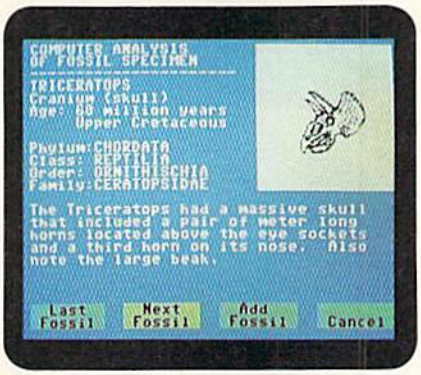

Plodding Prehistorics Prevail On-Screen

With Designasaurus, Britannica Software successfully brings exotic prehistoric creatures to life on the C-64. Unfortunately, Britannica was less successful in the more mundane task of effectively merging education and entertainment into one software package.

Designasaurus has three major sections. Its Build-A-Dinosaur activity takes place in a natural history museum, where you can assemble the fossilized bones of different animals into new and unique creatures. One possible combination, for example, is the head of a Stegosaurus, a Brontosaurus's neck, the body of a Triceratops and a Tyrannosaurus Rex's tail.

The software also has a Walk-A-Dinosaur segment, in which you use either a joystick or the keyboard to guide one of three prehistoric beasts through five different screens. Survival—finding food and avoiding predators—is your goal. This area teaches the ecological interdependence of carnivores, herbivores and vegetation.

With a Commodore, Epson or compatible printer, the program's Print-A-Dinosaur activity generates hard copies of preprogrammed dinosaur pictures in three different sizes, including one for T-shirt transfers. You can also make printouts of your Build-A-Dinosaur creations, as well as completion diplomas for Walk-A-Dinosaur.

Learning about creatures like the Triceratops is just one of the segments of Designasaurus.

Although it has very good graphics, nice sound effects and a control system that's extremely easy to use, Designasaurus does have some shortcomings. The most obvious is its packaging, which states that there are multiple skill levels in Walk-A-Dinosaur; the program, however, doesn't contain this feature.

Also, while the box broadly claims that Designasaurus is for "dinosaur lovers of all ages," some individuals won't be completely comfortable with one or more sections of the software. For instance, although some preschoolers can easily make pictures for coloring with Print-A-Dinosaur, these same children will probably be frustrated by the many technical terms in Build-A-Dinosaur.

A more serious difficulty is the lack of accuracy or completeness of some information that's conveyed to users. Although Walk-A-Dinosaur, for example, contains battles between a Brontosaurus and a Tyrannosaurus Rex, the instruction manual fails to mention that these creatures didn't live during the same time period. In addition, the software's use of the name "Brontosaurus" is highly questionable; a far more suitable term is "Apatosaurus."

Nevertheless, Designasaurus can provide educational benefits. If the discrepancies between a few of its contents and scientific knowledge are recognized, the ►

WHAT DO YOU WANT, FREE SOFTWARE?

If offering free software is what it takes for you to try our GEOS products on your Commodore, then by golly, we're prepared to do it. Just buy any GEOS product from your local Commodore dealer and follow the directions on the form below.

OH, ALRIGHT!

For every GEOS product you buy, we'll send you one of equal or lesser value absolutely free. Which means you can build an integrated library for half the cost.

But hurry. This offer expires August 15, 1989. After that, we may not be feeling so generous.

Berkeley Softworks

The brightest minds are working with Berkeley.

REDEMPTION INSTRUCTIONS

To redeem this offer for a free product of equal or lesser value do the following:
1. Purchase any Commodore GEOS product from your local retailer between May 15, 1989 and August 15, 1989. Save your receipt.
2. Select your free product and write in your choice under Customer Information. If you purchased a product from Group I you are entitled to a free product from Group I. If you purchased a product from Group II you are entitled to a free product from either Group I or Group II. If you purchased a product from Group III you are entitled to a free product from Groups I, II or III.

GROUP I
geoChart: Transforms complex numerical data into any of 9 easy-to-understand graphical charts.
DeskPack Plus: Calendar, card file, mail merge, blackjack game and also imports clip art. In 40 and 80 columns.
FontPack Plus: 53 fonts in multiple point sizes plus a font editor to create or modify fonts. Operates in 40 and 80 columns.
geoSpell: Spell checks GEOS documents.

GROUP II
geoPublish: Desktop publisher that creates up to 7' x 9' posters, 192 point type and vertical text; resizes graphics and more!
geoFile: Graphics-based database available. Also for 80 column Commodore 128 computers.
geoCalc: Versatile integrated spreadsheet. Also available for 80 column Commodore 128 computers.

GROUP III
GEOS 2.0: Word processor, graphics workshop, spell checker file and disk manager, mail merge program, desk accessories and more!
GEOS 128 2.0: All the features of GEOS 2.0, plus numeric keypad, supports more memory, faster processing. Operates in 80 columns.
geoFile 128: Graphic-based database in 80 columns.
geoCalc 128: Versatile spreadsheet in 80 columns.
geoWrite Workshop 128: Full featured word processing in 80 columns.
geoProgrammer: A programmer's authoring tool that includes an assembler, linker and debugger.

3. Collect the following items:
- This coupon with all the information filled in completely.
- The UPC bar code from the package you purchased.
- The original dated sales receipt with the product price circled.
- Receipts must be dated between 5-15-89 and 8-15-89. Photocopies of receipts not accepted.
- A check or money order made out to Berkeley Softworks for US $4.50 to cover shipping and handling. Please do not send cash.

4. Mail all of the above items to:
Berkeley Softworks
Attn: FREE SOFTWARE OFFER
2150 Shattuck Avenue
Berkeley, CA 94704
5. Offer good from May 15, 1989 through August 15, 1989.
6. Please allow 3 to 5 weeks for delivery.
7. If coupon has been removed, write to address above, to request a duplicate.
*This offer is subject to all of the terms and conditions for redemption listed above. Void where prohibited by law. Not to be used in conjunction with any other special offer.

GEOS 2.0, GEOS 128 2.0, geoCalc, geoCalc 128, geoFile, geoFile 128, geoChart, geoPublish, Desk Pack Plus and FontPack Plus are copyrights of Berkeley Softworks.

OAK PARK, IL

TECHNOCOP ..... A–

Futuristic, Hi-Tech Mod Squad

In Technocop, you assume the role of an elite law enforcement officer, armed with futuristic electronic devices. Your ultimate goal is to smash a ruthless band of crooks.

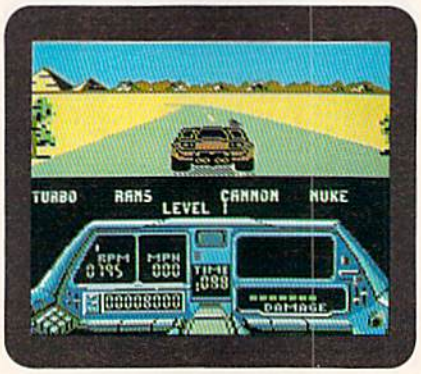

You begin by entering VMAX, a computerized automobile that can travel at over 150 mph. You're not out for a pleasure jaunt, however, because enemy vehicles constantly attack you. Fortunately, VMAX has a machine gun as standard equipment, and fast driving can upgrade your armament to include cannons and even nuclear weapons.

If you survive the dangerous highway, you reach the seedy, multistory lair of a mob kingpin. You're aided by a wrist computer that indicates the general direction of the crime chieftain's hiding place. While avoiding deadly traps and fending off surprise assaults by petty thugs, you try to free kidnapped hostages, recover stolen goods and capture or eliminate the gang boss within a predetermined time limit. If successful, you receive a promotion and move on to the next of 11 missions. Fortunately, the software has a Save feature that lets you split up the playing of one game into a number of different sessions.

Every aspect of Technocop reflects a great deal of programming skill. The graphics are first rate, and the sound effects are equally good. The animation is also excellent, and players shouldn't experience any problems with the software's control system.

The game play in the buildings is especially interesting. It beautifully recreates the suspense and thrills of a policeman's search for an arch-criminal in mysterious and hazardous surroundings. Surviving requires not only the quick use of your revolver, but also some sound strategy.

In fact, this part of the game is so enjoyable that it tends to overshadow the driving sequences, which, though well done, demand far less thought and a much greater reliance on reflexes.

If you survive attacks from bad guys, be prepared for more in higher levels of Technocop.

Because of this, a few players may eventually come to consider the road segments as merely chores to be endured before reaching the real "meat" of the program.

Yet, ever since the movie *Bullitt* was released, most people have come to expect fast driving to be a part of every fictional manhunt. These individuals will have no complaints with any part of Technocop. *(Epyx, 600 Galveston Drive, PO Box 8020, Redwood City, CA 94063. C-64/$39.95.)*

—WALT LATOCHA
OAK PARK, IL

RACK 'EM ..... A

You can play all of your favorite billiard games with Rack 'Em—straight pool, eight ball, nine ball and even the somewhat complex English game of snooker. Best of all, the table can be set up to play virtually any other pool game you can think of.

The view of the table is from directly overhead. Balls impact upon each other with a convincing "click" and rotate realistically as they roll. The speed and angle of the balls as they bounce off one another and the bumpers also seem true to life.

Although the game's playing procedure seems complicated at first, once you've done it a few times, setting up and executing your shots become almost automatic. Ultimately, the ability to adjust its variables adds to the game's authenticity and challenge. There is an amateur setting if you find playing at the professional level too challenging.

Perhaps the best feature of Rack 'Em is its "Save Last Shot" option. If you're practicing alone and manage three balls in three different pockets with a single shot, select this option to store the shot and prove to friends that you really did make it. Just remember to say that you planned to pocket all three balls from the outset! *(Accolade, 550 S. Winchester Blvd., Suite 200, San Jose, CA 95128. C-64/$29.95.)*

—BOB GUERRA

PREDATOR ..... B+

Move over, Sylvester. Arnold's coming. Ex-terminator Schwarzenegger not only out-shoots his Rambo rival, he gets a starring role in a computer game!

Your screen shows a graphic version of an armed, animated, dangerous and tight-lipped warrior. He's the last survivor of a guerrilla squad that's been wasted by Predator—the alien who kills for fun. Equipped with night vision and spine-ripping energy, Predator hunts our hero through enemy installations in a South American jungle.

Movements like jumping, running, shooting and punching initially require practice. Later, however, these actions flow more smoothly.

The screen reveals 30 different detailed scenarios. Explosions, weapons, rivers, barracks and tropical greenery all come alive, and Arnold runs with a nifty little shadow at his heels. Because the screen scrolls to the left as you go into the jungle, the moving scenery reveals foreground and background depth and texture.

Despite the fact that you represent a human killing machine, you still get a chance to think. You can choose several strategies to outwit your opponent, and certain weapons work best in particular situations. You must also keep track of your time, not overspend your ammo and learn the correct distance to throw a grenade.

If you like Rambo-type action on your computer, then Predator should "blitz" you! *(Activision; distributed by Mediagenic, 3885 Bohannon Drive, Menlo Park, CA 94025. C-64/$29.95.)*

—JOHN DIPRETE

ANNALS OF ROME ..... A–

Annals of Rome is as much a lesson in Roman history as it is a war simulation. Your object is to build one of the greatest empires the world has ever known—the Roman Empire. However, not being bound to the actual growth pattern of Rome, you can set up an interesting and brave new world of your own.

A handy reference card and map of the world are provided, but players should also use paper and pen to take

notes and keep tabs on the various commanders, tribes and provinces, as well as the financial state of the Republic and her enemies.

An interesting aspect of the game is watching the face of the world change as various empires (Egypt, Gaul, Germania, and so on) rise and fall. The manual offers insights into these different peoples, with descriptions of their strengths and weaknesses.

One of the flaws of the game is that the manual doesn't provide a visual depiction of the onscreen happenings. Another annoyance is that much of the onscreen fighting occurs between other countries, and has little to do with Rome, often giving the player the feeling of being an observer. Still, these are minor, and the real challenge is to get the Republic up and running smoothly as you attempt to unite the whole world under one rule.

I recommend Annals of Rome, especially to anyone studying the time period who's in need of a diversion from textbooks. *(Datasoft; distributed by Electronic Arts, 1820 Gateway Drive, San Mateo, CA 94404. C-64/$24.95.)*

—ROBERT SODARO

JOHN ELWAY'S QUARTERBACK ..... C–

This game has its good points. It's fun to play, and, typical of a program that began life as an arcade game, its very simple command structure makes it easy to learn.

Unfortunately, it's not very realistic. Proportionally, the football is much larger than it should be, which makes it difficult to judge exactly where the ball is going. Consequently, trying to figure out where or when to move is usually a guessing game.

The ball might be a bit easier to track if the perspective between it and its shadow were a little more life-like. Also, while the field looks the way it would if viewed from directly overhead, the players and goal posts appear as if seen from high in the stands behind one end zone.

Player movement, while fairly fluid, is agonizingly slow in Quarterback. Players also seem to fall the wrong way many times after being tackled.

Joystick response isn't crisp or precise enough, which makes throwing a pass difficult.

Playability also suffers from what I call a distortion of football probability: It's easier to run 95 yards on a quarterback sneak than it is to kick an extra point.

The points I've mentioned may be okay for the arcade, where plenty of action is more important than realism. It's harder to swallow in the home version, however, which is likely to be played more often and at a leisurely pace. Football fanatics may enjoy John Elway's Quarterback as an action game, but many might be turned off by its lack of realism. *(Melbourne House; distributed by Electronic Arts, 1820 Gateway Drive, San Mateo, CA 94404. C-64/$29.99.)*

PHOTOGRAPH BY LARRY DUNN

Calorie Counter

What's on the menu? Anything you like, as long as you use C-64/C-128 Calorie Minder to watch your weight.

By MICHAEL BROUSSARD

WHAT COULD BE A MORE WEIGHTY SUBJECT than dieting? If changing your eating habits weren't enough, you also have to count calories and continually monitor your progress. However, Calorie Minder can help. This Basic program for the C-64 and C-128 calculates your "ideal" weight and keeps a daily record of your weight and calorie intake. It also reports on your progress, showing how your weight loss (or gain!) compares to your expected weight change, based on the amount you claim to eat.

Before describing how the program works, I'll take a moment for a few cautions. First, don't embark on any weight-loss program without checking with your doctor, especially if you're pregnant. (If you're pregnant, you probably shouldn't be using the computer!) Second, the calculations of ideal weight and the gain/loss analyses provided by Calorie Minder are based on "average" metabolism, so don't be surprised if you don't lose at exactly the rate predicted. Finally, research has shown that dieting alone is not the best way to maximize weight loss. You should also engage in some form of aerobic exercise, such as walking briskly for 20 minutes a day, riding a bicycle or taking an aerobics class.

