We Turn C128 Owners into C128 Users For only $9.98

A subscription to Loadstar 128 Quarterly™ disk brings you a 5¼" disk chock-full of great programs for your Commodore® 128 every three months for just $9.98.

What a way to go, 128!

Loadstar 128 is a new software collection designed specifically for the Commodore 128 by the editors of **Loadstar**. Every three months you will receive a 5¼" disk filled with new 128-only programs *not found* in our monthly **Loadstar** collection.

The Best Software Value for the 128.

Loadstar 128 is delivered direct to you four times each year for only $39.95. That's only $9.98 an issue. So order today with the attached coupon or call toll-free 1-800-831-2694.

Money-back guarantee.

If you are not satisfied with **Loadstar 128** for any reason, return your first issue for a full refund.

Use the Full Power of Your 128.

Loadstar 128 issue #5 contains seven great programs for your C-128, taking advantage of the 128 features like the 80-column format (RGB monitor recommended), larger memory, and a more powerful BASIC.

Contents of Issue #5
(Available as a back issue)

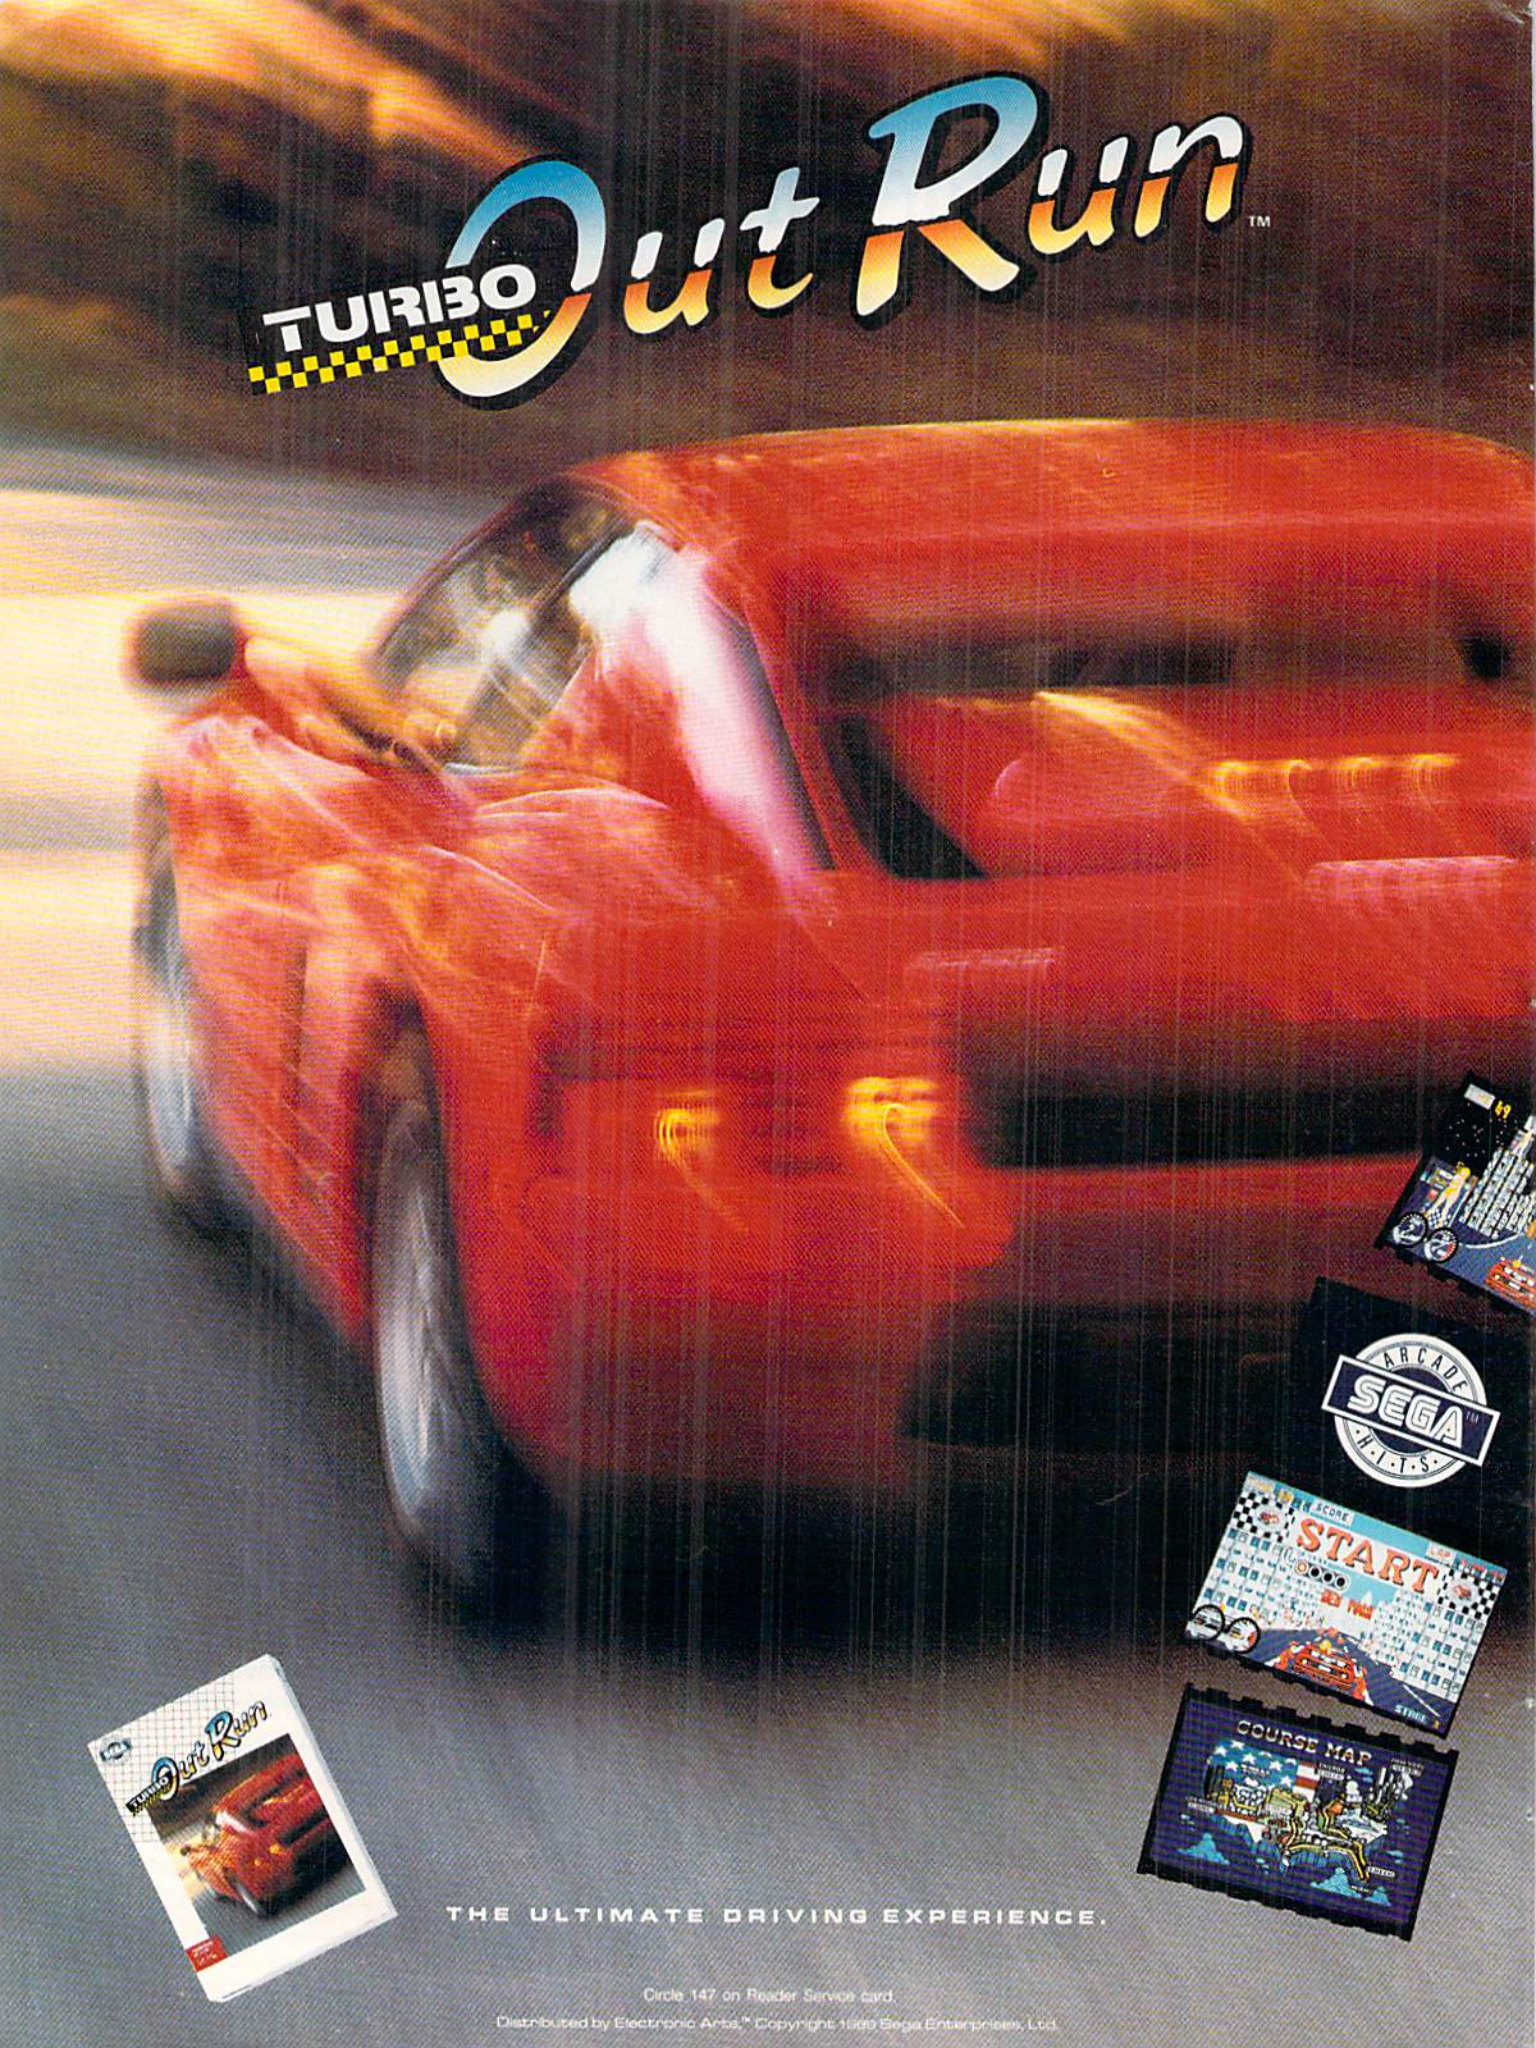

Resume Writer—Create professional looking resumes.
Wreck of the Copernicus—Explore space as you play a huge text adventure game.
Recipe Box—Keep all your kitchen recipes on disk.
Quarktory—Modify most test files to suit your word processor.
Plus 3 more great programs!

YES! Please rush my first issue of **Loadstar 128** to start my one-year subscription (4 issues) for my Commodore 128 for only **$39.95** postage paid. *Canada/Mexico $49.95, Other Foreign $59.95.* Make check or money order payable to **Softdisk Publishing** in U.S. funds. Louisiana residents add 4% state sales tax.

FEATURES

26 SAILING THE COMMODORE SEAS *by Ellen Rule*
Your C-64 or C-128 can perform a wide variety of interesting and useful tasks—so many, in fact, that you may find the possibilities overwhelming. Decide for yourself which to pursue and how to get started.

***32 COLOROUT** *by Thomas Czarnecki*
Fight the battle of the bricks, and the wall comes tumbling down around your C-64.

***36 SPEEDY VIEWER** *by Howard I. Goldman*
Examine both sequential and program text files quickly on your C-64—with the convenience of word-wrap.

***39 PRINT A MONTH!** *by Jared Reynolds*
Save time and frustration in scheduling with this C-64 program that prints out monthly calendars filled with your own important reminders.

***42 COLOR ME QUICK** *by Steven Gregg*
Get instantaneous control over the screen, border and text colors with your C-64.

RUNning Ruminations

Are user groups in trouble?

I have to wonder as I witness one user group after another shifting focus to accommodate the growing number of members who prefer the Amiga or MS-DOS machines to the 64 or 128.

Too many user groups are dropping the Commodore from their title and substituting the word Computer. So, for example, the Smallville Commodore User's Group becomes the Smallville Computer User's Group.

User groups are obviously wrestling with the attempt to meet the interests of *all* members, including those former C-64/128 users who have upgraded to other machines.

User groups join the growing list of generic items.

This is a bad sign for the remaining faithful. Once a haven for Commodore computer users to gather and share information about computing, user groups are becoming meeting places for users with disparate interests.

Where club members used to experience a sense of belonging, many now feel a sense of loss. Users of the Commodore 8-bit machines attend monthly meetings to chat with people who share common interests. Now they're often confronted with unfamiliar hardware such as add-on boards and strange-sounding software and accessories. The 386 vs. 286 debate means very little to the C-64 user who needs help with his 1541 disk drive.

Whatever problems Commodore computerists had with their machines, other club members probably experienced a similar problem at one time or another and therefore could offer a solution. But is the Amiga 2000 owner who has just added a 40-meg hard drive to his system interested in how the C-64 owner can get his printer to underline, or vice versa?

And there's not much opportunity for software exchange among members whose systems are incompatible. How much interest does a C-64 user have in a software demo that requires 40 megabytes and something called a Hercules card?

At many user group meetings today, less than 50 percent of the programs, discussions and demonstrations apply to 64/128 users.

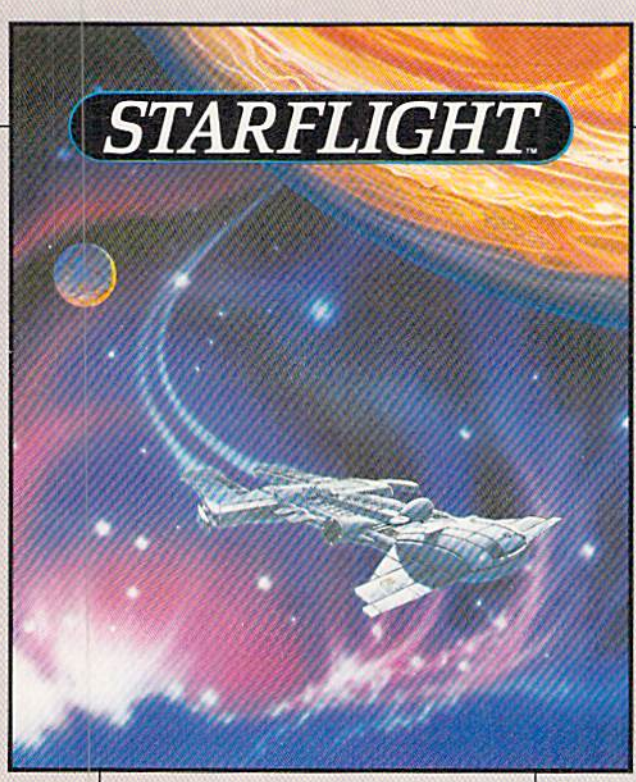

User groups today are taking their lead from Commodore, which is attempting to repair its badly damaged image by shifting its focus to the Amiga and MS-DOS lines. As Commodore continues to abandon the 8-bit market, it becomes imperative for existing clubs to redouble their efforts to support the loyal 8-bit users. Many first-time users need to turn to their group, one of the last remaining bastions of support for users. Without the continued support of user groups, the C-64/128 reaches orphan status very quickly.

User groups must address the problem of how to accommodate the rising interest in new machines, while at the same time continuing to serve the needs of the existing and potential 8-bit community. If you notice a shift of focus in your club, make sure that your interests are addressed at your club meetings. Don't let this valuable source of help and information dry up.

Dennis Brisson

Dennis Brisson
Editor-in-Chief

Boldly go where no game has gone before.

Beam Aboard, Captain.

Your starship is fueled and ready. Your crew is fully trained. You launch from Starport, heading toward the galaxy's core on a hunch. You've been chosen to seek new worlds to colonize. New resources for a homeworld gone stale.

Your navigator zeroes in on a red dwarf star. Long-range scans show three planets: a gas giant, a frozen ice world, and a blue-oceaned paradise that looks just like heaven. A good place to land.

Suddenly a klaxon sounds. "Captain, we're being scanned," says your Science Officer. A giant hologram of a squid-like creature appears on your view screen and hisses, "Prepare to die, air-breathers."

Your space odyssey has just begun.

State-of-the-art Outer Space Simulation.

- Stunning graphic simulation of rotating planets, launch sequences, laser battles, and more.
- Explore 270 star systems and 800 planets with unique ecosystems. Each planet contains almost 2 million different locations.
- Choose your own crew—Science Officer, Communications Officer, Navigator, Chief Engineer, Medical Officer, and Captain.
- Includes full starmap and security decoder.
- The state-of-the-art in entertainment software. Over 15 man-years in development.

Explore Strange New Worlds
Land on different planets to collect valuable minerals, lifeform specimens, and artifacts from ancient civilizations. But keep your laser on stun—not all the locals will be glad to see you.

Talk to Aliens
Each alien race, like this Veloxi, has a unique culture, personality, and language. They can give you clues—if you can get them to trust you.

"Standard Orbit, Captain."
From hull-crushing gas giants to frozen dwarves, each star system is unique. Study your sensors carefully—there's a stiff fine for recommending colonization of boiling lava planets.

ELECTRONIC ARTS™

The Best Selling Space Adventure Now for the C64

To order: Visit your retailer or call 800-245-4525 from U.S. or Canada 8am to 5pm PST for Visa/MC orders. Or mail check (US$) or Visa/MC #, cardholder name and exp. date to: Electronic Arts Direct Sales, P.O. Box 7530, San Mateo, CA 94403. C64 version $39.95. IBM/Tandy version $49.95. Add $3 shipping and handling. CA residents add 6.5% sales tax. Allow 1-3 weeks for delivery. Screen shots represent IBM version. Access Fast mode on your C-128—in C-64 mode; display all characters on the screen at once; put word wrap into your adventure game programs.

By TIM WALSH

$580 1764 RAM Expander Discoveries

As a Commodore Service Technician, my curiosity was piqued by stories of the C-64's 1764 RAM Expander usage in 128 mode. I plugged the unit into a C-128 to discover for myself if it would work. Lo and behold, all RAM expansion-compatible software worked fine with it, including GEOS!

My next step was to upgrade the 1764's stock 256K of RAM to the 512K offered by the hard-to-find Commodore 1750 RAM Expander. With eight low-profile 16-pin IC sockets and eight 41256-2 RAM chips in hand, I opened the 1764's case. First, I removed the solder in the 1764's empty circuit holes and soldered in the IC sockets. Next, I plugged the eight RAM chips into the sockets, carefully observing the proper position of pin 1.

With its new double-capacity RAM in place, my beefed-up 1764 passed all the 1750 diagnostic tests. After many months of use, GEOS 64 and 128 and Digital Solution's Pocket Series software still work fine on it. Any C-128 owner with a steady soldering hand can do the same to a 1764.

—Scott Sumida, Kailua, HI

$581 Relocatable RAM Enhancer

Many Commodore computerists want to know how to access their 1700, 1750 or 1764 REU from outside of programs such as GEOS. Well, look no further. Relocatable 64 RAM Enhancer can be placed virtually anywhere in free memory.

Designed to help programmers access the REU more easily, Relocatable 64 RAM Enhancer provides the C-64 with an elaborate SYS command. By changing the values associated with the SYS command, this program provides the functional equivalent of the C-128's Basic 7.0 Stash, Fetch and Swap commands used to move data to and from the REU.

$583 128 Screen Color Cycler

As with the C-64, the C-128 allows you to change the cursor color by holding down the control key and pressing a number key. After activating my machine language utility, 128 Screen Color Cycler, you can change the 40-Column mode's screen and border colors by holding down the control key and pressing a function key. The color changes will occur even when a Basic program is running!

To cycle forward through the screen colors, hold down the control key and press the F1 key. To cycle backward, use control/F3. Similarly, F5 and F7 cycle the border colors the same way. Best of all, 128 Screen Color Cycler use of the control/function key combinations allows the C-128 function keys to remain unaltered by this program.

$584 Low/High Byte Converter 64

Both experienced and inexperienced programmers alike will find Low/High Byte Converter 64 an invaluable addition to their collection of programming utilities. This program adds two new Direct Mode commands that make working with two-byte values a breeze.

The first command, ↑ (followed by a number), instantly converts a number into low byte/high byte format. The second command, / (number), peeks a two-byte pointer (vector) and displays its address in memory. For example, if you want to know the address of the IRQ vector, just enter / 788, and it'll be displayed for you.

```

$585 Fast Mode via Caps Lock

If you use your C-128 a lot, you'll appreciate this short program that accesses the C-128's Fast mode while you're in C-64 mode! Simply run the program below and depress the caps-lock key. To return to Slow mode and get your screen back, unlock the caps-lock key. This program is great for performing complex math functions or for reducing the amount of time it takes to get lots of machine language into memory.

$586 Calling All Characters!

Getting all the upper- and lowercase letters and graphics characters displayed on the C-64 screen at the same time is ►

Taking your 64 and 128 into the 1990's

CMD HardDrives

- Four modes of operation: 1541, 1571, 1581 emulation modes for compatibility and Native mode with up to 16 Mb partitions.
- Built-in *GEOS™ and *CP/M™ compatibility.
- Standard capacities of 21.5, 48.6 and 104 Megabytes with custom capacities in excess of 200 Megabytes.
- Serial bus interface supports Standard Serial as well as high-performance Fast Serial and JiffyDOS protocols.
- 3 1/2" SCSI technology allows for quiet, cool reliable operation in a compact case about the same size as a 1581 drive.
- Can be interfaced with Amiga, IBM - compatible and MacIntosh computers, allowing you to take it with you when you upgrade.
- Built-in real time clock for time and date stamping of files.

Our goal was to design a reasonably priced drive which was easy to use, and we've done just that. We challenge you to compare our HD series to any other hard drives ever available for the 64 and 128. CMD HD hard drives utilize the latest hardware technology and operate using the most innovative disk operating system ever made available to 64 and 128 owners. CMD engineers were inspired to create a hard drive which overcomes the problems inherent in earlier designs. As a result, the evolution of new features and a level of compatability previously thought of as impossible in any disk drive has become reality. Features such as the SWAP function allow you to operate software which only recognizes a specific device. The built-in SCSI controller allows expansion of your system to over 4 Gigabytes of storage, as well as allowing connection to other types of computers. So while other companies are willing to let your 64 or 128 become obsolete, CMD is taking your 64 and 128 into the '90's. CMD HD Hard Drives are available now, order yours today !

** GEOS is a Trademark of Berkeley Softworks • CP/M is a Trademark of Digital Research*

HD-20 $599.95 • HD-40 $799.95 • HD-100 $1299.95

- **Built-in two drive file copier.** Copy PRG, SEQ, REL and USR files between two drives of any type or to and from REU's. Great for quick backups and moving programs and files between 1541, 1571 & 1581 drives and REU's.
- **REU support.** The JiffyDOS commands now fully support Commodore REUs (RAM Expansion Units) running under RAMDOS. Access your REU just like a disk drive without having to load special wedge utilities.
- **Enhanced text screen dump.** Automatic screen mode recognition and printing of upercase/graphics & lowercase characters.
- **Redefinable 64-mode function keys.** Allows you to easily redefine the function keys to suit your specific needs.

JiffyDOS Version 6.0

The Ultimate Disk Drive Speed Enhancement System

- **Ultra-fast multi-line serial technology.** Enables JiffyDOS to outperform Cartridges, Burst ROMs, Turbo ROMs, and Parallel Systems – without any of the disadvantages.
- **Speeds up all disk operations.** Load, Save, Format, Scratch, Validate, access PRG, SEQ, REL, USR & direct-access files up to **15 times faster!**
- **100% Compatible – or your money back.** Guaranteed to work with all your hardware and software, including copy-protected commercial programs.
- **Uses no ports or extra cabling.** The JiffyDOS ROMs upgrade your computer and drive(s) internally for maximum speed and compatibility.
- **Easy Installation.** No experience or special tools required for most systems.
- **Supports C64, 64C, SX64, C128, C128D, 1541, 1541C, 1541-II, 1571, 1581 & more**
- **Can be completely switched out.** If ever necessary, the flip of a switch returns you to a 100% stock configuration – without resetting or powering down.
- **Built-in DOS Wedge.** Plus 17 additional commands and convenience features, including file copier, screen dump, directory menu, and single-key load/save/scratch

- **Supports CMD HD Series Hard Drives and RAMLink.** Enhances the performance of CMD's new line of integrated C64/C128 products.
- **1581 support.** Copy programs and files from 1541 and 1571 drives to any partition on your 1581. Select partitions easily with just a few keystrokes.
- **Quick printer output toggle.** A simple 3-key command switches output from screen to printer and back with ease. Eliminates having to type the complicated OPEN4,4:CMD4 and PRINT#4:CLOSE4 command sequences.
- **Adjustable sector interleave.** Enables you to increase disk-access performance even with hard-to-speedup software.

Hard Drive Ordering Information

Add $25.00 for shipping and handling per drive. All orders shipped UPS ground. Please allow 3 to 6 weeks for delivery. U.S. prices quoted.
Canadian: 20Mb - $649.95 • 40Mb - $849.95 • 100Mb - $1349.95 Shipping: $30.00
Foriegn: 20Mb - $699.95 • 40Mb - $899.95 • 100 Mb - $1399.95 Shipping: $35.00

JiffyDOS Ordering Information

C-64/SX-64 systems $59.95; C-128/C-128D systems $69.95; Additional drive ROMs $29.95
Please specify computer (w/ serial number) and drive(s) when ordering.
Add $4.50 shipping/handling per order, plus $4.00 for C.O.D., APO, FPO, AK, HI, PR & Canada. $12.00 add'l for other overseas orders. MA residents add 5% sales tax. VISA/MC, COD, Check, Money Order. Allow 2 weeks for personal checks. U.G. & Dealer pricing available. Call or write for more information. Version 5.0 owners please call for upgrade information. Prices subject to change without notice.

no small feat. My C-64 program, Lowercase in Reverse Uppercase, lets you print lowercase letters along with the normal uppercase letters. It also displays on the screen characters produced by pressing the Commodore or shift key with any alphabet key.

When you run the program, press control/9 to access the lowercase characters. When this program is active, the cursor is invisible in Direct mode. Just press the Commodore and shift keys or enter PRINT CHR$(14) to display the cursor.

$587 WORD WRAP 64/128

As I was developing a text adventure, I realized that I needed to print rather long words (strings) to the screen without their breaking at the end of the line. I wrote this short word-wrap routine to solve this problem, and it works on both the 64 and 128. Just put your text after A$, as shown in the program. To use the program in 80-Column mode, change the value of C in line 30 to 79.