The Food List

In order to operate, Calorie Minder needs to have a sequential file of calorie data for the foods you eat available on disk. My version of the file, which you will use for starters, is created by the Calorie Data program in Listing 2. Type in Calorie Data, save it to an empty formatted disk and then run it to create the file, called CAL.DATA. The program expects your disk drive to be device 8, but you may alter this by changing the value assigned to variable D in line 100.

The foods and calorie values known by Calorie Data are defined in Data statements beginning in line 1000. If you don't eat some of the foods I've included, just omit those Data statements. Conversely, if I left out any of your favorite foods, add Data statements describing them. I purposely omitted some foods, such as celery and lettuce, because they have so few calories; go ahead and add them, too, if you're determined to count every single calorie. Just be careful that each statement you add is in the proper format: a food description of up to 29 characters, a comma, then the number of calories associated with that food. Also make sure there are no commas or semicolons embedded within the food descriptions, or Calorie Data will abort with an error. For example,

```
1450 DATA ONIONS/SLICED 1 CUP,110
```

is acceptable, while

```
1450 DATA ONIONS, SLICED, 1 CUP,110
```

is not.

The last Data statement in the program, containing DATA ***, is the "end-of-data" indicator. You may add as many Data statements to Calorie Data as you like; just be sure this one comes last.

There's also a special indicator, DATA !!!, dividing the Data statements into two groups. All the foods before this indicator appear at the beginning of CAL.DATA in the same order as in the Data statements; the foods after the indicator are sorted alphabetically. This arrangement lets you keep foods you eat all the time at the top of the list, where you can find them quickly.

Listing 2 has only three foods—the "miscellaneous" entries described below—in the first group. If you want all the foods sorted in a single group, just omit the Data statement containing the !!!. Or, if you want the data completely unsorted, change the value of variable SF in line 100 of Calorie Data to 0 and rearrange the Data statements in any order you wish.

After using Calorie Minder for a while, you may decide you want to alter the food list. No problem. Just load Calorie Data, change the Data statements as desired and run it again; it will create and save a revised CAL.DATA file. Be sure to save your modified version of Calorie Data, as well.

Note that the values in Calorie Data assume plain preparation of foods, with no other foods added in. For example, pasta means boiled pasta with no sauce, and carrots means boiled carrots with no butter.

A book that lists calorie values would be a wise investment for use with Calorie Data. It can be a handy reference when you're adding foods to the list.

Using Calorie Minder

Now type in Calorie Minder (Listing 1) and save it to disk; for convenience, I'd suggest using the same disk that contains Calorie Data and CAL.DATA. When you run Calorie Minder, it starts the initialization process by reading in the food and calorie information from CAL.DATA, so be sure the disk containing that file is in the drive. ►

RUN it right: **C-64 or C-128 (in 40-Column mode); printer optional**

Next, it displays a window containing my name, Mike, and inviting you to enter your name instead. If you're Mike, too, just press return; otherwise, delete my name, enter your's (up to 12 characters) and press return. Your name will appear in the file copy you then save, but to change the default name in the program, insert your name in place of Mike as the value of variable NM$ in line 10. Your name will then appear as the default the next time you run the program.

Once you've entered your name and pressed return, Calorie Minder searches the disk for a file called <your name>.DAT containing your calorie profile. Of course, when you first run the program, it doesn't find such a file, so it asks for information to use in creating one when you exit the program. Enter one or two digits for the year, month and day at the appropriate prompts, or, if you've used Calorie Minder before, enter the parts of the date that have changed and press return for the rest. Next, enter your height, sex,

body-frame type and exercise level, and the program computes your ideal weight, lets you set a weight goal for yourself, derives a recommended daily calorie intake and predicts how long it should take to reach your goal.

When initialization is complete, Calorie Minder's main menu display appears, offering the options shown in Figure 1 and showing your profile information at the bottom of the screen. To choose a menu option, just press the appropriate number.

Count Calories

Select option 1 to track your daily calorie intake. It starts by displaying a window containing the first ten CAL.DATA foods and their calorie counts, with the first item highlighted.

Figure 1. Calorie Minder Main Menu.

1 COUNT CALORIES
2 ANALYZE CALORIE LOG
3 IDEAL WEIGHT ANALYSIS
4 CHANGE DATE
5 EXIT PROGRAM

Figure 2. Count Calories submenu.

1 ADD CALORIES
2 NEXT SCREEN
3 PREV SCREEN
4 SUBTRACT CALORIES
5 SAVE CALORIE DATA
6 MAIN MENU

Beneath the window is the submenu shown in Figure 2. Also note the current calorie count, 0 at this time, and your target count for each day at the right end of the profile area.

To add the calories for the highlighted food to the count, press 1 at the submenu. You can use the cursor-up and -down keys to scroll through the food list, the 2 key to go to the next food screen, the 3 key to back up one screen and the home key to return to the top of the list. You can also navigate the list by pressing a letter key. For example, P takes you directly to the first food beginning with P. Of course, the latter option won't work if you didn't have Calorie Data sort the food list alphabetically. To subtract the calories for a highlighted food, press 4.

When you're done logging calories for a session, press 5 to save the data you've entered for later analysis. Option 5 also sets the calorie counter back to 0. If you suddenly remember a snack you forgot to include for the day, no problem. Just add up the extra calories and access option 5 again; the weight-analysis portion of Calorie Minder (described below) can handle multiple calorie counts for the same day.

Be sure you add calorie data in chronological order; once you've logged data for one date, the program ignores any you add for an earlier date. If you get behind and add data for several days in one session, use main menu option 4 (also described below) to change dates as you proceed.

There are two ways to record the calorie value for a food not known by CAL.DATA. First, look up the value in your reference book. Then, either look through the food list for an item with the same value and record it instead, or press the home key to return to the top of the list, where the following entries appear:

10 MISCELLANEOUS-010
50 MISCELLANEOUS-050
100 MISCELLANEOUS-100

These entries are specifically designed to help you log extraneous calorie amounts. For example, suppose you eat an unlisted food that has a calorie value of 230. You can add that number to the day's total by choosing two "portions" of MISCELLANEOUS-100 and three "portions" of MISCELLANEOUS-010. Of course, if you're likely to eat that food again, you should also add it to CAL.DATA later.

Analyze Calorie Log

Main menu option 2 issues a report on your diet progress. The report includes your current and target weights, the number of days of calorie data in your log file, your average daily calorie intake, your weight loss (or gain) and a prediction, based on current progress, of how long it will take to reach your goal. The report also features a dot graph that shows your weight change.

When using option 2, first specify the beginning and ending dates for the report by either entering dates of your own or pressing return at all the prompts to choose the default, the last six months. If you've been logging calorie data for less than six months, you can still use the default; Calorie Minder will just process the entire log.

Next you must enter a time interval, in days, for the graph. With the interval set at the default of 7, the graph will show weekly progress, while an interval value set at 1 will chart daily progress. The graph only has room to record data for 30 intervals, however, so if you choose an interval of 1, and the log contains data for more than 30 days, dots for only the first 30 will appear.

The program also asks whether you want the report output

to the screen or printer. After you make your choice, there's a brief pause as it reads the entries in your calorie log and prepares the report. Calorie Minder expects your printer to be device number 4, but you can alter this by changing the value assigned to variable PD in line 10 of the program.

Change Date

Use main menu option 4 to change dates when logging calorie data for several days at once. As I mentioned before, it's important to start with the earliest date and work forward.

Exit Program

When you finish using Calorie Minder, leave the program by pressing 5 at the main menu. This option updates your disk profile and, if you've tallied some calorie data but not stored it, asks whether the data should be saved. Don't just press the stop key or turn the computer off to exit the program, or these things won't happen and you'll lose the day's data.

If all this seems like a heavy set of instructions, never mind. Calorie Minder is really easy to use when you get the hang of it, and it will surely lighten your dieting burden. R

Michael Broussard, a systems engineer, enjoys cooking everything from soup to nuts—except for terrapin soup, which he avoids at the request of Jake, his pet tortoise.

IT'S HERE!

Runs in 64 AND 128 modes!

A Special Announcement for All Owners of
- C-64 and C-128 Computers
- GEOS, by Berkeley Softworks
- And GEOS POWER PAK, from *RUN* Magazine

Introductory Special! Save $5.00

I N T R O D U C I N G

GEOS POWER PAK II

A Must for All GEOS Owners!

This brand new collection of the most useful GEOS enhancements, desktop accessories, utilities and applications sets the standard for all C-64 AND C-128 owners! Set your sights on the best GEOS computing ever, with GEOS POWER PAK II!

Owners of the original GEOS POWER PAK will find this encore presentation a valuable addition to their GEOS library, since every program on POWER PAK II is completely new and different. Plus, you'll get the best GEOS Telecommunications Program to date!

C-128 Owners! This POWER PAK is for YOU, because every program is completely 128 compatible!

GEOS POWER PAK II draws on the best programmers and authors in the GEOS community, so you know you're getting top-quality, leading edge software. Experts like William Coleman, Francis Kostella and Joe Buckley.

Order Now! Call 1-800-343-0728

Here's what you get with GEOS POWER PAK II:

- **GeoTerm Plus.** A full featured terminal package that offers autodialing, phonebook, ASCII buffer capture, a built-in CONVERT routine and more.
- **Q&D Edit.** A text editor that allows you to quickly write nonstyled documents and save them in a variety of formats. Also reads all ASCII files, and geoWrite versions 1.1 through 2.1.
- **Fonts and Clip Art.** A collection of nifty new fonts and imaginative art for use in geoPaint and geoWrite.
- **DocWrite II.** Use geoWrite to create documentation for your programs, then display them for easy review.
- **Games!** Enjoy the new and visually exciting strategy games "geoTiles" and "Egyptian Siege."
- Plus more. . .all completely 64 and 128 compatible!

SPECIAL PRE-RELEASE DISCOUNT. Order GEOS POWER PAK II within the next 30 days and save $5.00! Save more! Order the Original GEOS POWER PAK at the same time and save $10.00! You get a total of 17 applications and utilities, plus dozens of clip art images and fonts for one low price!

☐ **YES!** Send me GEOS POWER PAK II for just $19.97—a $5.00 savings off the regular price.

☐ Send me both POWER PAKs for $39.94—I save $10!

☐ Check Enclosed ☐ American Express
☐ MasterCard ☐ Visa

WORLD'S BIGGEST PROVIDER OF C64/128 UTILITIES

Software Submissions Invited

We are looking for HACKER STUFF: print utilities, parameters, telecommunications, and the unusual.

We now have over 1,000 parameters in stock!

SUPER PARAMETERS 1000 Pack

Utilities Unltd. has done it again!! We have consolidated and lowered the prices on the most popular parameters on the market . . . Super-Parameters, now you can get 1000 parameters and our 64/128 nibbler package for just **$39.95!!!** This is a complete 10 disk set, that includes every parameter we have produced.

PARAMETERS CONSTRUCTION SET

The company that has **The Most Parameters** is about to do something **Unbelievable.** We are giving you more of our secrets. Using this **Very Easy** program, it will not only **Read, Compare** and **Write Parameters for You;** it will also **Customize** the disk with your name. It will impress you as well as your friends. The **"Parameter Construction Set"** is like nothing you've ever seen. In fact you can even **Read Parameters** that you may have already written; then by using your construction set, rewrite it with your new **Customized Menu. $24.95.**

LOCK PICK - THE BOOKS - for the C64 and C128

Lock Pik 64/128 was put together by our crack team, as a tool for those who have a desire to see the **Internal Workings** of a parameter. The books give you **Step-By-Step Instructions** on breaking protection for backup of 100 popular program titles. Uses **Hesmon** and **Superedit.** Instructions are so clear and precise that anyone can use it. **$19.95 Set**

ALL NEW BBS **$19.95**
Use 1 to 4 Drives, 300-1,200 Baud unprotected easy to customize so each is different!

BLITZ DECOMPILER **$19.95**
Used to decompile programs that have been compiled with BLITZ

1541 MASH Drive Alignment **$14.95**
Used to easily align your 1541 disk drive

GRAPHIC Label Maker **$14.95**
For use with your PrintShop graphics to make mailing labels.

D-N-Coder **$14.95**
Used as a teacher of machine language.

Master-lock ..... **$ 9.95**
Used to add extensive protection to your basic or M/L programs. Easy to use and works very well.

PhotoCopy ..... **$ 9.95**
Used to convert your PrintShop, NewsRoom, and PrintMaster graphics back and forth.

Super Copy 64/128 ..... **$ 9.95**
This is a collection of copy utilities for the C64 and C128.

Top Secret Stuff #1 ..... **$ 9.95**
The first volume of Hacker utilities on the market, and it's still very useful.

Top Secret Stuff #2 ..... **$ 9.95**
The second volume has everything volume one did not have. Or buy both for just **$14.95.**

ADULT GAME & GRAPHICS DATA DISKS

GAME: A very unusual game to be played by a very **Open Minded** adult. It includes a **Casino** and **House of Ill Repute.** Please, you **Must be 18** to order **Either One.**

DATA ★: This popular disk works with **Print Shop** and **Print Master.**
Now Version 1 + 2 ... **$24.95 ea.**

SUPER CARD PLUS

The **Super-Card** copier was the **BEST** disk archival utility ever created for the Commodore computer...until now...Introducing **SUPER-CARD PLUS!** We took the original idea a step further. The hardware board will now fit **ALL** Commodore and compatible disk drives. The software is easier to use, yet more powerful than ever before!

What can it copy? Well...in short, **everything!** We have not found **anything** that **SUPER-CARD PLUS** could not back up! If you don't believe us, try it for yourself!

The **SUPER-CARD PLUS** board installs **INSIDE** your 1541, 1541C, 1541-II, 1571 and most Commodore compatibles. With just a few minutes of time and a screwdriver, anyone can **easily** install the board.

The software package includes ALL of the necessary programs to make archival backups of **everything!** The 1700, 1764, and 1750 REU (RAM Expanders) are supported for fewer disk swaps. Parallel cables are also supported. With a parallel cable and **SUPER-CARD PLUS,** you can copy a disk in as little as **8 SECONDS!** Without a parallel cable, backups take only 2 minutes!

SUPER-CARD PLUS does **NOT** strip the protection from the disk! It makes an identical copy! This means that copies of copies are also identical. **NO PARAMETERS REQUIRED.**

Think about how many original software programs you own. Now, how much does a backup cost for each of these programs? You can easily see how **SUPER-CARD PLUS** will pay for itself.