```

$588 DATA STATEMENTS MADE EASIER

To facilitate typing in Data statements on your C-64, I wrote F1 Key Enhancer. After you run the program, press the F1 key to print a line number followed by the word DATA; then type in the data for that line. When you reach the end of the line, don't press the return key. Instead, press F1 again, and it will automatically advance to the next line, complete with a new line number and the word DATA. As written, the program defaults to a line number increment of 10, which is perfect for typing in most Magic listings, as well as many other programs.

When you've finished typing in all the Data statements, just press return to get back to Direct mode.

$58B ACCESSING 1581 PARTITIONS

If you've tried accessing 1581 disk partitions from within applications software without success, try this. As a demonstration, I'll show you how it's done with *RUN*'s word processor, RUN Script. Select the Disk Command option (F1,>) and enter: /partition name. Accessing the directory will then reveal the partition's contents.

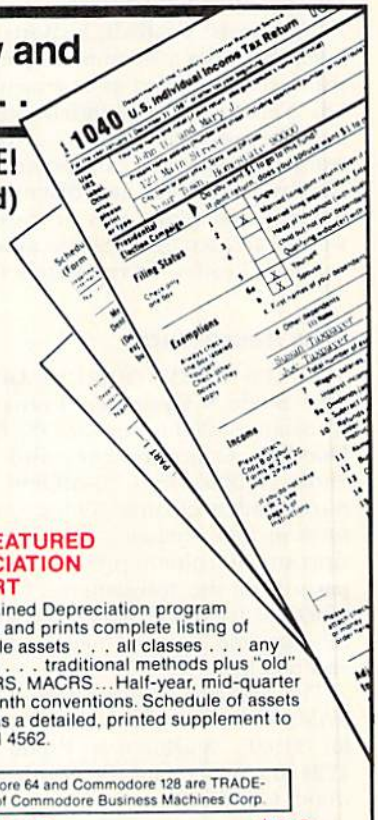

To return to the drive's root directory, select the Disk Command option again and enter /. The syntax is the same, whether you're using a C-64 or a C-128. Experiment for a while with this technique and a partitioned 3½-inch disk, and I think you'll find that it's a truly helpful trick to have on hand.

—TIM WALSH, MAGIC COLUMNIST ■

Magic is a forum wherein RUN's *imaginative and inventive readers may share their programming tips, brief software or hardware modifications, shortcuts or items of general interest. If you have an idea that you have found makes computing easier, faster, more exciting and enjoyable, send it to: Magic, RUN Magazine, 80 Elm St., Peterborough, NH 03458.*

RUN *pays $10 to $40 for each trick published in the column. If you'd like a copy of the latest edition of* RUN's *Magic Trick Writer's Guide, send in your request with a self-addressed, stamped, business-size envelope; you'll receive a copy in two or three weeks.*

TAXPERFECT™ Get TaxPerfect™ now and relax on April 15th . . .

• SEVENTH SUCCESSFUL YEAR! • MANY THOUSANDS ALREADY IN USE!
• Your Simple Answer to the Tax Reform Act of 1986 (As Amended)

• TaxPerfect is the quick, correct, easy way to do your taxes • Absolutely up-to-date with the Tax Reform Act of 1986 and ***all*** new tax changes • Simplest tax return preparation program available — at any price • Single-keystroke form-to-form change • Automatically calculates and transfers data from every FORM and Schedule to FORM 1040 • Simply answer the questions — TaxPerfect calculates return, tax due or amount of refund due you • Automatically elects the greater of Standard or Itemized deductions • Prints data to all FORMS or Schedules you need for your complete return — ready to sign and file • Highly acclaimed by tax pros, CPA's and tax preparers, TaxPerfect is easy to understand and a pleasure to work with. Available for Commodore 64 and Commodore 128.

- TaxPerfect is fully screen-prompted, menu-driven and easy to use. System includes comprehensive User's manual with helpful tutorial example.
- With a single keystroke, TaxPerfect instantly recalculates your entire return when you change any item.
- TaxPerfect also prints directly onto IRS forms.
- TaxPerfect data files can be stored on disk.
- TaxPerfect yearly updates are available at 50% discount to registered TaxPerfect users.
- TaxPerfect is an essential addition to your personal software library — and best of all, it's tax deductible.

TAX PLANNING

• Most powerful program features available —at any price • Supports RAMdisk • Prints the input sheets to organize your data • Built-in calculator feature accumulates input and enters total • 32 PF key functions achieved with 1 or 2 keystrokes • Fast, complete tax calculations — 20 forms in under 2 seconds (most returns in under 1 second) • On-line pop-up Help menus • Full calculation-override capability • Follows IRS text & line #s **exactly** • Exclusive context-sensitive Datachek™ pinpoints omissions—and alerts you to effects of your input • Our exclusive Current Values Display constantly reflects all changes with your input • In Planning Mode all unnecessary text input prompts are eliminated. Only numeric input is prompted for.

RETURN PREPARATION

TaxPerfect PRINTS THE INCOME TAX RETURN FOR YOU: **TaxPerfect 64**—prints page 1 & page 2 of the FORM 1040 and Schedules A,B,C,D,E and SE as well as FORM 2441, 3903 and 6251 on standard IRS government forms or on blank computer paper for use with transparent overlays. **TaxPerfect 128**—supports all of the above forms ***plus*** Schedules F and R and FORMS 2106, 2119, 2210, 3800, 4136, 4255, 4562 and 4684. All other forms and schedules are considered in the calculation. TaxPerfect features direct screen input using fast ten-key style on the Commodore 128.

FULL-FEATURED DEPRECIATION SUPPORT

Self-contained Depreciation program calculates and prints complete listing of depreciable assets . . . all classes . . . any length life . . . traditional methods plus "old" rules, ACRS, MACRS . . . Half-year, mid-quarter & mid-month conventions. Schedule of assets attaches as a detailed, printed supplement to the FORM 4562.

Commodore 64 and Commodore 128 are TRADEMARKS of Commodore Business Machines Corp.

Complete 1989 Edition: TaxPerfect 64 $89 TaxPerfect 128 $99

News and New Products

Deliver hot pizza to a millionaire and avoid the Noid; QuantumLink elects new members to its board.

By HAROLD R. BJORNSEN

Be a Hero

WESTLAKE VILLAGE, CA—Cinemaware (4165 Thousand Oaks Blvd., Westlake Village, CA 91362) has released two games for the C-64 for $29.95 each.

Azazael the **DeathBringer** is alive and well, and he hungers for revenge against the peaceful inhabitants of Mezron. Players take on the role of a barbarian hero in a race against evil, as the Barbarian and DeathBringer vie for the five powerful gems of Zator. The game takes you beyond a dungeon universe, into a region where you explore dark castles, hidden forests, forbidding towers and secret temples.

TV Sports: Football, a sports simulation, includes a 28-team league, a 16-game schedule and post-season playoffs. Each team has different offensive and defensive tendencies, so no two teams are alike. You can choose from a variety of offensive and defensive formations and plays, and no two plays will be executed in exactly the same way.

How About That!

NORTH HOLLYWOOD, CA—**Ante Up, The Basic 8 Graphics Translator**, translates 40-column GEOS, Koala, Doodle!, ComputerEyes and Print Shop graphics into 80-column Basic 8-compatible pictures. On-screen features include changing 80-column cell sizes and 40-column preview and comparison of the translations. Basic 8's functions let you change the color and cell size and flip and negate pictures and brushes.

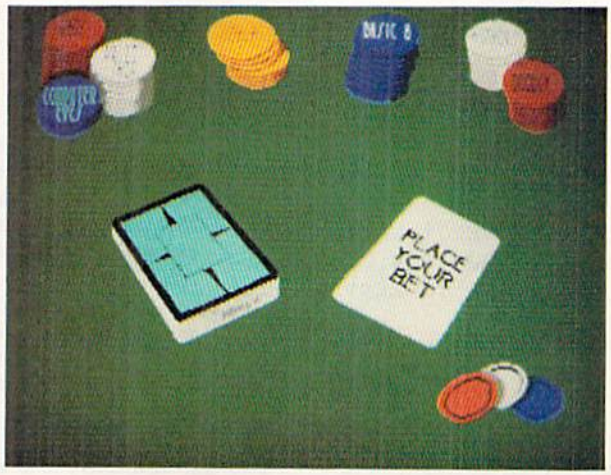

The package requires 64K of video RAM, and it's available for the C-128 for $19.95. Starfollower Productions, 4224 Bakman, Suite B, North Hollywood, CA 91602.

Check Reader Service number 404.

Stop Operation Big Brother

SAN MATEO, CA—**Empire**, a graphic war simulation for the C-64, has been released by Electronic Arts (1820 Gateway Drive, San Mateo, CA 94404). As William P. Brown, Captain of U.G.A.S. Britannia, you have been assigned to patrol the region of Alliance space and intercept as many Krellan vessels as possible. You must attempt to stop Operation Big Brother, a plan developed by the Krellan Empire to install its own generals as emperors on each of the planets of Alliance. The one- to three-player game between human and computer players has multiple difficulty levels and millions of different worlds. It's available for $39.95.

Check Reader Service number 401.

The graphics menu for Ante-Up lets you choose the 40-column graphics format pictures to convert into 80-column format.

Two Cartoon Games

GRANADA HILLS, CA—MicroIllusions (17408 Chatsworth St., Granada Hills, CA 91344) has released two Hanna-Barbera games for the C-64, priced at $34.95 each.

In **Jonny Quest and the Splinter of Heaven**, Jonny Quest and his team go to the jungles of Guatemala to investigate the mysterious disappearance of several Mayan artifacts.

Three mysteries are included in **Scooby Doo**: The Mystery of the Abominable Snowman, Aroka the Sea Monster and Daymen's Haunted Mansion. Played in a fully explorable 3-D world, evidence could be hidden anywhere, and your suspicions will be raised by talking with the many distinct characters. Some of the arcade sequences included in the game are downhill ski slalom, mountain climbing, cliff diving and snorkeling.

What, Me Worry?

CHICAGO—Americans worry more about their computers than they do about such social issues as AIDS, the homeless and child abuse, according to the findings reported by the Encyclopaedia Brittanica's Instant Research Service, which were based on an analysis of 172,000 inquiries received during 1989. Among the ten most requested reports were on selecting a personal computer, establishing a small business and ideas for making money at home.

Protect Your Pepperonis!

CHANDLER, AZ—In **Avoid the Noid**, an arcade game for the C-64, an eccentric millionaire has been waiting for years to get steaming hot pizza. But he won't budge from his home on the 30th floor of a dark, booby-trapped high-rise, infested with vicious Noids—beady-eyed creatures bred to search out and destroy pizzas. Your assignment, of

course, is to deliver the pizza intact to the millionaire. There are 30 floors of traps and surprises and nasty Noids, and each level increases in difficulty, with new sets of obstacles requiring different strategies and gameplay. It's available for $14.99 from ShareData, Inc., 7400 W. Detroit St., C-170, Chandler, AZ 85226.

Check Reader Service number 403.

TRIUMVIRATE

VIENNA, VA—Quantum Computer Services, which provides the QuantumLink telecommunications service to C-64 and C-128 users, has announced the election of **Alexander M. Haig, Jr.**, **Mark M. Edmiston** and **Harold D. Copperman** to its board of directors.

Currently, Haig is President of Worldwide Associates, Inc., a Washington, DC-based organization that assists public and private corporations in developing and implementing marketing and acquisition strategies.

Mark Edmiston is the Chairman and Chief Executive Officer of *The Cable Guide* magazine and founder of *Hippocrates Magazine*.

Harold Copperman is President and Chief Operating Officer of Commodore Business Machines, Inc., and former Vice President and General Manager at Apple Computers.

GENIE ADDS TWO ROUNDTABLES

ROCKVILLE, MD—GEnie Information Services (401 North Washington St., Rockville, MD 20850) has added two RoundTables to its telecommunications services for C-64 and C-128 users. The RoundTables are available by subscribing to the online service.

The **Hobby RoundTable** serves as an online forum for the discussion of hobby-related topics and as a library of hobby-related text files and programs. Some of the hobbies discussed include model aviation, model boating, radio-controlled cars, games and collectibles.

In the **Show Biz RoundTable**, subjects discussed include movies, Hollywood, television, soap operas, videotapes and disks, the theatre, home entertainment, technology and music.

A GEM OF A UTILITY DISK

MAITLAND, FL—JEM Software (1302 Druid Rd., Maitland, FL 32751) has released the **80-Column Application Program Disk** for the C-128. The package includes an income tracker to monitor your income and investments for preparation of estimated tax; a mortgage calculator that lists payments by month or year, in addition to payment number and loan status for each payment; Graphmaker 128, which lets you create bar graphs with up to 72 colored bars; and two disk utilities that let you examine disk files and lock or unlock disk files. The package is available on 3½- and 5¼-inch disks for $24.

MAIL RUN

Readers take issue with a former Commodore user, and RUN *shows how to stock your "Deep C-64 World" aquarium with exotic fish.*

How To Stock the Aquarium

I typed in the Aquarium program from the November 1989 issue of *RUN* (see "Deep C-64 World"). I used *RUN*'s Checksum program and got no errors, but when I ran the program, all I got on the screen was seaweed, water and sand—no fish! Did someone forget to stock the tank?

—Charles Bednarek
Elmira, NY

One look at the Aquarium listing you sent us revealed the problem. In the group of characters following DATA and the space after it in lines 1220–1620, you failed to include a space after the 20th character. Many readers called or wrote with the same problem, so you're not alone. To avoid confusion in future Data statements of this type, the two spaces between the 20-character groups will each be replaced with an asterisk.

—Editors

The Price Is Right

I have to agree with Gary Davidson's last statement. At your nearest clone dealer you can see a "whole new world of computing possibilities open before your eyes, with prices and features unmatched. . ." Yes, but they are twice the price of a complete C-64 system! By the way, many auto enthusiasts consider the Edsel, along with the Tucker and the DeLorean, as one of the best cars ever built.

—Roy L. Nash
Fort Meade, MD

Setting the Record Straight

It seems Gary Davidson has shown his total ignorance concerning the C-64/C-128 line. I suggest he look at your August 1989 issue for practical applications many Commodore users have for their machines (see "Sculptor, Lawyer, Editor-in-Chief"). As for productivity software, *RUN*'s article on the subject in the December 1989 issue (see "In Search of Productivity Software") shows once again that the C-64 and 128 are far more than machines for just playing games and turning on lawn sprinklers.

It's this closed-minded, misinformed thinking many IBM users like Mr. Davidson have that has turned me completely off on the whole IBM group. It seems that if you do not have one of "their" machines, you are not a serious user.

I do wonder if *they* drive Edsels!

—Scott Cheatham
Farmington, MO

Just a Kid at Heart

Mr. Davidson seems to be under the impression that computer games are played only by kids. On the contrary, many adults (myself included) play computer games for relaxation and enjoyment.

—Ben Vorhies
Vacaville, CA

So do we, Ben.

—Editors

He's Serious About Computing

In the Mail RUN department of the December issue of *RUN* (see "Commodore vs. The Clones," page 18), writer Gary Davidson says, "I've watched Commodore and magazines like yours constantly increase the promotion of games while the rest of the computer industry focused on more adult applications." In support of what Davidson wrote, I urge you to continue to devote an appreciable portion of your magazine to serious computing features.

—Loering M. Johnson
Tariffville, CT

Take a look at these serious computer applications from RUN*: "RUNbase 128," a database program, and "Money Manager" for the C-64 and C-128 (January 1990 issue); "Graphmaker," C-64 and C-128 (December 1989); "Label Base," a mailing label generator for the C-64/128 (August, 1989); plus over two dozen other application, graphics and utility programs published in* RUN *during 1989. And you can look forward to many more such programs in future issues in 1990.*

—Editors

Too Much Devoted to Games

I am not sure I understand Gary Davidson's reference to the Edsel, but I sure do understand his reasoning as to why Commodore is considered a lightweight. With so many articles and advertisements devoted to games, what other conclusion is possible?

—Richard L. West
Spring Valley, CA

As to advertising, we take all the appropriate ads we can get. It's unfortunately true that a great many of them are for games, but there's nothing we can do about that. As to articles, however, we wonder if you have us confused with some other magazine. In 1989, we published 71 feature articles. Of those, only 25 (35 percent) were games or game-related. Is that really out of proportion?

—Editors

Why, Indeed?

I couldn't believe what Gary Davidson wrote about Commodore computers and software in Mail RUN. He stated that he is an avid IBM PC user. Then why is he reading *RUN*?

—James Staff
Gray, GA

Guess he knows a good thing when he reads it.

—Editors

The Right Choice

Before I bought my C-64, I shopped around and found that it was the most affordable computer that did the things I needed of it. I currently run a small desktop publishing business and don't see the need for an upgrade in the foreseeable future. Sure, I play some games (as if IBM-cloners don't!), but I don't ►

use my C-64 to turn on the lawn sprinklers. It's too serious a machine for that.

—ALEX TISCHENKO
MATTYDALE, NY

SHE MEANS BUSINESS

I want to see more business programs for the C-128 in 80-Column mode. I'm mainly interested in spreadsheets and databases. If you can recommend commercial or public domain packages that are easy to use and can hold their own against software for high-priced computers, I'd appreciate it.

—JENNY ADAMS
HUNTSVILLE, AL

For a current roundup of productivity programs you can use, see the feature article in RUN's *December issue, "In Search of Productivity Software."*

—EDITORS

A GOOD THING TO HAVE

Steve Vander Ark's article on geoFont (geoWatch, *RUN*, November 1989) was very informative. However, the fact that his article doesn't include the Stash/Fetch option makes me wonder if his copy of FontPack Plus is an earlier version. Use of this option would eliminate one of the author's major complaints about the FontPack editor.

—ROBERT NELLIST
BROCKPORT, NY

You're right, Bob. Author Vander Ark's version does not include that option—something he told us he wished he'd had!

—EDITORS

CHANGE OF HEART

Until recently, I was considering letting my *RUN* subscription lapse. The magazine had lost 32 pages, and the columns I wanted to read were published only every other month. Combined with the amount of game-related content added over the last year, I felt that *RUN* was not the same magazine I had originally subscribed to.

I changed my mind when I received my "last" issue. I glanced through it, then started *reading*. I liked the 128 Mode column and intend to start typing in the RUNbase 128 database program (*RUN*, January 1990) as soon as I finish this letter. My renewal card will be mailed about the same time as this letter.

—MICHAEL D. MOFFIT
SWARTZ CREEK, MI

If you've read the editors' responses to other letters in this column, Michael, then you know the kinds of programs we have in store for 1990. Thanks for staying with RUN.

—EDITORS ■

CMS INVENTORY CONTROL 128 ..... A+

Inventory on Disk

Plus a Whole Lot More!

If you're a small-business owner, you know it's imperative to keep track of inventory. You must know how many "widgets" you have on hand, how many you've sold and how many are on order. CMS Inventory Control not only gives you that information, but also keeps track of sales and purchases, organizes your inventory items, produces dazzling reports and provides an optional Point-of-Sale system.

The Transaction option of CMS Inventory Control is where the most activity occurs (if you're not using the Point-of-Sale system). Here you record your purchases, orders, sales and returns, and adjust your balances to reflect the amount found during a physical inventory. After entering transactions, you can print, update or erase.

With the Inventory Maintenance option, you can add up to 1500 inventory items. Fifteen different fields are available, including item number, description, number sold during month-, quarter- and year-to-date, number on hand, retail price and average cost. Three features—find, search and totalize—let you do customized sorts.

You're probably wondering what you're going to get out of all the work entailed in putting your complete inventory on disk. Well, CMS Inventory doesn't disappoint when it comes to providing reports. You can print out price and file lists and sales analyses, low quantity and on-order reports.

Probably the most complicated part of this program is the Point-of-Sale option, which, however, you can use only if you have the CMS General Accounting System software. I think this is worth the extra expense and effort if you're a large-volume retailer or shipper. The invoices that the Point-of-Sale system can produce compare favorably with those created by a large mainframe system. You can enter ship-to addresses, carriers, salesperson codes, FOBs, payment terms, order numbers, back-ordered items, and even charges for items, such as labor, that aren't considered part of an inventory. Different tax codes and general-ledger account codes can be entered for each line item. Freight expense and finance charge codes are added prior to saving and printing the invoice.

If you've been looking for the right software for your inventory, you won't be disappointed by the features in CMS Inventory Control. The software is complete, easy to use and expandable. The manual is comprehensive, although possibly difficult for a beginner.

If you already use the CMS General Accounting System, you'll be quickly up and running on this inventory system. If not, the final results will be worth the time and effort necessary to set up both the General Accounting and Inventory Control module. Even as a stand-alone program, CMS Inventory Control is definitely a good value. *(CMS Software Systems, Inc., 2204 Camp David, Mesquite, TX 75149. C-128/$79.95.)*

REPORT CARD

A Superb!
An exceptional program that outshines all others.

B Good.
One of the better programs available in its category. A worthy addition to your software library.

C Average.
Lives up to its billing. No major hassles or disappointments here.

D Poor.
This program has some problems. There are better on the market.

E Failure.
Many problems; should be deep-sixed!

HOSTAGE ..... A–

Hone Your Hero Skills

To Help the Hostages

The greatest test of a law enforcement officer's intelligence and self-control is dealing with terrorists. Hostage is an action game that impressively re-creates the excitement of these highly dramatic encounters.

This software transforms you into the lieutenant leader of an elite assault force. By successfully completing the most difficult of five timed missions, you can earn a password that promotes you to captain. Success there brings the rank of commander and a chance to try the program's five hardest games.

Each mission has three stages. In the first, you guide three snipers to strategic locations overlooking a terrorist-occupied embassy. Your men must take evasive action to avoid hostile spotlights and gunfire.

The second stage begins with a helicopter dropping your other three team members on the embassy's roof. These men rappel down the side of the building and enter by crashing through windows.

The final stage of a mission takes place within the embassy, where you must search three floors and eliminate the constantly moving terrorists.

At the end of most games, the program displays a newspaper article that assesses your performance. A mission is successful if you kill all the terrorists or free all their captives without losing any assault team members.

Some elements of the software are less appealing than others. For instance, although it is beautifully programmed, a mission's first stage will probably be less entertaining than its later sections; however, an option that lets you replay ►

a game's end can make this potential shortcoming far less irksome.