SUPER-CARD PLUS PRICES:

1541/1541C	$ 49.95
DUAL	$ 89.90
1571/1541-II	$ 59.95
DUAL	$108.90

FINAL CARTRIDGE III

The ultimate utility from Holland, adds dozens of functions to your C-64 such as—fastload (15x), backup, freezer, printer fr., word problems, pop-up calculator, color screen dump, windows (C-64 works like an AMIGA) and much more. **LIST $69.95 ONLY $54.95.**

THE 128 SUPERCHIP - A, B or C (another first)

A — There is an empty socket inside your 128 just waiting for our **Super Chip** to give you 32K worth of great **Built-in Utilities,** all at just the **Touch of a Finger.** You get built-in features: **Files Copier, Nibbler, Track & Sector Editor, Screen Dump,** and even a 300/1200 baud **Terminal Program** that's 1650, 1670 and Hayes compatible. Best of all, it doesn't use up any memory. To use, simply touch a function key, and it responds to your command.

B — HAS SUPER 81 UTILITIES, a complete utility package for the 1581. Copy whole disks from 1541 or 1571 format to 1581. Many options include 1581 disk editor, drive monitor, Ram writer and will also perform many CP/M & MS-DOS utility functions.

C — "C" IS FOR COMBO and that's what you get. A super combination of both chips A and B in one chip, switchable at a great savings to you. **All Chips Include 100 Parameters FREE!**

Chips A or B: **$29.95 ea** Chip C: **$44.95 ea.**

SUPER GRAPHICS 1000 PACK

That's right! Over 1000 graphics in a 10-disk set for only **$29.95.** There are graphics for virtually everything in this package. These graphics work with Print Shop and Print Master.

NEW! SUPER CARTRIDGE EXPLODE! V4-1 w/COLOR DUMP $44.95

Introducing the **World's First Color Screen Dump** in a cartridge. Explode! V4.1 will now **Support Directly** from the screen. FULL COLOR PRINTING for the **Rainbow Star NX-100** and also the **Okidata 10 & 20** printers.

The **Most Powerful Disk Drive** and **Printer Cartridge** produced for the COMMODORE USER. **Super Friendly** with the features most asked for.

- **SUPER FAST** built-in single drive 8 or 9 FILE COPY, copy files of up to 235 BLOCKS in length, in less than 13 seconds!
- **SUPER SCREEN CAPTURE.** Capture and Convert **Any Screen** to KOALA or DOODLE.
- **SUPER FAST FORMAT (8 SEC'S)** - plus FULL D.O.S. WEDGE w/standard format!
- **SUPER FASTLOAD** and **SAVE** (50k in 9 SEC'S) works with all **C-64 or C-128's No Matter What Vintage!** And with most after market drives EXCEPT the 1581, M.S.D. 1 or 2.
- **SUPER PRINTER FEATURES** allows ANY DOT MATRIX PRINTER even 1526/802 to print HI-RES SCREENS (using 16 shade GRAY SCALE). **Any Printer or Interface Combination** can be used with SUPER EXPLODE! V4.1 or V3.0.
- **NEW and IMPROVED CONVERT** feature allows anybody to convert (even TEXT) Screens into DOODLE or KOALA Type Pictures w/Full Color!
- **SUPER FAST SAVE** of EXPLODE! SCREENS as KOALA or DOODLE FILES w/COLOR.
- **SUPER FAST LOADING** with **Color Re-Display of DOODLE or KOALA** files.
- **SUPER FAST LOAD or SAVE** can be TURNED OFF or ON without AFFECTING the REST of SUPER EXPLODE'S FEATURES. The rest of Explode V4.1 is still active.
- **SUPER EASY LOADING and RUNNING** of ALL PROGRAMS from the DISK DIRECTORY.
- **SUPER BUILT-IN TWO-WAY SEQ. or PRG. file READER** using the DISK DIRECTORY.
- **NEVER TYPE A FILE NAME AGAIN** when you use SUPER EXPLODE'S unique LOADERS.
- **CAPTURE** 40 COLUMN C or D-128 SCREENS! (with optional DISABLE SWITCH). Add $5.

ALL THE ABOVE FEATURES, AND MUCH MORE!
PLUS A FREE UTILITY DISK w/SUPER EXPLODE! V4.1.
MAKE YOUR C-64, 64-C or C-128*, D-128* SUPER FAST and EASY to use.

VIDEO BYTE! THE INEXPENSIVE DIGITIZER **$79.95**
VIDEO BYTE! the VIDEO DIGITIZER you can use with your C-64 or 128 and a V.C.R., B&W or COLOR VIDEO CAMERA. **VIDEO BYTE!** is the inexpensive alternative to other more expensive units. **VIDEO BYTE!** can be used with SUPER EXPLODE! V4.1, V4.0 or V3.0 EXPLODE!

NEW

SUPER TRACKER ..... **Only $69.96**
Find where the protection really is. Locate the density and track to break the protection. Encased in a handsome box, sets on top of your drive with L.E.D. read out.

NEW

SUPER CARTRIDGE **$49.95**
The **ULTIMATE UTILITY CARTRIDGE.** Packed full of useful utilities. Super fast File Copier, Nibbler, Sector Editor, Graphic Label Maker, just to mention a few. 128K of software at your finger tips. **SUPER CARTRIDGE** can be shut off and uses no memory. PLUS 100 FREE PARAMETERS.

Circle 187 on Reader Service card.

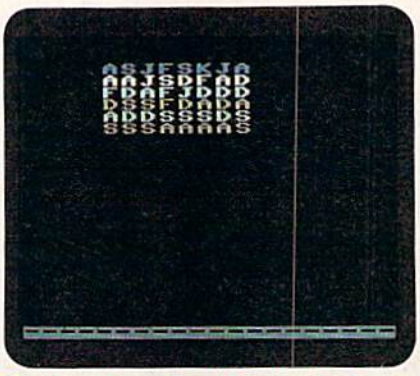

Type Invaders

Hone your typing skills and sharpen your shooting eye at the same time.

By TONY BRANTNER

Sound the alert and prepare for battle! Those unruly characters from planet Keebord have launched an attack. Platoons of loathsome letters, nasty numbers and pugnacious punctuation marks are descending toward Earth, threatening to inundate it with gobbledygook. You have the firepower, but do you have the skill to save our endangered planet?

Well, if not at first, you will after practicing with Type-N-Fire, an entertaining way to hone your typing skills. Written for the C-64 entirely in Basic, Type-N-Fire is straightforward to play. First you select a skill level from 1, the easiest, to 9. Then the game screen appears and a block of ten rows containing eight characters each begins to move down the screen. Starting with the lowest row, type the characters from left to right—without looking at the keyboard, of course. When you hit a correct key, a laser beam will fire upward and blast the corresponding character. You win two points for each hit and lose a point for each miss.

Zap those characters before they land.

The first platoon contains only a small assortment of Type-N-Fire's large, colorful characters, but the variety increases in succeeding attacks. A round is over when you've eliminated all the characters. Then a scorecard appears, showing your score, shots fired, hits and accuracy percentage for that round, along with your high score for the session. Press any key to advance to the next round.

Once you've mastered all the keys, the characters will begin their descent from a lower position. If they reach the bottom, a final scorecard will appear and you can quit or play again.

If you're serious about improving your typing skills, you may wish to keep a notebook handy for recording your level and high score for each session. Then you can try to better that score next time.

Now, ready at the keyboard and type R-U-N! R

Tony Brantner, a carpenter by trade, is also a self-taught computer programmer who chose the C-64 because of its excellent graphics potential.

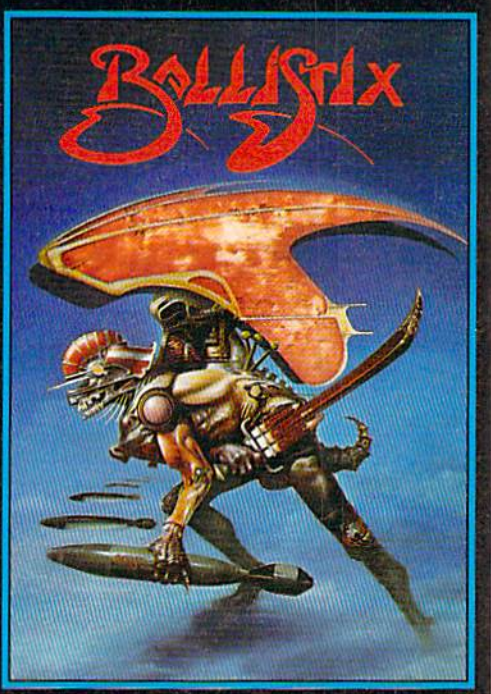

Listing 1. Type-N-Fire program. (Available on ReRUN disk. See page 52.)

BAAL

- ★ An addictive mixture of strategy and arcade action featuring:
- ★ 8 way ultra-smooth scrolling through 3 distinctive domains containing multiple levels.
- ★ Over 250 highly detailed screens, superb graphics and sound effects.
- ★ More than 100 monsters and 400 traps.

The future of the world lies in the hands of an elite squadron of men. YOU are the leader of the Time Warriors. Can you save the earth from the evil BAAL?

His army of undead have stolen an awesom weapon of destruction, a War Machine.

As leader of the ultimate battle fighters, your quest is to invade BAAL's domain, fighting off his monstrous demonic beasts to retrieve the War Machine . . . but . . . you must kill BAAL in the process.

Can you succeed? There is no option . . . the alternative is literally 'Hell on Earth'.

Screen Shots from the Atari ST version

AVAILABLE NOW ON THE PSYCLAPSE LABEL

CAPTAIN FIZZ
Meets The Blaster-Trons

The message is simple: co-operate or die!

It's double fun and double trouble all the way in Captain Fizz, the most exciting simultaneous two-player game you and a friend are ever likely to play. It's a whole new world of split-screen, high-speed action, as both of you take on the nasty Blaster-Trons infesting the planet Icarus.

Yup, it's a tough mission alright, but you might just win out with the right blend of co-operation, courage, laser-hot reflexes, tactical sense. . , and brains. The action is fast and furious in Captain Fizz, but if you can't work out the right tactics you'll both be dead meat.

There are 22 levels of savage and relentless action to battle through before you reach your objective, the central computer that's causing the evil infestation. You'll never get there, though, unless you put your heads together and co-operate; your buddy can't do it on his own, and neither can you. This is one program where even the easy games are hard. So remember — united you stand, but divided you fall. . .

Warning: this game is impossible to beat on your own.

Two joysticks required for two-player game.

Screen shots taken from the Atari ST version

AVAILABLE NOW ON THE PSYCLAPSE LABEL

BALLISTIX
Its a whole new ball game!

Sick of silly old soccer ? Tired of pathetic pinball? Then you need a dose of *Ballistix* - the fastest, wackiest, toughest ball game yet to appear on a computer. *Ballistix* just explodes with excitement, puzzles and an amazing **130 different screens** of frenetic action.

The aim of the game is simple; score more goals than your opponent to win the match. Doing it is a different matter as **splitters** fill the screen with dozens of balls, **tunnels** hide them from view, **bumpers** bounce balls all over the show, fiendish **red arrows** speed them up to almost impossible velocity, **magnets** pull them away from your control, and much, much more.

Ballistix is incredibly flexible, too. You can play against the computer or another player, set the speed if you can't stand the pace, define where the balls are fired and their velocity, rack up bonuses that will get you extra goals and then, at the end of an exhausting game, set your name in pride of place on the high-score table. And it's all played to the accompaniment of a throbbing sound-track and a crowd that applauds your every goal.

Ballistix is definitely not a game for wimps. It's tough, fast, challenging and incredibly competitive - in fact, it's just the kind of game you like.

Two joysticks required for two-player game

The MS-DOS/C-64 Connection

Now owners of 1571- or 1581-equipped C-64s can get the benefits of reading and writing MS-DOS files.

By MIKLOS GARAMSZEGHY

We're now at the final installment in the three-part series on exchanging text and data files between MS-DOS and Commodore computers. Part 1, in the April issue of *RUN*, presented a program that lets a C-128 read from and write to MS-DOS disks. Last month, Part 2 added a program for formatting MS-DOS disks with either a C-128 or C-64. This month, I complete the picture with a program that enables a C-64 to read and write MS-DOS disks, providing a quick and easy way to transfer files between machines.

Although primarily intended for use with 3½-inch, 720K MS-DOS disks in a 1581 drive, the program also works with 5¼-inch MS-DOS disks in a 1571 drive. Note that you cannot use the program with a 1541 drive, due to that drive's different method of recording data.

You can move files of up to about 30K (120 disk blocks) in size in either of two modes: Translation mode, which converts the file from PETSCII (Commodore ASCII) to true (standard) ASCII, or Binary mode, which creates a straight byte-for-byte copy. Commodore files can be sequential (SEQ), program (PRG) or user (USR); relative (REL) files and GEOS user-type files won't work. Menus and screen prompts make the MS-DOS/C-64 Connection easy to use.

The Programs

The program in Listing 1, which consists mostly of Data statements, generates the machine language portion of MS-DOS/C-64 and saves it in a special file called M64.ML3. This file is automatically loaded into memory when you run the main program (Listing 2). If the computer detects a mistake when you run the machine language generator, it displays an error message and automatically scratches the bad file from the disk.

The machine language generator assumes that you will be using a device 8 disk drive. If you want to use a drive with a different device number, change the value of variable DV in line 10 of Listing 1 accordingly.

You must run Listing 1 only once. Then store it in a safe place, in case you ever lose your copy of M64.ML3.

Listing 2 is the main Basic MS-DOS/C-64 Connection program. The background and border screen colors are set to blue by the Pokes in line 30, but you can change them as you see fit. The character color is set to white by the Print statement in line 50.

Type in both Listing 1 and Listing 2, and be sure to save them to disk before running them.

In this article and the program, the terms "source" and "target" refer to disks being copied from and to, respectively. "MS-DOS" means any IBM-PC-type disk operating system, and "Commodore DOS" means the normal operating system in Commodore disk drives, including the 1571 and 1581.

When you first run MS-DOS/C-64, it loads the M64.ML3 file from drive 8, assuming that file isn't already in memory. (If you want to load the file from another drive, change the 8 in the Load statement in line 40 of Listing 2.) When the opening menu appears, you can remove the disk containing M64.ML3 from the drive if you wish.

The Source

The opening menu asks for information about your source disk, starting with its type—MS-DOS or Commodore. Enter 1 or 2 accordingly, or 3 to quit the program.

Press the return key after making your selection, then choose the device number, 8–12, of the source drive. A number outside that range will be rejected, and you'll be returned to the source-disk prompt.

Having entered a proper device number, insert the source disk into the source drive and press return to proceed. Any other key will take you back to the opening menu, should you want to change your choices.

Assuming that you press return, MS-DOS/C-64 will read the directory of the source disk. In the case of an MS-DOS disk, it will also automatically determine the disk's type (number of sides, number of sectors per track, and so forth) and decode its file allocation table (FAT), which is similar in function to the Commodore BAM (block allocation map). Watch the screen to keep track of what's happening. This process may take a couple of minutes, mostly due to the slow speed of the serial data transfer.