The confusing up and down signs on certain stairways is a minor aggravation. In addition, you'll probably have trouble using your gun effectively during your first gaming sessions; but this difficulty should disappear with practice.

Nevertheless, the software's positive features more than make up for any potential problems. Its graphics, for example, are tremendous, as are the animation and sound.

You're a dead man if you get caught in Hostage's spotlight.

But as good as they are, these sensory effects take a back seat to the gameplay. The search of the embassy's corridors and rooms is filled with exhilarating tension. And learning the most effective use of all six members of your strike team challenges both arcade and tactical abilities.

Due to all its outstanding features, Hostage is highly recommended for those who are seeking a gaming experience that is both original and skillfully executed. *(Mindscape, Inc., 3444 Dundee Rd., Northbrook, IL 60062. C-64/$29.95.)*

—WALT LATOCHA
OAK PARK, IL

WINDWALKER ..... B+

Fantasy Role-Playing + Martial Arts + Combat Adventure = Challenge

This sequel to Origin's Moebius calls upon you to once again save the mystical realm of Khantun. The Emperor, Chao Ti, overthrown by his power-hungry warlord Zhurong, must be restored to his throne.

By talking to the villagers you meet, you'll learn most of what you need to know to start on your quest. You'll also find that if your honor becomes tainted, the villagers become less cooperative and even the merchants refuse to do business with you.

By no means is everyone in Khantun friendly—knife-wielding thieves and shuriken-throwing assassins lurk everywhere. Although it's damaging to your honor to attack first, you should be prepared to defend yourself when attacked. If you're successful, your enemy usually drops something of value (money or food) as he flees.

Windwalker's martial arts combat system is much better than that of Moebius. The figures are larger and the animation is faster and more life-like. A new range of movements, including cartwheels, handsprings and back kicks, have been added. Successfully landed blows are no longer "beeps"—they've been replaced by digitized screams and groans.

Windwalker's graphics are also much improved and give the game a unique look. Instead of numerical values for character traits, Windwalker displays an abacus with rows of sliding beads to represent Body, Spirit, Honor and Karma. Trees, boats and other graphic elements have been carefully drawn in an oriental style that maintains the Eastern flavor of the game. In addition, Windwalker's control system has been enhanced.

Although I recommend Windwalker, I must warn you that it gives disk drives quite a workout. One other positive note is that the game comes with a nicely designed manual that provides you with plenty of useful information—in particular, a bibliography of the books on Oriental culture and philosophy that the designers consulted during the creation of the game. *(Origin Systems, 136-B Harvey Rd., Londonderry, NH 03053. C-64/$39.95.)*

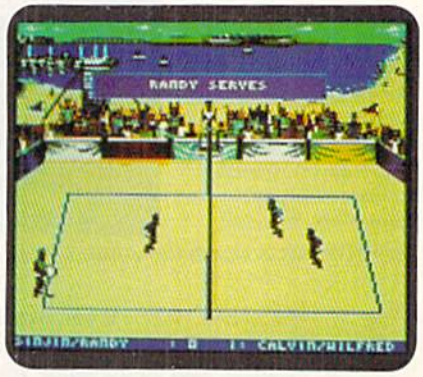

—BOB GUERRA
CHARLESTOWN, MA

KINGS OF THE BEACH ..... B

Practice Those Spikes Or You'll Have Sand Kicked in Your Face!

Kings of the Beach is a two-on-two volleyball simulation in which you can play against the computer or a friend, or by teaming up with a friend in a cooperative effort against the computer. Play consists mainly of moving your character into position and pressing the firebutton to hit the ball. Double-clicking the joystick button can be used to block your opponents' spikes at the net or to spike the ball yourself on the third hit.

You can choose from three different serves and three skill levels, even the simplest of which can be challenging, especially until you perfect your timing. One thing that makes the game easier is the way your player automatically moves toward the ball when it's nearby. He'll even dive on his own when its slightly out of reach. Another help is the way your player always hits the ball appropriately for the situation. For example, he'll always set teammates up for a spike on the second hit, and the third always heads over the net.

One, two and. . .spike it! in Kings of the Beach.

You can play Kings of the Beach one game at a time or in Tournament mode (several matches against increasingly difficult opponents in places like San Diego, Hawaii, Rio de Janeiro and Australia).

While the look and sound of the game probably won't win any awards, the designers did add some nice animated touches to liven it up, such as occasional high-fives after successful volleys, brushing off sand after a point-saving dive and arguing a close line call in hopes of intimidating the ref into changing his decision.

Like a lot of sports simulations, Kings of the Beach is most enjoyable when played against a friend. There's also something particularly rewarding about working together with someone to beat a tough team of computer challengers.

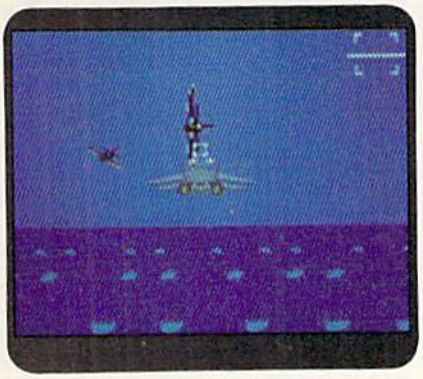

Although Kings of the Beach isn't the most exciting sports simulation I've ever played, beach volleyball fans will find that it accurately captures the spirit and action of the game. *(Electronic Arts, 1820 Gateway Drive, San Mateo, CA 94404. C-64/$29.95.)*

—BOB GUERRA
CHARLESTOWN, MA

AFTER BURNER ..... B

Dip, Turn, Roll!
Take Control and Feel
The Power!

Experience the thrill of flight in this aerial combat game. Your screen reveals the backside of your supersonic jet, an F-14 Thunder Cat, as you maneuver it

Are you ready to attempt aerial stunts in After Burner?

through the sky and attack the enemy. Wheeling and dipping over the ground like a crazed bat, you shoot down planes in a dogfight that lasts day and night.

The Thunder Cat's movement is joystick controlled: bank, dive, climb, fire lasers and launch heat-seeking missiles. For a dizzying effect, try nailing the enemy while flying upside down in a barrel roll—the sky spins around you like a ferris wheel. The graphics lack the airbrush detail of a Walt Disney film, but the program's smooth animation creates a strong feeling of forward movement.

After Burner's choreography of aerial events is vivid and convincing: Your laser fire converges in front of you, missiles grow larger as they approach, and the horizon tilts when you turn.

In spite of the good animation, there are several limitations. For instance, you can't flip over backwards or soar above a certain level. In addition, the program won't let you fly upside down continuously, although you can perform rollovers that are quite spectacular. Finally, ground markings appear bland and unchanging as they slip under you, lulling you into a stupor that could send you into a crash dive. (Take heart—the airborne pyrotechnics will wake you up!)

After Burner's plot can be summed up as "Go!! Dodge!! Shoot!!" You'll participate in breakneck action, increasing difficulty levels and refueling maneuvers.

You'd better lie down after the game, for motion sickness may persist. When you close your eyes, you'll "see" the airfield coming at you, topsy-turvy. Next time, carry an air-sickness bag! *(Sega; distributed by Mindscape, 3444 Dundee Rd., Northbrook, IL 60062. C-64/ $34.95.)*

—JOHN DIPRETE
CRANSTON, RI

DOWNHILL CHALLENGE ..... B–

Tuck, Turn, Swoosh and Fly—
The Powder's Great,
So Give It a Try

Downhill Challenge's packaging promises "the ultimate computer ski experience." However, like the sport it simulates, this software includes a few "bumps."

Three of the events in the program have beginning, advanced and expert difficulty levels. These contests reward speed and, to varying degrees, precise maneuvers. In the downhill event, you hurtle over a mountain course, whose widely scattered control gates discourage too high a velocity. In contrast, the slalom competition has many more gates and is the software's toughest test of agility. The giant slalom event is a hybrid of the first two contests, with fewer gates than the slalom and more than the downhill.

Differing markedly from the other events is ski jumping. This has you soar into space and score points both for distance and style.

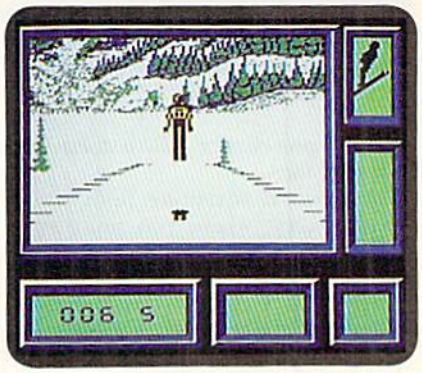

Downhill Challenge offers a Training option that lets one player practice any of the events. There's also a Competition mode where up to six players make two runs through all four contests, while the computer tracks each performance.

Unfortunately, some documentation problems mar the program. The package, for example, incorrectly indicates that the ski jump has multiple skill levels and that a joystick is unnecessary. Also, the skimpy two-page instruction manual doesn't describe the events and even lacks an explanation of how style points are earned.

In addition, the software suffers from some relatively long loading times, even when an accelerator cartridge is used. For instance, reaching the ski jump screen can take almost 40 seconds, which is more than twice the time needed for the event itself. However, the program lets you avoid some dead time in the Training mode by pressing the joystick forward at an event's end; this immediately brings you back to the beginning of the contest.

All of the software's shortcomings are largely offset by a fluid control system and excellent graphics. Together with some beautifully programmed animation, they create a convincing illusion of swooshing along at breakneck speeds.

All in all, Downhill Challenge has much to recommend it. Fans of winter sports who are willing to endure the

Are you prepared for landing in Downhill Challenge's ski jump event?

"rough spots" should enjoy testing their mettle against the events in this program. *(Broderbund Software, Inc., 17 Paul Drive, San Rafael, CA 94903. C-64/ $19.95.)*

—WALT LATOCHA
OAK PARK, IL

SAVAGE ..... C+

Survive Demon Attacks
And Monster Traps

This three-part action game goes a long way toward disproving the axiom "the whole is equal to the sum of its parts." While each segment of Savage includes excellent features, two of which are moderately entertaining, the trio lacks cohesion.

The first game plays like a Barbarian clone. On the first leg of your journey to rescue a fair maiden, you, as the axe-hurling Savage, traverse horizontally scrolling castle dungeons. Survival requires defeating endless hordes of mutant monsters, evading traps and jumping over fire pits.

Contact with the enemy costs you energy, but you can acquire extra strength or special weapons by defeating certain assailants. After completing this part, you're provided with the password needed to begin the second challenge with the maximum number of lives (three). Otherwise, the program gives ►

You must defeat those monsters to rescue the fair maiden in Savage.

you only one chance, which doesn't get you very far.

The second adventure finds you in Death Valley, where you must avoid waves of monoliths while you try to shoot flying ghosts and skulls. In this screen, you view your surroundings through Savage's eyes. The forward scrolling, 3-D visuals are reminiscent of older, first-person-perspective games—but without any noticeable improvement in graphics, sound quality or game play.

After inputting a second password, you gain full access to the last screen, which puts you back in a different section of the castle. As Savage's trusty eagle, your chore is to evade pitfalls, fly past evil creatures and eliminate enemies by firing shots from your beak.

Individually, parts one and three work well. In both cases, game play is fast and varied, joystick control responsive, graphics striking and special effects impressive. In addition, Savage boasts a relatively sophisticated, and appropriately eerie, musical score. After a few listenings, however, you'll probably find the music grating and opt to toggle the sound effects instead.

Although a detailed background narrative appears in the documentation, other essential information is missing. For example, there's no mention of many on-screen objects or descriptions of their uses.

The plot summary is the vehicle that links the games together—little else suggests unity among the three. Storylines differ dramatically, and the leading character appears only in the first segment. Each part has its own title screen, keyboard and joystick commands and scoring system.

As a single entity, Savage is a disappointment. Taken individually, games one and three are worth considering because of their technical excellence and non-stop action. *Medalist International, 180 Lakefront Drive, Hunt Valley, MD 21030. C-64/$29.95.)*

—LEN POGGIALI
SYRACUSE, NY

TANK ATTACK C

Battle Away on Screen or Board

The invasion is on! As Calderon's tank commander, you and your Sarapanian ally launch an assault upon the heavy armor of Kazaldis and Armania. Expert maneuvering of your forces and outgunning your opponents both help your cause, but they don't necessarily ensure victory. A third element—dumb luck—counts just as much in determining the outcome of this multi-player computer board game.

Each of the program's two to four players portrays a tank commander who represents at least one of four fictional countries. Either alone or with a neighboring ally, you must capture the headquarters of the one or two nations opposing you. There are five variations in all.

Much of the contest is planned and resolved on a game board on which you, your allies and foes maneuver three varieties of tanks and two types of armored cars. The computer screen is generally divided into three parts. Displayed in the status panel are the number of moves allotted your country during the current turn, and the number of units active, under repair or being rebuilt. From the communications and options panel, you receive messages and view tank battles. Decisions to move a unit or to fire upon an enemy are made from the command panel. Before each new day, weather forecasts, battle reports, loss and damage information and political news fill the screen.

To fire upon an enemy, your forces must be no more than four hexes away. After inputting the range and choosing the attacking and defending units, both vehicles appear on screen. Each unit fires, and then the results are calculated, based on distance, relative firepower, weather, and so on. The graphic portrayals of these one-on-one encounters lack variety, but are fun to watch.

Tank Attack is such a simple game, it's surprising that there isn't a single-player option, and that the game map and unit movement features aren't resident in memory. Conversely, the computer does so little that it could be quite easily replaced by dice, a pad and pencil and a statistical chart for determining battle results.

Lacking a computer opponent and relying heavily on board-game trappings, Tank Attack provides only moderate value for its price tag. *(Artworx, Inc., 1844 Penfield Rd., Penfield, NY 14526. C-64/$24.95.)*

—LEN POGGIALI
SYRACUSE, NY

RAMBO III ..... B+

Let's face it: Rambo's no slouch in the killing department. Not even Rocky Balboa could kayo this very Grim Reaper. Familiar with the silver-screen Rambo, I was fearful that the computer adaptation of his latest bloodbath would cause my Commodore to explode.

However, the plot is simple: Your macho warrior must rescue his buddy, Colonel Trautman, from Soviet torturers. (What happened to Perestroika?) To aid you on your mission, you must find and pick up various articles. You can also register such things on your inventory-panel display.

Your joystick controls Rambo's every action—passing through doors, shooting bullets and knocking down guards, for example. An overhead view shows a playing field many times larger than the computer screen, but Rambo moves smoothly into adjacent scenarios. However, you need to keep a map diary to avoid retracing your steps each time.

As Rambo, you pilot a helicopter and hijack a Soviet tank in your desperate bid for freedom. Being no stranger to violence, you kick and claw your way to victory, deposit bombs at enemy posts and defeat an army.

Graphics keep the action respectably crisp—no more shocking than your average on-screen bloodletting. Joystick jocks will love the game's easy handling and nonstop adventure. *(Taito Software, Inc., 267 West Esplanade, North Vancouver, British Columbia, Canada V7M 1A5. C-64/$29.95.)*

—JOHN DIPRETE

BATMAN ..... B+

While others have sought to combine the "feel" of comic books with the "look" of action/arcade games (e.g., Accolade's Comics and Paragon's Dr. Doom's Revenge), Data East's Batman completely sheds his comic book origins and jumps headlong into the fast-paced world of arcade gaming.

You can go up against the Penguin

(who is plotting to take over the world) or tackle the Joker (who has kidnapped Bat's junior partner, Robin). The Penguin's trail takes you from the Batcave to the streets and rooftops of Gotham City, while the search for Robin and the Joker takes you into the bowels of the city's sewer system.

Along the way, Batman must locate various important items—a gas mask, flashlights, keys, food, batarangs, grenades and the like. Hint: if you attempt to access an item, and it doesn't work, you're in the wrong room. Another tip is to try each item in various places throughout the game. For example, the fake nose disguises Batman and makes him invisible to the thugs chasing him, while the sneakers make him run faster. Likewise, the bat ears augment hearing, and food increases strength.

This product should appeal to two sets of fans: arcaders who've never opened a comic, and comic fans who own a computer. Perhaps the only way in which Batman comes up short is that it doesn't include the comic book in the package. *(Data East USA, Inc., 470 Needles Drive, San Jose, CA 95112. C-64/$24.95.)*

—BOB SODARO

FIREPOWER ..... B

The name of this game is to penetrate enemy defenses, capture their flag and return it to home base. Firepower features a large scrollable map and player versus computer or player versus player matchups. You get a crisp spy satellite view of your tank, buildings, roads, walls, turret-mounted guns, trees, and so on, plus status data and a radar insert. Single players have just five tanks (i.e., lives) to complete the mission. In the two-person/two-joystick version, the screen is split to supply independent displays, and each player gets unlimited tanks.

Predictably (as an adaptation from the Amiga), the game includes some elements that have little or no impact upon play. For example, rescuing friendly troops, blasting enemy buildings and blowing away helicopters all boost your score—but scores aren't saved and don't determine who wins. You knock out enemy helicopters and turrets because they're shooting at you; you blow up fuel depots to get fuel; and you blast holes in walls and buildings because they're in your way. Finally, you play the game because, with smooth animation, decent sound and miles of hazard-packed real estate, it's loads of fun!

For one player, Firepower represents a mediocre challenge. The game really crunches into high gear when it's one armored monster against another. Do you defend or "go all out" for the flag? Run or aim for a High Noon-style shootout? Factor in random home-base flag placement, and the scenario possibilities are endless. Grab someone, hand him the other stick, and get set for a strategy action-gaming feast! *(MicroIllusions; distributed by Mediagenic, 3885 Bohannon Drive, Menlo Park, CA 94025. C-64/$24.95.)*

—JEFF HURLBURT ■

MAVERICK ™ V4

PLEASE Don't Call Us The Best Copy Utility On The Market!

We've always been known as the best Commodore copy utility made. But that label just doesn't fit us anymore. Because Maverick is so much more than just a copy utility. Over its life span, Maverick has evolved into a total software management system capable of extending the abilities of your Commodore computer well beyond its original capacity.

Maverick V4 continues the evolutionary process that is transforming our original copy program into a series of dedicated modules, each component created by a master programmer, each designed to deal with a specialized task. The result is a program that creates an entire software management environment of which backing up protected software is only one part. Software Support, the company that has always pushed the Commodore further that it was ever designed to go, is proud to present Maverick V4. We've added several important new features and many dramatic enhancements to the Maverick platform. For example:

- RAMBOard™ NYBBLER: A MAJOR leap forward in protected backup capabilities, our exclusive new nybbler works with our own RAMBOard to AUTOMATICALLY shred some of the toughest protection schemes ever created! This combination of ingenious hardware and superb new software can handle many protection schemes that are untouchable with conventional nybblers alone.
- RAMBOard GCR TRACK EDITOR: This new feature, found ONLY in Maverick V4, works with RAMBOard to allow you to read, write, and even edit whole tracks at a time!
- 1581 SINGLE OR DUAL DRIVE FAST DATA COPIER: Now backup your data disks faster than ever before with your 1581 drive! 1764/1750 RAM expansion and 64K video RAM are supported!
- FILE, TRACK, & SECTOR TRACER: Identify, view, and edit any sector in any program file-fast!
- HIGH SPEED SEQUENTIAL FILE VIEWERS: Now you can view or print sequential files WITHOUT having to load the application that created those files! For example, view PaperClip™ files without waiting for PaperClip to load. File Viewers are the current rage in the IBM world -Software Support brings this advanced feature to your Commodore with the new Maverick V4!
- ENHANCED DIRECTORY EDITOR: Works with the 1541, the 1571, and now supports the 1581 disk drive! The ultimate tool for organizing your disks!
- ENHANCED TRACK & SECTOR EDITOR: Works with the 1541, the 1571 (in true double sided format), and now supports the 1581 disk drive!
- ENHANCED SECTOR MAP EDITOR: Now supports the true double sided format of the 1571 disk drive!
- ENHANCED PARAMETER MENU: Now supports two drives!
- ENHANCED BYTE PATTERN SCANNER: Perform high speed searches on 1541 disks and, now with true double sided format support, 1571 disks.
- MORE ALL-NEW PARAMETERS: Maverick V4 now includes over 450 parameters that either copy or entirely break the potentially destructive protection schemes of the world's newest and finest programs! Our parameters have always been the strongest on the market but, with our exclusive RAMBOard support, now they're more powerful than ever!

A turntable is just one component of a complete stereo system. And a copier, even the best one made, is just one module of a complete software management system. From this point on, we won't settle for just being known as having the best copier on the market. Once you see Maverick V4, you'll understand why.

THE NEW MAVERICK V4 - ONLY $34.95
NOW INCLUDES PARAMETER MODULES 1-7

ADDITIONAL MAVERICK V4 FEATURES

- REU support in Maverick's major modules
- 64K video RAM support in many modules
- Automatic directory recovery utility for damaged disks
- GEOS™ 2.0 64/128 1581 boot disk transfer utility
- 1541/1571/1581 fast file copier -any direction
- State of the art single or dual drive GCR nybbler
- GCR editor for the experienced hacker
- GEOS™ Parameters & Tools module
- GEOS™ desktop accessible file copier
- GEOS™ desktop accessible sector editor
- Error scanner with unique sector editor
- Single or dual drive high speed data copier
- Scrolling M/L monitor with DriveMon
- Works with ALL Commodore 64/128 computers in the 64 mode
- Extensive documentation included - over 50 pages.
- AND OUR FAMOUS SSI EXPERT TECHNICAL SUPPORT!

Attention Registered Maverick Owners: You may upgrade to the new V4

$9.95

Parameter Module #7 is also available

$9.95

(Includes Modules 2 through 7)

Say Hello To The Newest Member Of The Family!

THE GEOS COMPANION

Introducing the ultimate collection of GEOS creativity tools...and a whole lot more! With The GEOS COMPANION, you'll be a master of music, animation, games, clip art, utilities and more! As with all GEOS software products, the eye-catching icon-based interface is a breeze to learn and easy to use!

A Dynamite Personality!

The GEOS COMPANION is the best GEOS accessory ever published. And it's no wonder, when you discover all the top-notch creativity and productivity tools The GEOS COMPANION has to offer!

■ **GeoAnimator.** Create your own animations with this innovative graphics program, the only one of its kind! Try it! It's fun!

■ **GeoBach.** Compose your own hit songs or generate fantastic sound effects with this master musicmaker.

■ **GeoMusicPlayer.** This easy-to-use music player program lets you play the music files you've created with Geo Bach.

■ **Geos Utilities.** Get the most from GEOS with such powerful utility programs as Pattern Editor 2.0, File Merge, 1581 BootMaker, Autoloader and Batch File Copier.

■ **GEOS Games.** Includes the classic Breakout game in 3-D format, plus a challenging Master-Mind-like game that'll entertain the entire family.

■ **Clip Art.** Noted GEOS designer Susan Lamb has compiled her best collection of dozens of holiday and special occasion images for you to use in your cards, newsletters, memos, etc. Just cut, paste, and publish!

■ **PLUS!** A new assortment of distinctive fonts!

■ **Documentation book included!**

Distinguished Ancestry!

The GEOS COMPANION is the third in a series of fine GEOS accessories published by RUN Magazine, giving you total confidence in the quality and usefulness of The GEOS COMPANION. Plus, it is completely compatible with all GEOS software products. And perhaps best of all, The GEOS COMPANION is designed to work on both the C64 and C128.

Attractive Price!

The GEOS COMPANION comes with a modest price tag...just $24.97. And remember, as with all of RUN's software, your purchase is fully guaranteed for 30 days if you're not satisfied!

ORDER TODAY!

Ordering The GEOS COMPANION is almost as easy as using it! To get your copy, use this handy coupon or call 1-800-343-0728 and place your credit card order.

☐ **YES!** Send me The GEOS COMPANION for just $24.97!

☐ Check enclosed (make checks payable to RUN Magazine.)

Learn to troubleshoot and service today's computer systems as you build a fully AT-compatible micro, complete with 1 meg RAM and powerful 20 meg hard drive

NEW! Now includes AT-compatible computer!

Your NRI computer training includes all this: • NRI's unique Discovery Lab® for circuit design and diagnosis • NRI's hand-held digital multimeter featuring "talk-you-through" instructions on audio cassette • A digital logic probe that lets you visually examine computer circuits • The new AT-compatible West Coast 1010 ES computer with 80286 CPU, 101-key "intelligent" keyboard, 1.2 meg, 5¼" high-density floppy disk drive, 1 meg RAM (expandable to 4 meg), 64K ROM, a 20 meg hard disk drive • Bundled software including MS-DOS, GW-BASIC, word processing, spreadsheet, and database programs • Reference manuals with programming guidelines and schematics

Train the NRI Way—and Earn Good Money Servicing Any Brand of Computer

Jobs for computer service technicians will almost double in the next 10 years according to Department of Labor statistics, making computer service one of the top 10 growth fields in the nation.