On the screen, the directory takes the form of a ten-entry menu. MS-DOS subdirectories are identified by <dir> under the file-size field, while 1581 partitions are identified by the filetype CBM.

At the top of the directory screen, you'll see the disk's name and ID (Commodore DOS) or volume label (MS-DOS), along with the number of files in the directory and the total number of bytes used by these files. Note that the file sizes are expressed in bytes, not in the blocks to which Commodore users are accustomed. As a result, the sizes indicated for Commodore files are only approximate (block count times 254), while the sizes of MS-DOS files, taken right from the directory entries, are exact.

As I mentioned earlier, the program won't work with relative files or GEOS-type user files. However, these files will still be listed in a Commodore DOS directory.

To select a file to read or a subdirec- ►

RUN it right: **C-64; 1571 or 1581 disk drive**

ILLUSTRATED BY ANN DILLON

tory to view, press the corresponding number and then the return key. To see the next group of ten entries, press either N and return, or just return. If you want to go back to the previous group of ten, press P and return. To quit and go back to the opening menu without making a choice, press Q and return.

The file you select need not be in the group currently on the screen. For example, if the menu is showing files 11–20, you can still choose number 6, as long as you remember that's the one selected. Only numbers in the range from 1 to the number of files in the directory are valid.

Don't remove the source disk from the drive until you're prompted to insert another disk. Otherwise, your file may be copied incorrectly or files on the disk you insert may get damaged. MS-DOS/C-64 won't prompt you to insert a disk before it starts to read a file appearing on the on-screen directory, because it will assume that you haven't removed the disk containing the file.

After selecting the file to transfer, you must specify either Binary or Translation mode. Binary creates a new file that's identical to the original. In Translation mode, the conversion between PETSCII and ASCII occurs while the file is being read into memory.

The Target

Once the file has been read into the memory buffer, it's time to specify the target disk characteristics. At the prompt for filetype, press 1 for MS-DOS, 2 for Commodore DOS or 3 to return to the directory menu.

Assuming you want to proceed with the transfer, next select the target drive. This can be the same as the source drive or different.

Now enter a filename for your target file. For an MS-DOS file, it must take the form FILENAME.TYP, where the main name, containing up to eight characters, is followed by a period and then a 0–3-character filename extension or type. Commodore filenames can have up to 16 characters.

When writing to a Commodore disk, you must also choose the Binary or Translation transfer mode and the file type—SEQ, PRG or USR. Most text-file transfers use sequential files.

Now insert the target disk in the drive and press return to write the file to it.

With an MS-DOS target, because a real MS-DOS operating system is not present, the program must perform several housekeeping tasks during the write operation. These include reading the MS-DOS directory and decoding the FAT, writing the file, and updating the directory and FAT on the target disk. With a Commodore target, all this is done automatically by the DOS.

After it has written the file, the program rereads the source directory and redisplays the directory menu. If your source and target disks are in the same drive, you'll be prompted to reinsert the source disk before the directory read.

Subdirectories

MS-DOS/C-64 lets you transfer files from any MS-DOS subdirectory or 1581 directory partition. When you select an MS-DOS entry marked <dir> or a Commodore 1581 CBM file from the directory menu, the new directory is read and displayed on the screen. You can get back to the previous directory level in MS-DOS by selecting the first entry in the new directory. That entry should be <parent> <dir>. With a 1581, you can't go back through a directory chain; you must return to the root directory and follow the chain forward. All files you write will appear in the root directory only; subdirectories are not supported in file writes.

The program recovers unused and scratched directory and data space on MS-DOS disks, but the Commodore DOS does this job automatically when writing to sequential or program files.

Other Types of Transfers

While MS-DOS/C-64 is designed primarily for transferring files between MS-DOS machines and the C-64, it can be used for other purposes. One is transferring normal Commodore SEQ, PRG and USR files between a 1581 and a 1571, 1541, C-64-compatible hard drive or even an IEEE-bus type drive.

In addition to doing transfers, the program is handy for converting text files between true ASCII and PETSCII using any Commodore-compatible drive. For ASCII to PETSCII, read the file in Binary mode, then write it in Translation mode. For PETSCII to ASCII, read the file in Translation mode, then write it in Binary mode. R

Miklos Garamszeghy is a Toronto-based writer and software developer with numerous public domain, shareware and commercial programs for Commodore and MS-DOS computers to his credit.

Flight of the Condors

Attention all fighter pilots! Report to your stations immediately.

By BEHZAD JAMSHIDI

CLASSIFIED: TOP SECRET. 21 December, 2021.

To: Agent A.C.E.–049832, code name Sky Runner, Earth Defense Institute.

Message: Intelligence reports that the Artificial Satellite Couriers, code name Condors, have run rampant.

Report to spacestation Strata immediately for full-scale launch of T-Wing fighters against the Condor ships.

Instructions

The object of Space Condors is to shoot as many of the courier ships as possible from your T-Wing fighter, all the while avoiding collisions with them. The two Condors with distinctly red wings cannot be destroyed; the rest, with wings shown in flashing colors, are worth ten points each. You get three fighters, one at a time, for each game.

The game consists of three programs. Listing 1 is a Basic boot program that loads and runs the sprites and the game. Type it in and save it under the name Boot. Listings 2 and 3 are hex loaders. Type them in and save them to disk, using the filenames Listing 2 and Listing 3, respectively. Run them individually to create "+Condor Sprites" and "+Space Condors". To play, just load and run the Boot program.

Press the F1 key to start play, then use a joystick in port 2 to fly your fighter. Holding down the joystick fire-button launches a steady stream of laser fire at the Condors. Some of the courier ships will detect your fighter's location and try to ram it, so keep moving. Also, avoid the screen borders, because the Condors wrap around. As you play, you'll develop some strategy and your score will soar.

Space Condors is fast fun. Heard from a recent Sky Runner: "I'm glad I'm not paying for all these games!" R

Behzad Jamshidi, a graphics-design student with an interest in computer graphics, enjoys programming for the C-64.

Listing 1. Boot program. (Available on ReRUN disk. See page 52.)

1541 RAMBOard*

Byte The Copy Protection bullet!

Let's face it - war is hell. And in the Commodore world, one of the ugliest wars of all is being waged by the copy protection industry. They're tough. They're clever. And they're very, very determined. If you've seen some of the current ice out there, you know just how determined they are. Well, we're just as determined. And we've got a way to walk right through the coldest ice out there.

What's our secret? The new RAMBOard, a small card that can easily be installed in your 1541 in 5 minutes using just a screwdriver. With this remarkable piece of firmware in place, backup hassles are a thing of the past!

RAMBOard gives you speed - it comes bundled with a fast copier that can archive an unprotected data disk in under 60 seconds. RAMBOard gives you power - working with our dynamic Maverick software, RAMBOard will back up programs that other systems can't even scratch the surface of. Best of all, RAMBOard won't become obsolete - when newer, even tougher protection schemes come along, we'll create new Maveric/RAMBOard parameters to cut right through them. Backed by our famous R&D, you know that we'll do whatever it takes to keep RAMBOard operating behind enemy lines!

Get your RAMBOard today. And the next time some company tries to charge you for an "authorized" backup of a program you've already paid for, remind them that war IS hell - and you know how to raise a little hell of your own.

1541 & 1541C RAMBOard/ONLY $34.95

In Most Cases, Plugs Right In-NO Soldering Required

1541II RAMBOard/ONLY $44.95

This Version DOES Require Soldering

Profesional Installation Available-Contact Us For Details

***RAMBOard Is An Optional Accessory For Use With Maverick™**

NEW V2.0

MAVERICK™ ★

NEW V2.0

A New Tool-From Some Old Friends

You know us. When copy protection began throwing 1541 drive heads out of alignment, we gave you Kracker Jax. When V-Max™ reared its ugly head, we created the Kracker Jax Elite series. When the copy protection wars escalated, we responded with Bull's-Eye and the Hacker's Utility Kit. And when you decided to explore the mysteries of commercial-grade protection schemes, we were there with Kracker Jax Revealed.

Now the copy protection industry has upped the ante again. They've made it harder than ever to make legitimate backups of your expensive software. Do you think you should have to spend money to buy "authorized" backups of software that you already own?

Neither do we.

Introducing Maverick, the best weapon we've ever made to let you defend yourself from copy protection profiteering. Maverick is so advanced, it has actually replaced every other backup utility we've ever created. That's right - Maverick is now the ONLY archival software we manufacture. All of our R&D efforts go into making sure that Maverick remains the most powerful backup utility available - from ANY source! Take a look at some of these features:

- NEW — 1541/1571/1581 fast file copier - any direction
- GCR Editor for the experienced hacker
- NEW — GEOS™ file copier - works under desktop
- Error scanner with unique sector editor
- Directory editor helps you organize your disks
- Works with C-64/C-128 & 1541/1571/1581 drives
- Scrolling M:L monitor with Drive Mon
- EXLUSIVE Popular subscriber service available
- Single or dual state of the art Nibbler
- 300 + parameters for those tough to backup disks
- Capable of archiving Rapidlok protection
- Single of dual drive high speed data copier
- EXCLUSIVE GEOS™ Module: PARAMETERS & TOOLS
- NEW — Dump a formatted parameter catalog to printer
- Byte pattern scanner for high speed searches
- Technical support from our staff experts.

And this is just the beginning. Our future plans for Maverick include expanded RAMBOard support, RAM expansion module support, and even a 1541/1571/1581 relative file copier! And with our unique Subscriber Program, you can receive Maverick updates automatically - the instant they're released!

You know us. We're the company that has worked hard for years to establish an ironclad reputation for dynamic products, fair prices, and superb customer support. We've always been a part of your past. And as long as you have your Commodore, we'll always be a part of your future.

Attention: Registered Maverick owners!
Parameter Module #4 is now available, Only $9.95
Maverick V2.0 Upgrade also available, Only $9.95

MAVERICK 2.0/ONLY $34.95

Now Includes Parameter Modules 1, 2, & 3!

***Maverick Was Formerly Known As "Renegade" From Kracker Jax**
Not To Be Confused With The Game Of The Same Name

THE 1581 TOOLKIT

Without It, You Don't Know What You 1581 Is Capable Of

It blew people away at the "World Of Commodore Show" held in Pennsylvania in November 1988. It's power and scope astonish anyone who sees it work. And, if you have a 1581 drive, it is the single most important piece of software that you can own. It is The 1581 Toolkit-and it will transform your 1581 into something remarkable.

We know the market, and we know that if you've bought any other 1581 utility in the past, you've probably been disappointed. But while other companies rushed ill-conceived and poorly executed products to market to "cash in" on the new 1581 drive, we did things differently. Our programmers took the time to become experts on the 1581 before they even looked at a drawing board. So when they finished the Toolkit project a full year later, they had accomplished what no one else had - the creation of a tight, integrated package of essential utilities that make the 1581 more than the sum of its parts. Take a look at these Toolkit utilities and see why we're so excited about it:

- Fast Disk Copier
- Directory Editor
- File Track & Sector Tracer
- Fast File Copier
- Byte Pattern Search
- Ultrafast Formatter
- Partition Creator
- Track & Sector Editor
- Error Scanner
- Relocatable Fast Loader

All 10 of these custom utilities use extremely fast read/write routines. Wherever appropriate, they allow full access to partitions. It's obvious we created The 1581 Toolkit to be the finest set of utilities available for the 1581 drive. But we didn't stop there. Order now, and we'll also send you the 1581 DOS Reference Guide FREE! With over 100 pages of concise, valuable information, you'll quickly find this book indispensable! Written by David Martin (INFO Magazine's Copy Corner reviewer), this manual represents a year's worth of research and investigation into the inner workings of the 1581 drive. We've also added extra utilities, including such handy items as a machine language monitor with DriveMon, the perfect companion for the 1581 DOS Reference Guide.

We've spent a lot of time working hard to make sure that nobody knows more about the 1581 than we do. Don't sell your 1581 short. Get the 1581 Toolkit today, and let us show you just what it's really capable of. We'll take your 1581 absolutely as far as it was designed to go. And then we'll take it farther.

THE 1581 TOOLKIT (ON 3.5" DISK)/ONLY $39.95

Includes Your FREE 1581 DOS Reference Guide

The 1581 Toolkit Works On The C-64 Or The C-128/C-128D In The 64 Mode

THE 1750 CLONE

Thanks For The Memory

Most Commodore users are content to use their computers within the constraints placed on them by a limited amount of RAM. But some people want more. More speed. More power. And that means just one thing - more memory.

Power users have long known that the ideal solution to their memory problems is out there in the form of Commodore's incredible 1750 RAM expansion module. Just plug it in and you've got a whopping 512k of onboard RAM - the same amount of memory found on most IBM computers! This is the memory cartridge that all serious Commodore power users want. There's only one problem.

You can't find them.

That's right. These RAM units are almost impossible to buy. We've always specialized in finding solutions to Commodore related problems - here's what we came up with.

First, we bought brand new Commodore 1764 RAM expansion units, the ones with only 256k of RAM onboard. Next, we had Chip Level Design engineer and produce a custom upgrade that takes a 1764 to a full 512k! That's the same half meg of RAM as a regular 1750! Finally, we tested each and every cartridge, and warranteed them to be free from defects.

Now there's nothing to stop you from taking your Commodore 64 or 128 to levels of power and sophistication that the original designers never even dreamed of! If you're using programs like GEOS from Berkeley; the Pocket Series from Digital Soutions; future versions of Maverick from Kracker Jax; Fleet System IV from Professional Software; or the potent PaperClip III from Batteries Included; if you're using ANY of these programs, you won't believe the difference that the extra memory makes!

IMPORTANT NOTES - READ CAREFULLY

*C-64/64c (but NOT C-128/128D) owners MUST buy a heavy-duty power supply to use these units. The power supply is NOT included - it is available from us seperately.

* If you ALREADY own a 1764 RAM cartridge, we can upgrade it for you. Your unit MUST be in perfect working order for us to upgrade it. The turnaround time on upgrades is approx. 2 weeks. It will NOT be necessary for you to purchase a new power supply - the one that came with your 1764 will still work fine.

THE 1750 CLONE
ONLY $199.95
1764 UPGRADE
ONLY $124.95

ATTENTION C-128 OWNERS

Solderless 64K Video RAM Upgrade

Now that Commodore has released the C-128D with 64K of video RAM, we should be seeing 128 programs address this fantastic new feature soon.

BASIC 8 already has the capability of using all 64K of video RAM. If you own the C-128 in stock condition, you own all 16K of video RAM that Commodore felt was necessary. Using Basic 8 format and the full 64K of video RAM provides you with the ability to scroll through video memory as well as enhanced color resolution.

Up until now, to upgrade the C-128 to 64K of video RAM you would have to first search out the components, then find a competent repair outlet to desolder and install the parts. **What a hassle!**

SOLUTION — We have developed a module that simply plugs in to the mother board of your C-128. **No splattered solder — No heat damage — No hassle.**

This package is available in two different forms. Model A has all parts necessary to complete your upgrade, and Model B is identical except that you supply the RAMs. Again, no soldering is necessary. If you have access to low cost RAMs, we suggest Model B.

Both models include easy to follow installation instructions, a test program to verify proper installation, and the plug in Video RAM Upgrade.

Model A (complete) only $49.95
Model B (no RAMs) only $29.95

COMMODORE HEAVY-DUTY POWER SUPPLIES

WATTS The Matter - Can't Get ample power?

Sorry about that. Actually, it's no laughing matter. Our technicians tell us that the majority of Commodore computer problems can be traced back to an inadequate power supply. When the power supply fails, it can (and often does) cause additional damage to the computer itself - and a computer meltdown is no joke.

This doesn't have to happen to you. We are now selling a heavy-duty power supply that will greatly diminish your fear of a power supply failure. These are NOT aftermarket units - they are made by Commodore, and are ideal for use with RAM expanders. They will provide you with a more stable, dependable source of power. This unit will work on ALL C-64's and 64c' on the market.

If your system is important to you, take the extra step to safeguard your investment by getting a Commodore Heavy-Duty Power Supply today. Power you can depend on - with no unexpected shocks.

COMMODORE HEAVY-DUTY POWER SUPPLY

C-64 Version - Only $29.95
C-128 Version - Only $44.95

SOFTWARE SUPPORT INTERNATIONAL

Circle 17 on Reader Service card.

PLEASE READ BEFORE ORDERING: We accept money orders, certified checks, VISA, M.C. and Discover. Previous Software Support customers may use C.O.D. and personal checks. Orders shipped to U.S.A. (48 states), F.P.O., A.P.O., or possessions, please add $3.50 per order for S & H. U.S. shipping is by UPS ground in most cases. FAST 2nd DAY AIR available: add $1.00 per pound additional (U.S. 48 states only). Alaska or Hawaii (all orders shipped 2nd day air): please add $7.50 per order for S & H. C.O.D. available to U.S. customers only (50 states): add $2.75 along with your S & H charges per order. Canadian customers may calculate the S & H charges by including $4.00 (minimum charge) for the first two pieces of SOFTWARE and $1.00 for each additional piece per shipment. All monies must be submitted in U.S. funds. Canadians must call or write for hardware shipping charges. Foreign customers must call or write for shipping charges. Defective items are replaced at no charge if sent postpaid. All in stock orders are processed within 24 hours. U.S. SOFTWARE orders over $100 will be shipped 2nd Day Air at our regular $3.50 S & H charge (48 states only). Washington residents please add 7.6% additional for Sales Tax. All prices subject to change. All sales are final unless authorized by management.

Mail your order to: Software Support, Int.
2700 NE Andresen Road · Vancouver, WA 98661

Or call our toll-free order line at 1-800-356-1179. 9am-5pm Pacific time Monday-Friday
After hours orders accepted at (206) 695-9648 7 days a week.
Technical support available. Call (206) 695-9648. 9am-5pm Pacific time. Monday-Friday.
Orders Outside USA call (206) 695-1393.

Flight notes # 8A

"Hawaiian Odyssey" Scenery Adventure - Locating the secret jewel of the goddess Pele from the cockpit of your single-engine aircraft (or high-performance jet) isn't just as simple as spotting an object from a distance and then flying toward it. No, you must find and follow an intricate set of clues scattered about the Hawaiian Islands that, with luck, will guide you to your goal.

As with other mythical quests, only the proper approach can put you on the right track to finding the hidden jewel. Even if you can determine it's location, the jewel is only visible under a strictly-defined set of conditions. Make a mistake during your final approach and you may get lost so completely that you'll never be able to find your way back!

"Hawaiian Odyssey" Scenery Adventure disk can be used with any SubLOGIC flight simulation program, including Flight Simulator II, Stealth Mission and Jet. The disk covers the entire island chain in such incredible detail you can almost feel the heat from the volcanic crater at Mauna Loa! "Hawaiian Odyssey" Scenery Adventure from SubLOGIC; you've never seen anything like it!

Top Selling Commodore 64/128 Products This Month:

1. Flight Simulator II ($49.95)
2. Stealth Mission ($49.95)
3. "Western European Tour" Scenery Disk ($29.95)

Answers to Important Questions About Lyco Computer!

Why shop at Lyco Computer?

Lyco Computer is one of, if not the largest, and most established firms to provide only quality name brand computer products at prices 30% to 50% below retail. We've set many industry standards, and we are setting the pace for many more in the future. Our standards include: a separate department for customer service; a price guarantee; guaranteed factory fresh merchandise; diverse payment and shipping policies, including a C.O.D. policy which allows customers to have products in their hands before paying anything. Selection places Lyco at the forefront of the industry. Due to our in-stock volume, we cannot advertise all of our products. If you do not see the product you want advertised, call Lyco Marketing toll free.

How do I know I will get the product I need?

Our marketing staff is well-educated in the computer industry. They receive continuous formal training by our manufacturers which enables them to develop and maintain a high degree of expertise on the products they represent. Though our strict guarantee on providing only new merchandise prohibits free trial periods and a guarantee on compatibility, a wealth of knowledge is available to our customers to help with the purchasing decision. As thousands of people every week capitalize on our savings and services, we hope you too, will make Lyco Computer your first choice.

What about warranty or service?

We decided several years ago that a Customer Service Department was needed in the industry. Unfortunately, few of our competitors offer this service. Our Customer Service Department is available at **(717) 494-1670** to provide assistance in all warranty matters. Our product line enjoys "name brand recognition," and we back all of our manufacturer's,stated warranty terms. Many manufacturers will allow defective products to be exchanged. Before returning any item that appears to be defective, we ask that you call our Customer Service Department to assist you in determining if the product is defective. If the product is determined defective, they will give you a special authorization number and speed processing of your order.

Will you rush an item to me?

Since 1981, we have set the standard in the industry by processing orders within 24 hours — not 4 to 6 weeks. We offer next day air, two day air, standard UPS, and postal international shipping services. Our records show we fill 95% of our orders daily. Temporary shortages are normally filled within 10 days. If an order cannot be filled within 60 days, we refund your money in full, unless you choose to wait for the order and benefit from the price savings. Any time prior to shipment, you may cancel or change the out of stock product by contacting our Customer Service representatives.

How do I order?

Send your order to Lyco Computer, P.O. Box 5088, Jersey Shore, PA, 17740. Or, call **1-800-233-8760** or **(717) 494-1030**. We provide four payment methods. We have always accepted C.O.D. orders through UPS. Prepaid orders over $50 are shipped freight-free. For orders under $50, please add $3 for freight. Orders prepaid by a certified check or money order are shipped immediately. Personal and company checks require a 4 week waiting period prior to shipping. Visa and Master Card orders are accepted for your convenience, but we cannot pass along the 4% discount offered for cash. Purchase orders are accepted from Educational Institutions. We only charge sales tax on items delivered in Pennsylvania. For APO, FPO, and international orders, please add $5 plus 3% for priority mail. Advertised prices and availability are subject to change.

Accomplish more. . . in less time with the power and versatility of the ReRUN Disk

Useful Applications

- **Word Processing**
- **Telecommunications**
- **Utilities**
- **Music**
- **Finance**
- **Databases**
- **Graphics**
- **Entertainment, and more . . .**

All year long, ReRUN disks bring you pre-tested, high quality, ready-to-run programs for your business, home, and educational computing needs.

Save Time

No need to spend your time entering lengthy program listings from the magazine. ReRUN disks are ready to load and run. No typing. No trouble.

Each bimonthly ReRUN disk offers popular programs from two issues of *RUN* magazine. Programs designed specifically for your Commodore 64 or 128.*

Added Bonus

Plus you get **BONUS programs** never before published . . . and a documentation booklet with each disk.

ReRUN **saves you money and time** by increasing your computing productivity. For example, in previous issues ReRUN has helped our subscribers . . .

- ✓ write more effective letters and reports with our efficient low-cost word processor
- ✓ enhance the image of business presentations with eye-catching graphics
- ✓ manage your expenses, keep track of accounts, calculate the future effects of your present financial moves
- ✓ break the memory barrier. . . create a RAM disk by using the RAM expansion module for your C-128
- ✓ create documents with double-sided pages and columns of text
- ✓ print banners, signs, and mailing labels
- ✓ help your kids with their math and spelling
- ✓ and enjoy our challenging, exciting ReRUN games.

You can order ReRUN disks individually at $16.47 each, but for maximum savings sign up for one year and receive all six ReRUN disks and documentation booklets for only $69.97. You save almost $5 per disk!

To place your order immediately, call our Toll-Free number

1-800-343-0728

(in NH, 1-924-9471).

*Commodore 64 and 128 are registered trademarks of Commodore Business Machines, Inc.

☐ **YES!** Help me put my Commodore to greater use. Send me a one year subscription to ReRUN (6 bimonthly disks and documentation booklets) for $69.97.

Reduced Price! Save 30%

☐ May/June '89 single issue for $16.47 each

_____ back issues for $16.67 each

_____ _____ _____ _____

Each ReRUN disk covers two issues of RUN magazine. Shipment occurs after the second issue is published. First available back issue is Jan/Feb. '86.

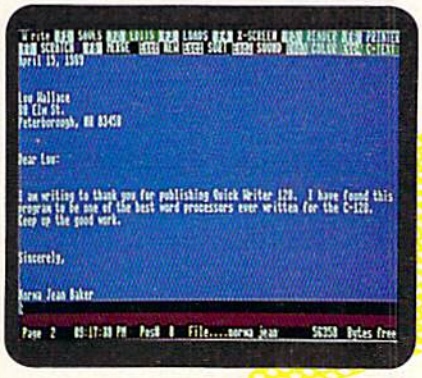

To place your order immediately call our Toll-Free number 1-800-343-0728 (in NH 1-924-9471)

Mail to: ReRUN, 80 Elm Street, Peterborough, N.H. 03458

Quick Writer 128

Haven't settled on an 80-column word processor for your C-128? Then you're in luck with this easy-to-use, menu-driven program.

By LEONARD MORRIS

If you're looking for a word processor with speed rather than frills, Quick Writer for the C-128 may well fill the bill. Designed to work in 80-Column mode, it offers basic editing features for both text and keyboard graphics. Moreover, it's completely menu-driven, so there's no need to memorize commands.

When you run Quick Writer, it first prompts you to enter the date and time for use in uniquely identifying the files you save for future reference. A flashing checkered cursor indicates where text or graphics will be displayed on the screen, and all typing appears above a line of reference numbers, so you can see your current character position in the screen line. The bottom screen line continuously displays the filename (if you've specified one), the time, the screen page number and the number of free bytes left in memory.

Program Modes

Write mode, the mode Quick Writer comes up in, is used for entering text. The program works on a line-by-line basis, so each line must be followed by a return to place it in memory. If you exceed 78 characters in a line, a return will be issued automatically. Word wrap occurs if the 79th character is not a punctuation mark or blank space. This means that the last word on the line is placed on the next line, thus avoiding word breaks. As you type, a tone sounds at the 72nd character in a line to warn you of the approaching end.

Save mode, activated by pressing the F1 key, displays a list of filenames already on disk and prompts you to enter a filename for the document you're working on. If you specify a filename that currently exists, the program displays a warning that the old file will be replaced if you proceed with the save. To intiate the option to cancel the save, you just need to press the asterisk (*) or return key.

Editing

Edit mode, activated by F2, provides numerous options for editing your text, with the option currently in effect indicated in the bottom portion of the screen. The cursor becomes a solid block in Edit mode. To exit this mode, press the asterisk key.

The Edit options are as follows. To activate an option, press the first letter of its name.

SPage lets you select a new screen page to work on.

Advance is used to identify the screen line you want to edit by placing a highlight window on it. Only whatever line is in the window is affected by other Edit options used.

The next line of text is highlighted each time you use the Advance option, until you reach the end of the page. At that point, the highlight wraps around to the top line.

Delete erases the highlighted line from your text. However, the line isn't permanently lost until you do a save with the same filename.

Change lets you actually edit the highlighted text, using the cursor, insert and delete keys.

Insert enables you to insert text above the highlighted line.

Next Page displays the next page on the screen for editing. If the last page of your document is currently on the screen, then wraparound takes you back to the first page.

The ***Relocate*** option is used in conjunction with the Here option, below. When you select Relocate, the highlighted text is removed from your work file and stored at the bottom of the screen, in the same color as its screen color option. You can relocate up to 40 lines at a time, last line first.

Lines that you select with Relocate are placed in new positions by using the ***Here*** option. They slip into the work file just above the highlighted line. Remember, it's first in, last out when you're using these options.

You can also use Relocate and Here to remove lines from your current work file, load a different file to work on, and then insert the lines in the new file.

Get and ***Unget*** work like Relocate and Here, except the highlighted line is copied, not removed. ►

RUN it right: **C-128; printer optional**

Find highlights a particular word throughout your work file.

Exchange lets you change any word or phrase to any other throughout your work file. However, the exchange won't work in any line where it makes the character count exceed 78.

Other Modes

Load mode, called by F3, lists all the files in Quick Writer's directory and prompts you for a filename to load. To load other text files from a disk, rename them by adding the prefix (£),CHR$(92) to the filename.

TX-Screen mode, summoned by F4, lets you switch to a display of the read-only file while in Reader mode, described next.

Reader mode, F5, loads a file to view for reference, but not to work on. To redisplay your work file, press the return key; to view the read-only file again, press F4, as described above. The read-only display can be scrolled and wrapped around from end to beginning by pressing any key but return.

Printing

Printer mode, activated by F6, is, of course, for generating hard copies of your work files. I use a Star NX-10 printer with Quick Writer; with other printers you may find it necessary to do some experimentation to get the desired results.

When printing, you can include a headline at the top of your document and a header and page number on every page. You can also select from ten type and formatting options and enter any special character codes your printer is able to handle.

The type and formatting options are selected by pressing the following keys while in Printer mode:

Normal type, 0.
Italic type, 1.
Condensed type, 2.
No space between lines, 3.
Letter Quality, 4.
Small (subscript) type, 5.
Medium (double height and width), 6.
Large (quadrupled height and width), 7.
Centered text, 8.
Business (margin set), 9.

And More Modes

Enter **Scratch** mode, F7, if you want to remove a file from Quick Writer's directory.

Merge mode, F8, lets you combine two different files into one work file. This comes in handy especially for printing. Merge doesn't disturb the disk files, but you can save the combined document as a new file.