Now you can cash in on this exciting opportunity—either as a full-time industry technician or in a computer service business of your own—once you've mastered electronics and computers the NRI way.

NRI's practical combination of "reason-why" theory and hands-on building skills starts you with the fundamentals of electronics, then guides you through more sophisticated circuitry all the way up to the latest advances in computer technology. You even learn to program in BASIC and machine language, the essential language for troubleshooting and repair.

Get Real-World Skills as You Train With a Powerful AT-Compatible Micro—Now With 20 Meg Hard Drive!

To give you hands-on training with the absolute in state-of-the-art computer technology, NRI includes the powerful new West Coast 1010 ES computer as the centerpiece of your training. As you assemble this fully IBM AT-compatible micro from the keyboard up, you actually see for yourself how every section of your computer works.

You assemble and test your computer's "intelligent" keyboard, install the power supply and 1.2 meg, 5¼" floppy disk drive, then interface the high-resolution monitor. But that's not all.

Your hands-on training continues as you install a powerful 20 megabyte hard disk drive—today's most-wanted computer peripheral—now included in your course to dramatically increase the data storage capacity of your computer while giving you lightning-quick data access. Plus you work with exclusive word processing, database, and spreadsheet software, yours to use for your own professional and personal applications.

As you build your computer, performing key demonstrations and experiments at each stage of assembly, you get the confidence-building, real-world experience you need to work with, troubleshoot, and service today's most widely used computer systems.

No Experience Needed, NRI Builds It In

This is the kind of practical, hands-on experience that makes you uniquely prepared to take advantage of today's opportunities in computer service. You learn at your own convenience in your own home. No classroom pressures, no night school, no need to quit your present job until you're ready to make your move. And all throughout your training, you've got the full support of your personal NRI instructor and the NRI technical staff, always ready to answer your questions and help you whenever you need it.

FREE 100-Page Catalog Tells More

Send today for NRI's big, 100-page, full-color catalog that describes every aspect of NRI's innovative computer training, as well as hands-on training in robotics, video/audio servicing, electronic music technology, security electronics, telecommunications, and other growing high-tech career fields. If the coupon is missing, write to: NRI School of Electronics, McGraw-Hill Continuing Education Center, 4401 Connecticut Avenue, NW, Washington, DC 20008.

Sailing the Commodore Seas

Whether you're a new hand or a seasoned salt, you can drop anchor to explore a variety of applications.

By ELLEN RULE

Your Commodore can do a lot more than play games. In addition to its entertainment value, your C-64 or C-128 can perform a wide variety of interesting and useful tasks—so many, in fact, that you may find the possibilities overwhelming. This article will help you decide which to pursue and how best to get started.

All Hands on Deck

The basis of a Commodore computing system is the C-64, C-128 or C-128D. You can get by with connecting your computer to a TV, but I recommend a monitor to best utilize the outstanding color and graphics capabilities that these computers offer. Two choices for the C-64 are the Commodore 1702 and the 1802, the latter with a monochrome option some users prefer for word processing. To take advantage of the C-128's 80-Column mode, there are the 1902, 1902A and 2002 monitors. Commodore's latest monitor, the 1084S, can accommodate both the C-64 and C-128.

To get started, you also need a disk drive—a 1541 for your C-64 or a 1571 for your C-128. The 128D comes with a built-in 1571 disk drive. If you plan on storing a lot of data with a word processor, spreadsheet or database, then consider adding a second drive. In this case, the 3½-inch 1581, with a storage capacity of over 800K per disk, is a good choice to increase speed and cut down on disk swapping.

If you intend to play games on your Commodore, a good joystick is also a virtual necessity. See the February 1989 issue of *RUN* for a roundup of the hottest joysticks available.

Rigging Your Ship

Many users soon find that they need a printer to print out the results of their work. You can purchase either a so-called Commodore-compatible machine, which connects directly to your computer, or a non-Commodore printer, which allows greater flexibility in output but requires a hardware accessory called a parallel interface. See "Making an Impression with Printers" in the November 1989 issue of *RUN* for a survey of the latest in low-end printers.

Other optional peripherals you may eventually consider are a modem, such as the Commodore 1670, for telecommunications, and a memory expander to add speed and storage capacity to your system. Commodore's memory expanders include the 256K-capacity 1764 for the C-64 and the 128K 1700 and 512K 1750 for the C-128.

Setting Sail

All this hardware is virtually useless without software. To get programs, you can purchase commercial software, type in program listings from *RUN* or other magazines, download them from telecommunications bulletin boards or services, or, once you develop the art of programming, write your own.

If you plan to buy, the sources are many. RUN Works and the RUN Starter Pak include excellent word proc- ►

essing, database and spreadsheet software. You can also buy both individual programs and integrated packages (whose programs can swap data with one another without complicated conversion) from software stores and mail order houses. Public domain programs, released by the author for free copying and distribution, are available via modem from local bulletin board systems (BBSs) and the commercial telecommunication services such as QuantumLink, GEnie and American PeopleLink.

Now that you have an idea of *where* to find software, the next question is *which* programs should you get, and what can you accomplish with them?

Word Processors

With a word processor, such as Fontmaster from Xetec, The Write Stuff from Busy Bee and the venerable RUN Script that's available on the RUN Works and RUN Starter Pak disks, you can write letters home, compose term papers or produce articles for a club newsletter much more easily than on a typewriter. Use the cut-and-paste function to move sentences and whole paragraphs around, and the search-and-replace function to substitute one word or phrase for another throughout your document. Call on the spelling checker to proof your work, and the WYSIWYG (what you see is what you get) features to make your text bold, italic, underlined, centered or arranged in columns. Make changes and print your document as many times as needed to get it just right—without ever retyping the page!

Record your family history, keep a journal, publish your recipe collection or print out return-address labels or change-of-address cards. Or use a word processor to take the tedium out of menu planning or preparing grocery or chore lists. With an integrated package, such as the Digital Superpak from Digital Solutions or the GEOS line from Berkeley Softworks, you can "merge" data from the database into the word processor to churn out form letters or mailing labels.

Figure 1. Peripherals utilized by Commodore users.

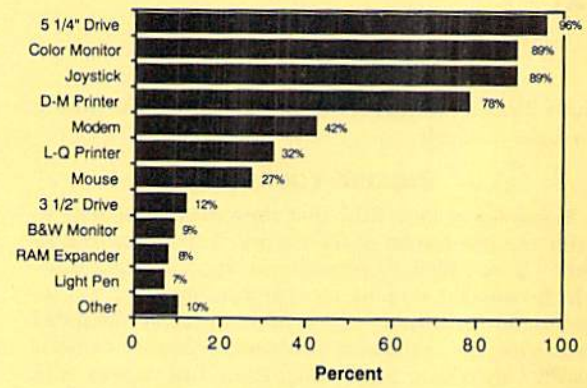

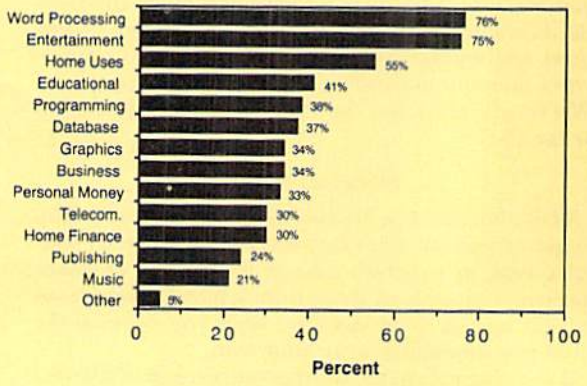

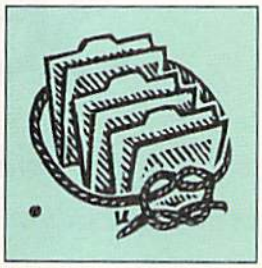

Figure 2. Applications employed by Commodore users.

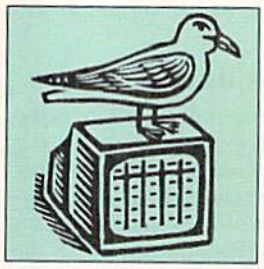

Source: *RUN* reader survey, May 1989.

Databases

Database programs such as Digital Solutions' Pocket Filer, Timeworks' Data Manager, Berkeley's geoFile and Datafile 3.6 from *RUN*'s Productivity Pak II are used to manage information, letting you store items, then search for and sort them at the press of a key. With a database, you can keep track of addresses and birthdays of friends and acquaintances, maintain health records for your family and pets, or print out phone lists. Use it to track your collection of video movies, stamps or baseball cards; then keep a second file of items that you don't yet have and carry a printout list with you, so that a fantastic opportunity doesn't slip by! Or employ the database's math functions to keep a household inventory for insurance purposes.

Spreadsheets

Berkeley Softworks' geoCalc and Timeworks' Swiftcalc are examples of spreadsheets that can help you manage your checkbook, budget and taxes. Think of a spreadsheet as an electronic page of columnar paper into which you can plug numbers, labels and formulas. With its extensive math capabilities, you can calculate team scores and averages, keep tabs on auto expenses and mileage, track your family's video game scores, manage your paper route, or keep a running average of school grades. With study, spreadsheet software can be used for small-business functions, such as keeping a general ledger and producing invoices.

Specialized financial packages, such as Sylvia Porter's Personal Finance, and Money Manager from RUN Works, make it easy to maintain budget or checkbook records, since the formulas and math functions are already worked out and built into the program. Other specialized financial packages for the Commodore include Abacus's Technical Analysis System for stock portfolio management; Great American Software's Dome Accounting by Computer; and Timeworks' Swiftax, which guides you through income tax preparation.

Graphics

Among the top graphics programs for the Commodore are Rainbird's OCP Art Studio, Crystal Rose's Doodle! and the popular RUN Paint from RUN Works. Such art programs allow you a wide range of creativity, from splashy op-art fingerpainting to finely detailed masterpieces. Select your paint color or fill pattern, adjust your brush size, and create free-hand lines or fixed geometric shapes.

Your original art work can be added to video title displays, printed out on a color or black-and-white printer, transferred to T-shirts or uploaded by modem to a BBS for viewing by others. With specialized graphics software, such as Unison World's PrintMaster, you can create banners, cards, posters and calendars, while Springboard's Certificate Maker and its ilk will help you recognize the achievements of friends, fellow students or officemates.

Desktop Publishing

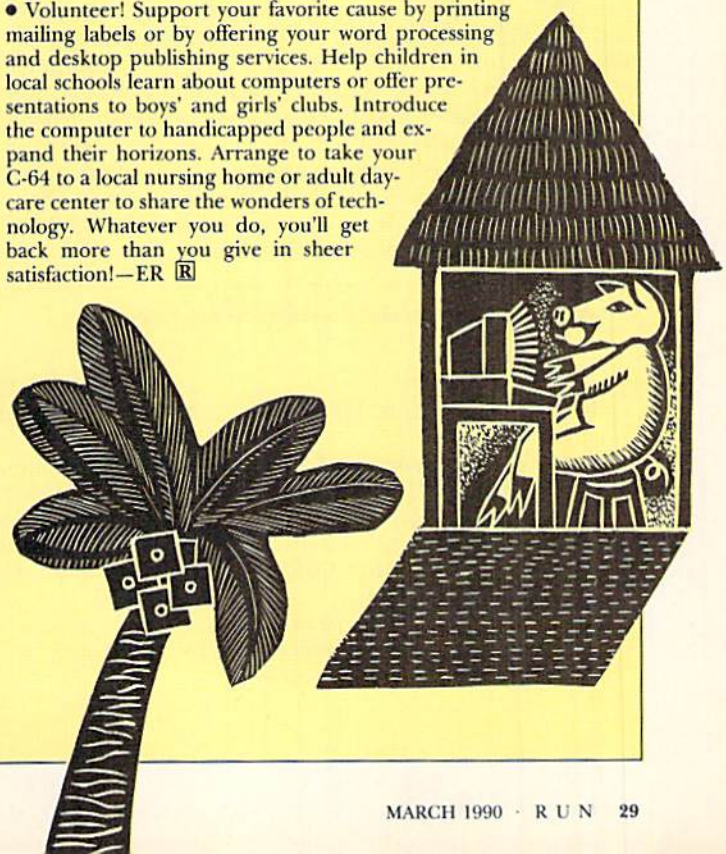

Desktop publishing programs combine text files from a word processor with computer graphics to produce illustrated documents. My favorites are Berkeley's geoPublish, Electronic Arts' PaperClip Publisher and Springboard's Newsroom, but any of these specialized tools will let you design and print out newsletters for your club or school, a business presentation, a membership directory for your professional association, and much more.