Escape Key Options

Quick Writer includes the following five options that are activated by pressing the escape key and then the indicated number key:

New—escape, 0—clears work file.
Sort—escape, 1—sorts disk directory.
Sound—escape, 2—toggles the keyboard beep on and off.
Color—escape, 3—is used to change the background color of the work screen.
C-Text—escape, 4—is used to change the background color of the line you're working on.

All of these functions make Quick Writer suitable for many word processing needs, while its menus and speed make it easy to use. Try it; I think you'll like it. R

Leonard Morris is an electronic technician by trade and a free-lance Commodore programmer by avocation.

Listing 1. Quick Writer program. (Available on ReRUN disk. See page 52.)

TYPE-IN TROUBLES?

YOU HAVE TYPED IN A *RUN* PROGRAM and are having some problems getting it to run. After a while, you feel like calling for help, but since we're not next door, it's expensive to call us. But we can share our experiences with you. Having heard from many users over the years about their difficulties with typing in listings, we've identified a few recurring problems that plague many people but are easy to fix. So read on and see if your problem is one of these. If so, perhaps the answers will help you find and correct the difficulty.

● You get an Out of Data in Line xxx message. This means that a program line was reading from Data statements and reached the end of the data before it was done reading. There are two possible problems.

One might be with the line that reads the data, usually a For . . . Next loop. Make sure you have the proper values for the loop, because if the listing has a loop of 0 to 150 and you've typed 0 to 160, you'll get the "Out of Data" message. If the loop is correct, then the problem lies in the Data statements themselves. One possibility is that you omitted a whole line of data. That's easy enough to find and correct. More likely, you may have skipped one or more individual data items or typed in a period instead of a comma, which causes two data values to be read as one number. Check your typing carefully against the listing.

● You get an Illegal Quantity Error in Line xxx. That means that you've read a number from a Data statement and tried to Poke it into a memory address. The error occurs because the number is larger than 255 (the largest value a memory address can contain), which means that somewhere in your Data statements you've made an error by typing in a number larger than 255. Again, this is easy to check for and correct. Just look in your Data statements for a number larger than 255. You might have added an extra digit, or perhaps you ran two numbers together (23456 instead of 234,56).

● You get a Syntax Error in Line xxx. This could be almost anything. What it tells you is that there is something wrong in the indicated line. Usually you've misspelled a Basic keyword or omitted some required character. List the line and examine it carefully.

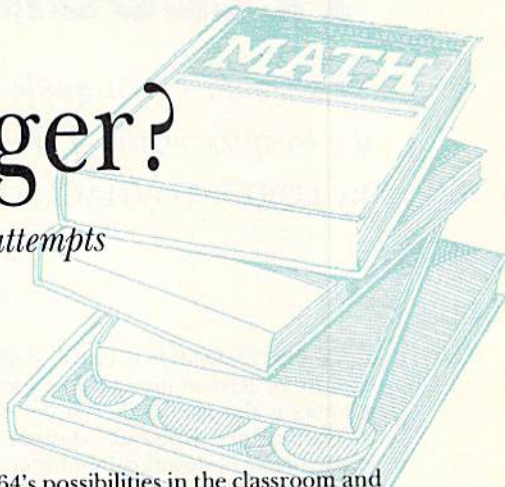

● You get an Error in Data message. This occurs in programs that add up all the data as read, and, when finished, compares that sum with what it should be if all the data were typed in correctly. If it isn't the same, it means an error somewhere in typing the Data statements. Go back and check the data carefully, correct the mistake(s), save the new version and try again.

Finally, we urge everyone who intends to type in one of our listings to use *RUN*'s Checksum program, which is printed in each issue. This nifty little program will help you avoid every mistake we mentioned above, except that it won't detect the omission of a line. ■

—LOU WALLACE

Truant No Longer?

After years of playing hookey, Commodore attempts to return support to education.

By SHARON WEINER

Good news for educators! After a lengthy recess, Commodore Business Machines is once again providing basic support for its eight-bit computers in education. In fact, according to recently appointed Commodore Education Manager John DiLullo, the company is aggressively developing ways to again facilitate the use of the C-64 and C-128 in schools and colleges.

More than 95 percent of U.S. schools are said to use microcomputers, with one computer for every 30 children nationwide, and many of those computers are C-64s or C-128s. Worldwide, according to DiLullo, the C-64 is number one in sales and a significant force in education. To help maintain and improve this position, Commodore is renewing a "substantial support program" for these machines in the schools.

The new education manager reflects this commitment: he has 25 years experience in school systems, including 19 in the classroom as a science, mathematics and computer science teacher. He also represented his school district in an IBM-sponsored program to introduce teachers to computers.

In an interview, DiLullo explained that Commodore wants to address three categories of schools: those that need to add to their C-64s or replace machines that are inoperative; those that hope to begin a computer program by installing inexpensive machines in a few classes; and those, such as vocational schools, that are interested in teaching computer repair. He went on to describe the support program.

Support's New Image

A new organizational team has been established to coordinate activities relating to educational groups, such as issuing press releases and making presentations about Commodore computers. "We haven't had this kind of focus in recent history," said DiLullo. Members of the team are also working with software firms to update lists of educational programs and help develop new ones, and they hope to assist colleges and universities through grant programs and sharing expertise.

An Education Advisory Board, consisting primarily of educators interested in the use of technology in the schools, has been set up, too. This group met in January to discuss Commodore's position in the educational market and how to facilitate use of Commodore computers in the classroom. They are scheduled to meet again to provide ideas to the organizational team.

Of course, in order to use computers, schools must have an adequate supply of working hardware and appropriate software. DiLullo reported that, to help meet this need, Commodore "would like to support school districts that have C-64s or 128s by providing additional machines. We can offer refurbished machines, excellent applications software and updated software guides. We're also soliciting from educators both new and proven curriculum applications."

New and refurbished systems will be available, at "extremely reasonable" prices, to districts that don't yet have Commodores. The hardware offers (see below) will enable schools to both increase their stock of working machines and keep broken machines for parts.

As part of its program, Commodore hopes to educate dealers about the C-64's possibilities in the classroom and to train teachers to demonstrate it to other teachers. To this end, the company is developing more curriculum and teacher-training materials, from activity suggestions to computer workstation displays.

It has also recently published an Educational Software Directory. Prepared by EPIE (Educational Products Information Exchange) Institute, this directory lists more than 2000 of the educational programs currently available for C-64/64C and C-128/128D computers. The programs are arranged alphabetically by subject area, from alphabetizing and aviation to space flight and spelling. Each listing includes a description, age range, publisher and price. The directory also provides publishers' addresses and phone numbers.

John DiLullo believes that a new age in classroom computing has arrived. "The age of computer literacy as 'understanding the machine' is over," he explained. "Now teachers must know how to use the machines as tools for teaching skills and concepts."

"The C-64 represents classic computing," DiLullo concluded. "After years of experience with educational computing, I am still fascinated with what it can do." ■

Sharon Weiner has had wide experience as a high school English teacher and as a free-lance writer and editor of textbook materials and educational software.

Table 1. Commodore's hardware offers to schools.

C-64, 1541 disk drive and 1802 color monitor, refurbished—$299.95.

C-64, 1541-II disk drive and 1802C color monitor, new—$533.90.

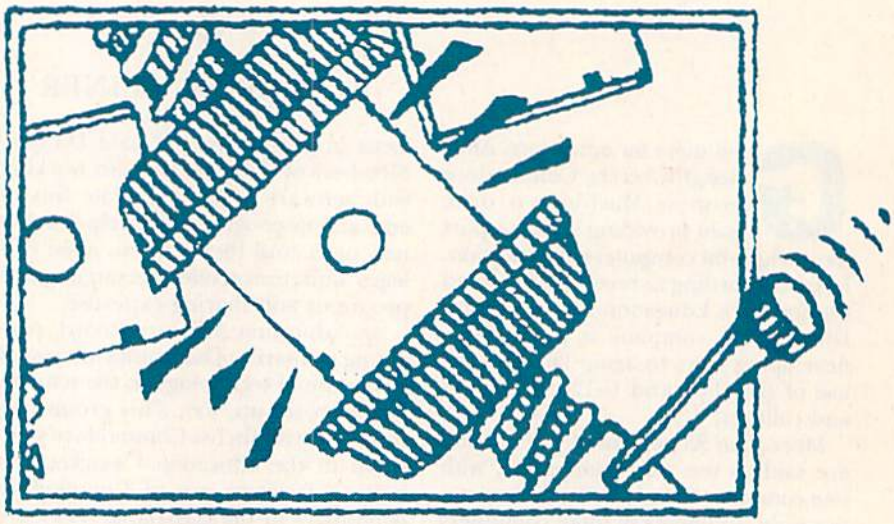

Extended warranties are available on all components.

TELECOMPUTING WORKSHOP

This month Loren guides beginning telecomputerists through the complex world of file-transfer utilities.

By LOREN LOVHAUG

ONE OF THE MOST PERPLEXING aspects of telecommunications for beginners is the use of file-transfer utilities, which are, ironically, designed to make protocol downloading faster and easier.

There are two major reasons why these utilities are popular. First, since it's quite common for a single program to rely on several disk files, the utility primarily ensures that the downloader receives all of the files he or she needs. Multiple files may result from memory constraints during the creation of a large program or the separation of graphic or sprite screens from the program code. You also frequently find programs stored as separate files when they are written in a combination of Basic and assembly language.

Before the advent of file-transfer utilities, users would spend a lot of time downloading, only to find that they were missing one or more files. In addition to the frustration associated with missing files, it was tedious to monitor the progress of each sub-file download so that you knew when to start downloading the next. Most file-transfer utilities now overcome these problems by combining multiple file downloads into one large contiguous file for transfer purposes.

The other reason these utilities are popular is that many offer file-compression capabilities in addition to their file-combination functions. There are a variety of file compression techniques, but all have the same result: storing data in a smaller amount of disk space. This is often accomplished by encoding data in such a way that repeated elements are expressed by smaller code words.

For example, in this column, you'll notice that the word "download" occurs a lot. A typical file-compression algorithm might substitute the characters "!d!" for each occurrence of "download," thereby saving five characters' worth of storage space each time. Of course, if I used such a compression technique, I'd have to provide the *RUN* editors with a suitable decoder. In the same vein, in order to use a file that has been compressed or combined, you must first employ the appropriate utility to return the data to its original unencoded form.

By using file compression, you cut the size of program and data files considerably and thereby significantly decrease the time it takes to transfer them. These savings are important on pay systems such as national telecommunications networks.

A variety of file combiners and compressors have evolved over the years, and most of the confusion beginning telecomputerists experience stems from being unable to recognize which one they need. Fortunately, once you're initiated, it's not very difficult to recognize which utility to choose and how to use it. Most user groups have file-transfer utilities in their public domain libraries. Programs can also be found under "telecommunication utilities" on most electronic bulletin boards, both national and local.

Here's a brief description of the major utilities and how you can recognize which one to use with any particular file.

LIBRARY

The Library program is, to my knowledge, the oldest Commodore file-transfer utility. The original C-64 versions were very simple file combiners, with crude user interfaces. They supported only one disk drive and didn't have any options to delete the source file as it was being incorporated into the Library file. This meant that, due to a lack of disk space, users were limited in the size and number of files they could combine.

Today's versions of Library, for both the C-64 and C-128, are more sophisticated and often incorporate menu- or mouse-driven operation. Most now include options for deleting source files and support multiple disk drives. Recent versions also give you the option of extracting some or all of the files in a particular Library and performing a limited amount of file compression. Files combined using Library always have ".lbr" as their last four characters.

ARC

Like Library, Arc has been around for several years. In fact, Arc can be called an "industry standard" for file-transfer utilities because there are versions of it available for almost every personal computer on the market. This is advantageous in that learning to use Arc on one computer means you can work with its equivalent on just about any other.

In general, Arc is more difficult to use than most such utilities, since it is a command wedge and not menu

ILLUSTRATED BY MARCEL DUROCHER

driven, which means you must familiarize yourself with Arc's commands and syntax.

What Arc lacks in ease of use, however, is made up for in power. As both a file combiner and compressor, it can, depending on the makeup of the data, reduce the size of a file anywhere from 10 to 50 percent. It also includes many MS-DOS-like commands that get disk directories, change disk drives, and copy and move files.

Because of its complex nature, Arc has been updated less frequently than other file-transfer utilities. The current public domain version for the C-64 is 2.50. The C-128 version of Arc is not in the public domain, but is part of a commercial package, CS-DOS 128, that I'll discuss in a future Telecomputing Workshop. Arc'd files, by convention, should end with the suffix ".arc".

Lynx

Lynx first appeared on the telecommunications scene about three years ago, and its chief claim to fame is speed. Like Library, it doesn't do a lot in the way of file compression. When Lynx combines your files for transfer, it doesn't actually copy each file; instead, it changes the file pointers (the first two bytes in a given disk sector) on the last sector of each file to point to the next file to be included as part of your combined Lynx file.

It then rewrites the disk directory to reflect this change, basically fooling Commodore DOS into thinking your separate files are now one large file. This means you don't have to worry about having space for the new file, since Lynx uses the same spaces on the disk that the uncombined files had been occupying.

For the sake of speed, Lynx uses custom disk routines. While this is a great boon to C-64 owners with 1541 drives, it severely cripples Lynx's compatibility with large-capacity drives like the 1581 and the SFD-1001.

Another problem related to its highly specialized disk-access routines is the fact that different versions of Lynx are not necessarily compatible with one another. Lynx'd files have ".lyx" or ".lnx" as extensions.

Self-dissolving Arcs

Self-dissolving Arcs, the most recent file-transfer utilities to appear on the scene, are an outgrowth of Arc. This file-combination technique merges the power and compression capabilities of Arc with a decompression utility that is simply unbeatable in its ease of use. Self-dissolving Arcs simply uncompact and dissolve themselves! When you download a self-dissolving Arc, all you need do is load the program on your 64 or 128, run it, and the files it contains are created on your disk. Self-dissolving Arcs are created by using the Arc utility and then linking the dissolve code to the Arc'd file. They are denoted by the extension ".sda".

Conclusion

Those are the four major file-transfer utilities that you'll find are being used on Commodore-oriented telecommunications systems. I hope this introduction to the programs eases beginner's frustrations and leads to more productive downloading sessions. ■

Loren Lovhaug is the SYSOP of Q-Link's C-128 Special Interest Group. You can write to him care of RUN Magazine, 80 Elm St., Peterborough, NH 03458.

COPY II® 64/128 ver. 4

NOW, A COMPLETE SET OF UTILITIES FOR YOUR COMMODORE 64 or 128!

- Copy files and take advantage of extra memory.
- Do a Directory of a disk.
- Recover accidentally deleted files.
- Rename files.
- Format a disk.
- Protect files for data security.
- Verify disks using the Check Errors feature.
- View *and* change data on any sector on the disk.

BACKUP PROTECTED SOFTWARE FAST.

- Copies many protected programs — automatically.
- Copies even protected disks in under 2 minutes (single drive), 1 minute (dual drive).
- Improved support for ROM updates on 1571 drives; maximum of four disk swaps on a single drive.

Requires a Commodore 64, 64C, 128 or "D" computer with one or two 1541, 1571 or 1581* drives.

Sales/Information: call **503/690-8090**, 8-5 Pacific time, M-F. We accept VISA. Or send a check for $39.95 U.S. plus $3 s/h, $8 overseas.

$39.95

Central Point Software, Inc.
15220 NW Greenbrier Parkway, Suite 200
Beaverton, OR 97006

Central Point Software INCORPORATED - Founded in 1981 -

*1581 drive support for utility portion of program, only.
This product is provided for the purpose of enabling you to make archival copies only.

Circle 81 on Reader Service card.

GEOWATCH

As you boot up GEOS, enter the time and date with AutoSet, an example of auto-execute files.

By WILLIAM COLEMAN

ONE RELATIVELY undocumented area of GEOS concerns auto-execute files, which, since they can be executed directly from the system disk, are ideal for anything that needs doing each time GEOS is booted. This month's geoWatch explores this filetype and provides a program, AutoSet, that demonstrates how to use these files.

After the GEOS Kernal has been loaded and initialized, the system disk is checked for the presence of auto-execute files. Any found there are executed in the order in which they reside on the disk; so if you want a certain file to execute before any other, simply make sure it has priority in the system-disk directory. Auto-execute files on a work disk can also be called up from the GEOS deskTop in the usual way.

One of the prime candidates for an auto-execute file on the system disk is Berkeley Softworks' Configure program, which configures the disk drives and REU for your system. In most cases you should allow Configure to set things up before any other file executes; therefore, place any other auto-execute files after Configure in the system-disk directory.

Note About GEOS Versions

Auto-execute files were not supported until Version 1.3 of GEOS (all 128 versions support them). However, the filetype was already allocated, so if you are using an older version of GEOS, you can still run these programs as you would a regular application, by clicking on them; but they will not automatically execute from the system disk during boot-up.

Creating AutoSet

You first create the AutoSet file on a GEOS work disk, and then you use GEOS to copy it onto your system disk. Type in the AutoSet creator program (Listing 1), using *RUN*'s Checksum program, and save it to disk before running it. Make sure you have a (preferably blank) GEOS work disk in drive 8, which must be either a 1541 or 1571 drive. The program will not work on a 1581 drive.

Once the file is created, which takes about two minutes, boot GEOS and open the disk containing AutoSet. Test the program by double-clicking on it (the program's operation is self-explanatory) and trying all the options. If everything is working all right, copy the file onto your system disk. From now on, whenever you boot GEOS, AutoSet enables you quickly to set the time and date.

There is one small quirk you should be aware of. When the deskTop is loaded, it searches the system disk for a specified input driver and, if it finds one, loads it into the computer. Unfortunately, this happens *after* any auto-execute file on the system disk has executed during boot-up—and the default driver is for a joystick in port 1. So if you're using a mouse, you'll find it won't work when you go to set the time and date during boot-up. AutoSet gets around this problem by allowing you to use the cursor-up and -down keys at this point (left and right movements are not needed here). One consolation is that the firebutton works normally if the mouse is in port 1.

For Programmers Only

For those of you who like to program under GEOS, here are some tips for creating auto-execute files:

Write the program just as you would any other application, except use filetype #14 instead of #6. All of the GEOS Kernal entries can be used. Exit by calling EnterdeskTop as usual.

Do not modify memory from $5000 to $6000, for this area contains the GEOS initialization code. EnterdeskTop is modified to point within this area, and if you corrupt it, GEOS will crash when your program exits.

FirstBoot ($88C5) is zero during boot-up, but the deskTop changes it to $FF, and it will stay that way. This location can be checked if your program needs to tell whether it was called during boot-up. (This is why you never see the Configure screen during boot-up, even though Configure is run.)

Make certain always to verify that you are running version 1.3 or above before checking this location. If your version is 1.2 or below, your application should assume it was clicked from the deskTop.

If C128Flag ($C013) and graphMode ($003F) should be used, decide what computer, and if it's a C-128, under what mode the program is being run. C128Flag will have bit 7 set if running under a 128 GEOS Kernal. If it is running under 128 GEOS, bit 7 of graphMode will be set if it's in 80-Column mode. Again, check first to see whether the Kernal version is above V1.2. If the version is 1.2 or below, your application should assume a C-64 GEOS Kernal.

Remember that an input driver hasn't been loaded. You can either program the keyboard to move the mouse or use FindFTypes and ReadFile to load the driver yourself. R

William Coleman is the author of geoTerm, geoOrganizer and a number of other GEOS utilities.

Lost in a dungeon? Lacking gold pieces or inventory? Don't despair—hint books can come to your rescue!

By BOB GUERRA

I'M ABOARD THE SPACESHIP Heart of Gold. To the west, a screen door blocks my entry into Marvin's pantry. Marvin—a depressing, yet highly intelligent, robot—can come and go through the door as he pleases. Unfortunately, the door demands some small sign of my intelligence before it will let me pass.

I consult the Hitchhiker's Guide and check my inventory: advanced tea substitute, pocket fluff, a towel, a babel fish (in my ear), a screwdriver and some unidentifiable thing my aunt gave me. It's difficult to prove your intelligence when you carry around an assortment of junk like that. However, I know that if I can only get past that screen door, Marvin will help me open the ship's access hatch and maybe, just once, I'll be able to complete a text adventure.

I also know that without some assistance, I'll put Infocom's Hitchhiker's Guide to the Galaxy back on the shelf. It'll sit there alongside other adventure and fantasy role-playing games that haven't seen the inside of my disk drive since the last time I became hopelessly lost in a dungeon or watched my fearless band of on-screen warriors massacred at the hands of wandering orcs.

Buy a clue book? Aren't they only for cheaters and weak-willed adventurers who don't have the fortitude to plug away on their own? I swallow my pride and plunk down $7.95 for my first InvisiClues hint booklet from Infocom.

With that purchase, I realized that none of my adventure or role-playing games need sit idly on the shelf. I can obtain clue books specific to a variety of commercial games. Hints and complete walk-throughs are available online with CompuServe and Q-Link, in monthly newsletters devoted exclusively to the adventure/role-playing game genre, and in large volumes that contain solutions and maps. The next time you find yourself roaming aimlessly through a monster-infested dungeon, here's where to turn for help.

CLUE ME IN!

Although most of Infocom's newest adventures have hints built right into the programs and documentation, InvisiClues are available for all their classic text adventures like Suspended, Deadline and Zork Trilogy, as well as for some of their more recent text-only games like Plundered Hearts, Beyond Zork, Stationfall and Lurking Horror. What separates InvisiClues from most other hint books is a magic marker that lets you reveal only the tip(s) you need to solve whatever has you stumped, without giving away the rest of the story.

Some helpful hint and clue books.

Several other companies have published clue books, partly in response to a deluge of letters and phone calls from gamers wondering where they can find things like "the jewel-encrusted sword." Electronic Arts, for example, currently has hint books available for all three Bard's Tales, Wasteland, Deathlord and Mars Saga.

Instead of simply providing you with a set of maps and step-by-step instructions for completing these games, tip books are generally written in a narrative style, adding details or subplots to enhance the player's enjoyment. The Wasteland Survival Guide, for instance, tells the story of four nuclear-war survivors who set out to explore the radioactive desert of the American southwest. Illuminating the places you must visit and the objects you need to pick up, it helps you succeed in your quest.

The Masters Collection Advanced Hint Book features hints, maps and strategy tips for some of Epyx' titles: The Legend of Blacksilver, Space Station Oblivion, L.A. Crackdown and Sub Battle Simulator. The sections on Blacksilver and Oblivion are the most detailed; the latter includes a map of the planet Mitral that can be photocopied and folded into a polyhedron. The Sub Battle Simulator part is the weakest, as it contains only a few pages of general strategy tips and classic submarine warfare tactics.

Frustrated Might & Magic fans can finally discover the "Secret of the Inner Sanctum" with New World Computing's Adventurer's Guide. It contains 60 pages of maps, as well as a list of specific locations for hard-to-find items. All the tips are printed in a number/letter code that prevents you from inadvertently learning more than you want to know. In addition, over 200 items found in the software are cataloged in a table that lists information such as the alignment needed to use an item, the class (knight, sorcerer, and so on) allowed to use it, any special powers associated with it, and the item's gold value.

Origin Systems, publishers of the Ultima series of fantasy role-playing games, distributes clue books for Ultimas III, IV and V. These guides, Secrets of Sosaria, Way of the Avatar and Paths of Destiny, are required reading for all Ultima addicts. They feature extensively detailed maps, along with vital information on the use of potions, scrolls and a variety of mystical artifacts. Origin also publishes Quest for Clues, a compendium of solutions and walk-throughs for over 50 adventure and role-playing games.

Shay Addams, the editor of Quest for Clues, produces a monthly newsletter called Questbusters: The Adventurer's Journal. Each 16-page issue contains at least one complete walk-through. In addition, the columns Waiting for Duffy and Keys to the Kingdom provide a forum for readers to ask specific questions of other adventurers and share tips with readers.

ON-LINE ACTION

Sometimes you simply can't wait to find out how to get through Dungeon

Hythloth to the Underworld. When you've got an adventuring question that needs an immediate answer, one of the best places to turn to is the electronic gamer SIG on CompuServe [GO TEG]. There you'll find game hints, reviews and complete walk-throughs to 30 Infocom games and 80 other adventure and role-playing programs. The walk-throughs are usually divided into sections, allowing you to download only the part you need. In most cases, you can log on, find the information you desire and log off in under five minutes.

QuantumLink can also be a valuable resource for adventurers in search of advice. Although Q-Link doesn't offer the same type of help as CompuServe, its Commodore Information Network includes a gamer's support group. You can direct questions to representatives from Electronic Arts, Accolade, Mediagenic, Epyx, Mindscape and others in Q-Link's Commodore Software Showcase.

Further, don't be afraid to ask for help from your local BBS. Even if the conversation usually centers on the latest GEOS application or public domain terminal software, there might be some adventurer out there who has just the information you're looking for. Be sure, too, to check out that board's list of other BBSs in the area. If you call boards with names like Dragonslayers' Den, you're sure to find fellow adventurers willing to share their secrets. ■

Bob Guerra, editor for a Boston hospital, reports that, with a little help, he has successfully completed many adventure games.

Table 1. Clue books referenced.

Infocom's InvisiClues
$7.95 and $9.95

WIN BIG MONEY!

The COMPLETE Lottery TRACKER and WHEELER™

The MOST COMPREHENSIVE Lottery Software Program on the Market Today for PICK-6 games is now available for Commodore 64/128! Look at ALL of these Features:

- Record Hundreds of Past Winning Lottery Numbers and Dates!
- Track as many State or International Lottery Games as you want! No Limit!
- Produce EXPERT Trend Charts to Indentify Those HOT and DUE Numbers!
- Analyze Hits 4 ways: Bell Curves, Recency, Percentages, Frequencies, MORE!
- Produce STATISTICS for ALL Numbers You Play — No Randomizing Here!
- Select Numbers to Play 5 Different Ways! You Choose what YOU Like Best!
- Check Your Bets For WINNING Combinations! Records ALL Systems Played including BONUS NUMBER, where applicable.
- Print Charts, Statistics, Recorded Numbers and WHEELING SYSTEMS!
- We Include FREE Addresses and Phone Numbers (where available) of ALL State and International Lottery Commission Offices for Winning Number Lists.

Includes 20 of the Worlds MOST Popular WHEELING SYSTEMS!

Use your computer to improve your odds HUNDREDS of TIMES!

Look At What Our Customers Have To Say:

"I Hit 54 CASH PRIZES the first 8 weeks with the help of your program! The Tracker and Wheeler IS the BEST lottery software program I have used overall...Over $2100 ahead after ALL expenses!" B.C., El Paso, TX

"I won 4 cash prizes the first 2 times I used the Tracker and Wheeler!" B.L.M., Wilmington, DL

"The COMPLETE Lottery TRACKER and WHEELER is SPECTACULAR!" E.D., New York, NY

Many, Many More Letters from CASH WINNERS on File!

No other lottery software package provides all of these features! When we say complete, WE MEAN COMPLETE. Easy to use MENU DRIVEN SCREENS. Printer and Color Monitor recommended but not required for use. All wheeling systems and program features now take only SECONDS to complete! You will LOVE this program in COLOR! Why pay UP TO $150.00 for less?

Don't Hesitate! Place your Order Now!

ONLY:$39.95 Plus $2.00 S&H

Now Sold in All 50 States and 17 Foreign Countries!

NEW

The Daily Number Buster!™

You won't believe it until you see it. A COMPLETE Software Package for 3 & 4 digit DAILY NUMBER GAMES!

- Stores 100's of past winning 3 & 4 digit numbers and dates!
- Print Charts, Stats, Position Hits & more!
- Position Hit Chart displays HOT & DUE numbers by Drawn Winners!
- Choose from 4 bet methods!
- Every straight & combination bet and all BOXING BETS!
- Save your bets & review against winning numbers!
- Complete Odds explanation chart on the BUSTER DISK!
- . . . and MUCH, MUCH MORE!

If you play the Daily Number Games you will quickly see the advantages (and REWARDS!) of working with your computer to analyze and find those WINNING 3 & 4 digit numbers!

Call or write for Your Copy Now! Only:$39.95 Plus $2.00 S&H

NEW

The 50 System Lottery Wheeler Plus!™

- 50 NEW wheels PLUS the ability to add your own favorites to the system!
- Use WITHOUT the Lottery Tracker OR Link to the Tracker Data Base to extract the Hot & Due Numbers!

All GUARANTEED Winning Systems!

Introductory Price Only:$29.95 Plus $2.00 S&H

COLOR PAPER

BRIGHT PACK –
200 Sheets/50 ea. color: Red, Blue, Green, Yellow. 9 1/2 x 11 – $10.90/pk.

PASTEL PACK –
200 Sheets/50 ea. color: Pink, Yellow, Blue, Ivory. 9 1/2 x 11 – $10.90/pk.

COLOR BANNER – 45'/Roll – $11.95/Roll
PARTY BANNER – 45'/Roll – $11.95/Roll
CHRISTMAS BANNER – 45'/Roll – $11.95/Roll
CERTIFICATE PAPER – 100 Sheets/Pk. – $12.00/Pk.

T-SHIRT RIBBONS (Heat Transfer) – Call For Price & Avail.
COLORS: Red, Blue, Green, Brown, Purple, Yellow

COLOR DISKETTES
5 1/4" DS/DD Rainbow Pack. 10/pack – $12.50

For ribbons & paper not listed above, call for price. Price & spec. subject to change w/o notice. Min. order $25.00. S & H $3.50 minimum. Visa, M.C., C.O.D.

Faster than a Speeding Cartridge
More Powerful than a Turbo ROM

It's Fast, It's Compatible, It's Complete, It's...

JiffyDOS™

Ultra-Fast Disk Operating System for the C-64, SX-64 & C-128

- **Speeds up all disk operations.** Load, Save, Format, Scratch, Validate, access PRG, SEQ, REL, & USR files up to **15 times faster!**
- **Uses no ports, memory, or extra cabling.** The JiffyDOS ROMs upgrade your computer and drive(s) internally for maximum speed and compatibility.
- **Guaranteed 100% compatible with all software and hardware.** JiffyDOS speeds up the loading and internal file-access operation of virtually all commercial software.
- **Built-in DOS Wedge** plus 14 additional commands and convenience features including one-key load/save/scratch, directory menu and screen dump.
- **Easy do-it-yourself installation.** No electronics experience or special tools required. Illustrated step-by-step instructions included.

Available for **C-64, 64C, SX-64, C-128 & C-128D** (JiffyDOS/128 speeds up both 64 and 128 modes) and **1541, 1541C, 1541-II, 1571, 1581, FSD-1&2, MSD SD-1&2, Excel 2001, Enhancer 2000, Amtech, Swan, Indus & Bluechip** disk drives. System includes ROMs for computer and 1 disk drive, stock/JiffyDOS switching system, illustrated installation instructions, User's Manual and **Money-Back Guarantee.**

C-64/SX-64 systems $59.95; C-128/C-128D systems $69.95; Add'l drive ROM's $29.95

Please add $4.25 shipping/handling per order, plus $2.50 for AK, HI, APO, FPO, Canada & Puerto Rico. Additional $10.00 for other overseas orders. MA residents add 5% sales tax. VISA/MC, COD, Check, Money Order. Allow 2 weeks for personal checks. Call or write for more information. Dealer, Distributor, & UG pricing available.

Please specify computer and drive when ordering

3 TECHNICAL PROGRAMS

Linear Programmer

Maximize: $Z = 2X_1 + X_2$

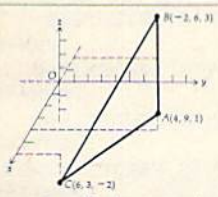

Subject to: $3X_1 + X_2 \leq 44$

$X_2 \leq 10$

$X_1 + X_2 \leq 18$

$2X_1 + 5X_2 \leq 60$

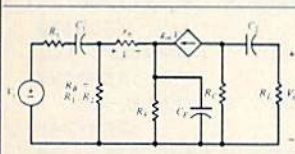

Solves linear programming problems of up to 50 variables and 35 constraints. Systems may be restricted by constraints of *equality, less than* or *greater than*, (different types may appear in the same problem). Objective (Z function) may be maximized or minimized. Computer displays solution (in example at left, Z = 31, X_1 = 13, X_2 = 5). Initial and final tableaus. Special command for easy entry of sparse contraints.

Analytical Geometry in 3 Dimensions

Solves numerical geometry problems like those found in college level analytical geometry text books. After entering point lines, planes and vectors, users may then calculate. Vector cross, dot, triple and scaler products. $\vec{A} \times \vec{B}$, $\vec{A} \cdot \vec{B}$, $\vec{A} \times \vec{B} \cdot \vec{C}$, $s\vec{A}$; find the angle between 2 lines, vectors or planes; find intersection of 3 planes, 2 planes, line and a plane; find a plane through 3 points, a point and a line, point and normal point and parallel plane,or perform 18 other geometric calculations. Entries made and answers displayed in users choice of several methods, including symetric equation, parametric equation, multiple points, direction and magnitude.

(NOT A GRAPHICS PROGRAM)

Electronics: AC DC Circuit Analysis Programs

Program computes general numeric solution to electronic circuit of up to 40 nodes and 63 branches. Branches may contain resistors, capacitors, inductors, current sources, voltage sources or 4 types of controlled sources. Computer displays node voltages, branch voltages, currents, powers and power factors. Step function of branch parameters or frequency with graphic display of results. Menu controlled and user friendly.

Linear Programming System (64/128)	$24.95
Analytical Geometry in 3 Dimensions (64/128)	$24.95
Electronics AC DC Circuit Analysis (64/128)	$29.95
Electronics AC DC Circuit Analysis (IBM PC)	$29.95

Powerful, Low-Cost Data Acquisition and Control with Commodore C64 & C128

80-line Simplified Digital I/O Board
with ROM cartridge socket
Model SS100 Plus $129. Additional $119.

Original Ultimate Interface
Universally applicable dual 6522 versatile interface adapter board.
Model 64IF22 $169. Additional $149.

16-Channel, 8-bit analog-to-digital conversion module.
Requires model 64IF22. Model 64IF/ADC0816 $69.

Interface boards include extensive documentation and program disk. Manuals available separately for examination. Call or write for detailed brochure.

Resources for Serious Programmers.

- Symbol Master Multi-Pass Symbolic Disassembler. C64 & C128. $49.95
- PTD6510 super-powerful Symbolic Debugger. C64. $49.95
- MAE64 6502/65C02 Macro Editor/Assembler. $29.95
- C64 Source Code Book. Kernal and Basic ROMs. $29.95

RUN's Checksum

TYPE IN *RUN*'s CHECKSUM, which serves for both the C-64 and for the C-128 in either 40- or 80-Column mode, and save it to disk before running. When typing in a program from *RUN*, first load and run *RUN*'s Checksum. The screen will display a SYS number that deactivates and reactivates the Checksum. Always disable *RUN*'s Checksum before attempting to run another program. Note: You can abbreviate Basic keywords; spaces affect the checksum only when within quotes; and the order of characters affects the checksum.

With this new version, when you press return after typing in a program line, a one-, two-, or three-digit number from 0 to 255 appears in the home position. If this number matches the checksum value in the program listing, the line is correct. If the number that appears *doesn't* match the checksum value, compare the line with the magazine listing to find your error. Then move the cursor back up to the line and make your corrections. Now, after you press return, the correct checksum value should appear. Continue entering the listing until all the lines have been correctly typed. Then deactivate *RUN*'s Checksum, using the SYS number. Save the finished program.

All the graphics and control characters in the listings in *RUN* have been translated into understandable key combinations. They are the instructions you see inside the curly braces. For example, {SHIFT L} means you hold down the shift key while you press the L key. You do *not* type in the curly braces. What appears on the screen will look quite different from what is designated inside the braces. Here are some more examples:

{22 SPACEs}—press the space bar 22 times

{SHIFT CLR}—hold down the shift key and press the clr-home key

{2 CRSR DNs}—press the cursor-down key twice

{CTRL 1}—hold down the control key and press the 1 key

{COMD T}—hold down the Commodore logo key and press the T key

{FUNCT 1}—press the F1 key

{5 LB.s}—press the British pound key (*not* #) five times R

Listing 1. *RUN*'s Checksum program. This program is available on *RUN*'s BBS for users to download.

AWARD WINNING*

BIG BLUE READER 128/64

File Transfer Utility

Big Blue Reader 128/64 is ideal for those who use IBM PC compatible MS-DOS computers at work and have the Commodore 128 or 64 at home.
Big Blue Reader 128/64 is not an IBM PC emulator, but rather it is a quick and easy to use program for transferring word processing, text and ASCII files between Commodore and IBM MS-DOS diskettes.
Both C128 and C64 applications are on the same disk. ***1571 or 1581 disk drive is required. Does not work with 1541 type drives.***
BBR transfers 160K-360K 5.25 inch & 720K 3.5 inch MS-DOS disk files.
Big Blue Reader 128 supports: C-128 CP/M files, 17xx RAM exp, 40 & 80 column modes and more.
Big Blue Reader 64 is available separately **only $29.95**

BIG BLUE READER 128/64 only $44.95

Order by check, money order, or COD.
Free shipping and handling. No credit card orders please.
BBR 128/64 is available as an upgrade to current users for $18 plus original BBR disk. Foreign orders add $4
CALL or WRITE for more information.

NEW – **BIBLE SEARCH** – Complete KJV New Testament with very fast word and verse search capabilities. Complete Concordance. Word(s) in text can be found and displayed in seconds. Includes both C64 and C128 mode programs. Please specify 1541, 1571 or 1581 formatted disk. **only $25.00**

To order Call or write:

JULY

COMING ATTRACTIONS

LOW-COST LASER PRINTERS— Whether you're a first-time buyer or looking for a replacement printer, this article, which includes sample graphics and letter output, will show you which of the various laser printers is best suited to meet your needs.

WIN UP TO $10,000,000,000!— Well, not quite, but that doesn't mean you shouldn't enter this fantastic software giveaway—you could be one of ten lucky winners of thousands of dollars in software!

IN ADDITION— In July *RUN* will host a barbecue of delights featuring type-in programs, product reviews, news, comments and questions from readers and hints and tips to make your Commodore 64 or 128 more productive.

RERUN PREVIEW— Here's the lineup for the May–June ReRUN disk: **MS-DOS Disks to Order**—Format new MS-DOS disks automatically on your 1571 drive and C-64/128; **Arithmetic-Tac-Toe**—Practice your arithmetic skills while having fun with your C-64; **Box Scores**—Connect dots to make more boxes than your opponent on your C-64; **Anatomy of Calculations**—Let your C-64/128 do arithmetic for you as you watch what's happening in the process; **Solitaire Extraordinaire**—Wile away the hours with this C-128 card game; **Calorie Counter**—Keep track of calories with your C-64/128; **Type Invaders**—Play this C-64 game and learn to type, too; **The MS-DOS/C-64 Connection**—Read and write MS-DOS files; **Flight of the Condors**—Save Earth from destruction with your C-64; **Quick Writer 128**—Easy-to-use 80-column word processor.

SMASH! HITS!

Looking for some real action in home computer games? Excitement that'll have your heart pounding and palms sweating? Razzle dazzle graphics that'll drive you wild?

Look no further than these incredible arcade smash hits — now *faithfully* converted for your home computer by Tengen.

Speaking of smash, Blasteroids® gives a lot of space rocks a chance to do exactly that to

your starship. Twist, dodge and blast away at the never-ending onslaught of asteroids and enemy ships. But

one wrong move and you'll bite space dust.

When it comes to hits, nothing lets you give or take more than Vindicators.™ It puts you in charge of a hyper futuristic tank that'll blow your mind — fighting against enemy tanks and turrets that'll blow you *away*.

Get Tengen's smash hits at your favorite retailer today. And experience the best of the arcades at home!

They're available now for the C-64/128, Amiga and Atari ST.

MARVEL COMICS®

The AMAZING SPIDER-MAN™ and CAPTAIN® AMERICA

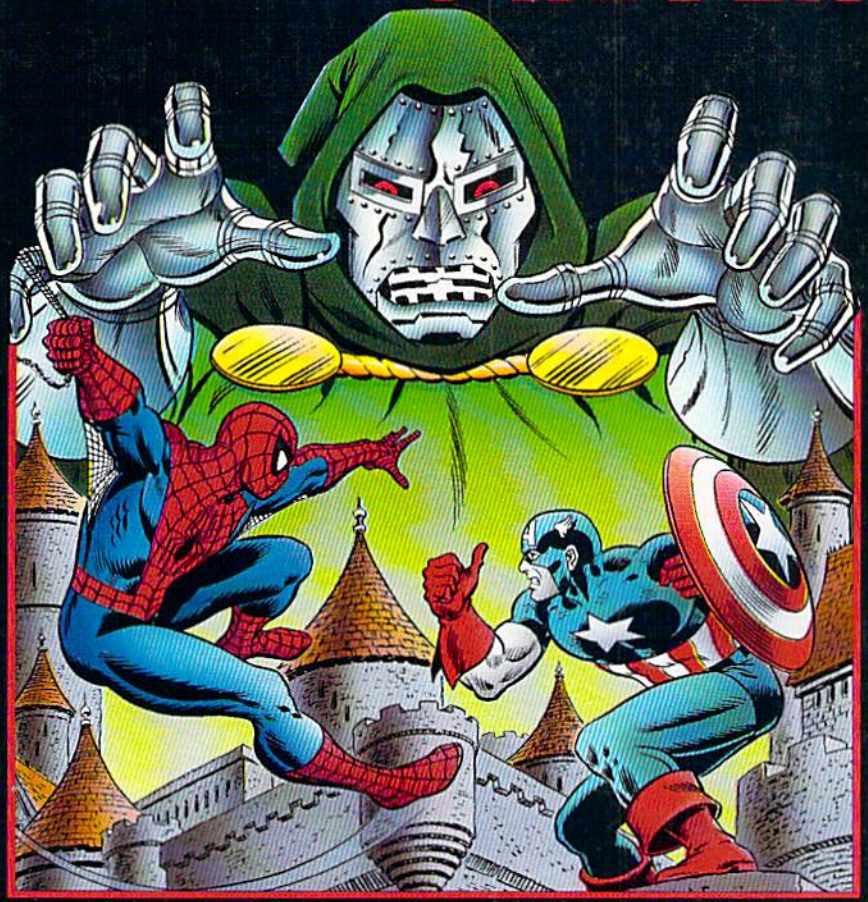

in DR. DOOM'S™ REVENGE!

AMIGA

IBM

IBM

C64/128

The evil genius Dr. Doom has stolen a U.S. nuclear missile, and threatens to detonate it over New York City if his demands aren't met. The lives of five million innocent people rest on Doctor Doom's two arch-enemies: Spider-Man and Captain America. But this time Doom has created an army of robotic guards, and assembled the most formidable group of Super Villains ever, including Electro, Machete and The Hobgoblin to carry out his sinister plans.

You play the part of both Spider-Man and Captain America, invading Dr. Doom's fortress to save New York from Armageddon. You'll see authentic-looking comic book pages "tear open" for actual combat scenes, where you'll use Spidey's wall-crawling and web-slinging powers — or Cap's amazing shield — to defeat Doom's emissaries. Should you survive all this, you'll then face the evil Doctor Doom himself, an armored madman obsessed with revenge.

- **An actual Marvel comic book destined to become a collector's item, only available in the game package, sets the stage for Spidey and Cap's mission!**
- **Varying levels of difficulty keep the game constantly challenging!**
- **State-of-the-art, full-screen comic book pages drawn in brilliant colors, with over 30 challenging arcade-style sequences!**
- **Endless hours of fun for comic book and adventure lovers of all ages!**