Use Digital Visions' ComputerEyes hardware with your desktop publisher to digitize photos or original art work to ►

Keeping the Wind in Your Sails

LIKE ANYTHING ELSE, the world of computing can get to be humdrum and routine if you let it. How can you keep the spark alive? Here are some suggestions.

- Getting the best return from your investment (the time, energy and money you've spent in building and learning about your system) may involve thinking creatively about using the computer as a tool. Sure, the spreadsheet does a great job tracking your checkbook, but what else might you do with it?
- Mix computing with your other hobbies. Your non-computing activities can be enhanced when you use your computer to track information, publish worksheets or spice up documents with graphics. Always think: "Could this be done better on my Commodore computer?"
- Join and *participate* in a local user's group. Use your word processing or desktop publishing skills to help with the newsletter, membership lists or publicity notices. Demonstrate your favorite software and hardware at club meetings. Share your knowledge with other members—you'll be amazed by how much you know and how much you can learn!
- No time to attend computer club meetings? Newsletters produced by "through the mail" user's groups let you swap information, sell or trade equipment, and get or give computing assistance.
- Get your group on other clubs' mailing lists and trade newsletters.
- Interact with other users on local BBSs or commercial networks. Telecommunicating is a great way to stimulate your mind and spark your interest on a wide variety of topics.
- Chat with the personnel at your local software/hardware store. Your Commodore retailer can be a source of up-to-date information on the market. Many vendors let you try before you buy, and some offer deals on used software and equipment.
- Attend computer shows held by local user's groups, or, if you're fortunate enough to live close by, check out bigger shows such as World of Commodore.
- Glean information from reference books on programming (try the guide that came bundled with your computer), languages (Jim Butterfield's *Machine Language for the Commodore 64, 128 and Other Commodore Computers*), GEOS, desktop publishing, computing hints (*Lou Sander's Tips and Tricks*), gaming (Shay Addams' *Quest for Clues*) and unusual computer uses (Dan Gutman's *I Didn't Know You Could Do That with a Computer!*).
- Reviews and articles in Commodore-specific magazines like *RUN* provide valuable information about software and computer use. Specialized publications like *Twin Cities 128*, *geoWorld* and your club's newsletter address particular Commodore-related topics.
- Volunteer! Support your favorite cause by printing mailing labels or by offering your word processing and desktop publishing services. Help children in local schools learn about computers or offer presentations to boys' and girls' clubs. Introduce the computer to handicapped people and expand their horizons. Arrange to take your C-64 to a local nursing home or adult day-care center to share the wonders of technology. Whatever you do, you'll get back more than you give in sheer satisfaction!—ER Ⓡ

include in a family reunion newsletter or on greeting cards. Create ads or flyers for the school play or your commerce organization's trade fair. Business cards or graphic labels can be fashioned with a desktop publisher by carefully spacing and repeating a design.

Education

The C-64 has been used extensively in education, so there's a wealth of educational software available for it. For example, learn German, French, Russian, Italian or Spanish with Artworx's Linkwords. Then tour the world with Broderbund's Where in the World Is Carmen Sandiego? Conduct scientific investigations, without any danger or mess, with Simon and Schuster's Chem Lab, or practice to improve your typing skills with The Software Toolworks' Mavis Beacon Teaches Typing.

Spinnaker's Kids on Keys teaches typing to the younger set, and spelling and vocabulary drill are disguised as an adventure game in Timeworks' Cave of the Word Wizard. A favorite of mine, Weekly Reader's StickyBear Series, entertains while coaching math, reading and spelling.

Music

On your Commodore computer, you can compose, record and replay music for your own enjoyment or to share with friends. With software such as Electronic Arts' Instant Music or Music Construction Set, your computer becomes a keyboard on which to create your own tunes. You can also enjoy other people's digital compositions through software such as Strider's Computer Classics (Free Spirit) or by downloading them from an online service. Addition of a MIDI (*m*usical *i*nstrument-*di*gital) interface and accompanying software would let your Commodore communicate with MIDI-compatible musical instruments.

Telecommunications

With a modem and telecommunications software, you can access commercial online services and public bulletin board systems—gateways to encyclopedic databases, stock market information, airline reservations, contact with thousands of other Commodore users, and much more. You might find yourself discussing computing or noncomputing topics with experts in real-time forums. Depending on the bulletin board, there may be special sections for posting notices or downloading (receiving) and uploading (sending) public domain software.

Try uploading your own creations—programs, art, music—as long as you realize they'll be freely distributed. To do this, you need a terminal program, and there are excellent ones available, both commercially and in the public domain. Examples include BobsTerm Pro from Progressive Peripherals, RUN Term from RUN Works, geoTerm from RUN's GEOS Power Pak, and the specialized QuantumLink software. Just make sure that the software you get is compatible with your modem.

In Summary

You now have enough information, including product suggestions, to start exploring the Commodore seas. Keep in mind that your friends, computer club members and people you "chat" with over your modem will all have many opinions on what software and hardware is best to get. Proceed with good consumerism in mind, taking a look at the products in action if you can, and reading reviews in your favorite Commodore magazine.

Caveat

Not all the products mentioned in this article are available from the manufacturer. When they are not, check user's groups, used merchandise ads, software discount houses and mail order companies to find them. ■

Ellen Rule, one of RUN*'s contributing editors, is an active user's group member who also operates a home-based business, Home Computer Resource. By profession, she is a psychiatric R.N.*

Accomplish more. . . in less time with the power and versatility of the ReRUN Disk

Useful Applications

- Word Processing
- Telecommunications
- Utilities
- Music
- Finance
- Databases
- Graphics
- Entertainment, and more . . .

All year long, ReRUN disks bring you pre-tested, high quality, ready-to-run programs for your business, home, and educational computing needs.

Save Time

No need to spend your time entering lengthy program listings from the magazine. ReRUN disks are ready to load and run. No typing. No trouble.

Each bimonthly ReRUN disk offers popular programs from two issues of *RUN* magazine. Programs designed specifically for your Commodore 64 or 128.*

Added Bonus

Plus you get **BONUS programs never before published . . . plus hints and tips from the popular Magic column . . . and a documentation booklet with each disk.**

ReRUN saves you money and time by increasing your computing productivity. For example, in previous issues ReRUN has helped our subscribers . . .

- ✓ write more effective letters and reports with our efficient low-cost word processor
- ✓ enhance the image of business presentations with eye-catching graphics
- ✓ manage your expenses, keep track of accounts, calculate the future effects of your present financial moves
- ✓ break the memory barrier. . . create a RAM disk by using the RAM expansion module for your C-128
- ✓ create documents with double-sided pages and columns of text
- ✓ print banners, signs, and mailing labels
- ✓ help your kids with their math and spelling
- ✓ and enjoy our challenging, exciting ReRUN games.

You can order ReRUN disks individually at $16.47 each, but for maximum savings sign up for one year and receive all six ReRUN disks and documentation booklets for only $69.97. You save almost $5 per disk!

To place your order immediately, call our Toll-Free number

Colorout

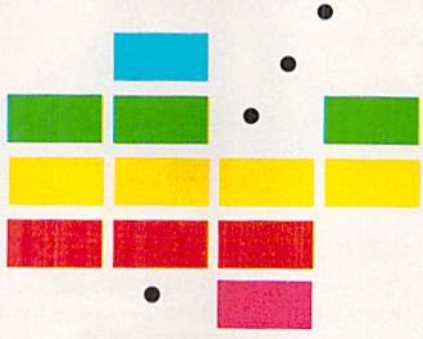

Fight the battle of the bricks, and the wall comes tumbling down.

By THOMAS CZARNECKI

Even if your name isn't Joshua, here's a chance to get rid of some frustration by knocking down some walls. Colorout is a fast-paced one-person game for the C-64 that challenges you to knock as many bricks as possible out of a brightly colored, six-course wall.

The missiles you use are ten high-speed balls, kept in play with a movable paddle you control with a joystick in port 2 or the comma and period keys on the keyboard. The wall stretches across the screen, the balls come at it from below, and the paddle moves back and forth along the bottom of the screen.

To serve a ball, press the joystick fire-button or the keyboard space bar. To double the speed of the paddle, hold the firebutton or space bar down. Try putting a little english on the ball or bouncing it off the end of the paddle to send it where you want. If you miss a

ball, you lose it off the bottom of the screen. Appropriate sound effects add to the fun of the game.

At first, action is slow, but it speeds up with each new screen of bricks. Also, a ball usually takes out only the first brick it hits on the way up, but if you break through the wall and bounce balls off the "ceiling," they take out every brick they pass coming down.

Each brick you knock out adds five times the number of its course (layer) to your score. In other words, bricks in the bottom course are worth 5 points, those in the second course 10 points, and so on. Your score so far in the game, your highest score for the session and the number of the current ball are shown at the top of the screen at all times.

A game is over when you've used up all ten balls. To play again, press the restore key.

Colorout is a combination Basic and machine language program. Type in Listing 1, using *RUN*'s Checksum program to catch typing errors, and then save it to disk. After saving it, run it to create Colorout. When you're ready to play, load and run Colorout like any Basic program. R

Thomas Czarnecki, a game-playing enthusiast, has been working with computers and programming for some dozen years.

Running Instructions: **Type in Listing 1, save it and run it to create Colorout. To play, load and run Colorout like any Basic program.**

GET MORE PLEASURE FROM THE BIBLE WITH **LANDMARK**

The Computer Reference Bible

Here's what LANDMARK will enable you to do:

- ✔ SEARCH THE BIBLE--Find Phrases, words or sentences.
- ✔ DEVELOP TOPICAL FILES—Copy from The Bible text and search results then add your own comments and notes.
- ✔ COMPILE YOUR PERSONAL BIBLE— Outline texts in color. Add notes, comments, and references. Make your Bible Study organized and on permament record!
- ✔ CREATE FILES— Then convert them for use with wordprocessors like Paperclip and GEOS.
- ✔ MAKE SUPPLEMENTARY STUDY FILES—For specific study and develop translation variations.

KJV or NIV ($10.00 royalty charge for NIV)
$119.95 plus $4.00 shipping in cont. U.S.A. $7.50 Canada
BOTH versions for $189.95 plus $10.00 NIV royalty plus shipping
v1.2 for **C64** and v2.0 for **C128**

Speedy Viewer

Call on this quick and easy utility to check the contents of files on a disk.

By HOWARD I. GOLDMAN

Like most Commodore users, you probably have several disks filled with text files that you need to view from time to time. Of course, it's easy to access sequential files from Basic with that quick-and-dirty one-liner:

```
10 OPEN 5,8,5,"0:filename":FOR J=0 TO
   1:GET#5,A$:PRINT A$;:J=ST:
   NEXT:CLOSE 5
```

But Basic is slow and doesn't word-wrap at the end of lines.

SpeedViewer is a small machine language utility that overcomes these limitations and allows you to examine both sequential and program text files quickly and with the convenience of word-wrap. It's menu-driven and can be loaded and saved like a Basic program.

Type in Listing 1, using *RUN*'s Checksum program to catch any typing errors, and save it to disk with the name SPEEDVIEWER.GEN. Then run it to generate the actual SpeedViewer program on your disk. Finally, to use SpeedViewer, just load and run it.

SpeedViewer's menu provides five options, the first two of which let you choose program or sequential file format, respectively. All word processors save text files in one of these formats. After pressing 1 or 2, enter the name of the file you want, and it will start scrolling on the screen. If you decide not to view a file, press the return key at the filename prompt, and the menu will reappear.

SpeedViewer scrolls files too fast to read, but you can press the space bar to pause the display, then press it again to continue. You can also abort the display and return to the menu by pressing the run-stop key.

Note that some word processors achieve their word-wrapping by padding out lines with extra spaces. If these spaces have been saved to disk with the file, they won't confuse SpeedViewer, but they may result in a strange-looking display.

Option 3 displays a disk directory. As in the viewer modes, pressing the space bar toggles the pause feature, while pressing run-stop brings back the menu.

Option 4 lets you delete a file from the disk. Just enter the filename at the prompt, or, to abort the operation, press return without entering a filename.

Use option 5 to exit SpeedViewer and return to Basic. R

Howard Goldman has been programming on the C-64 for five years, having taught himself both Basic and assembly language.

Running Instructions: **Type in Listing 1 and save it to disk with the filename "SPEEDVIEWER.GEN". Run it to create the SpeedViewer program on disk. Then load and run SpeedViewer.**

Listing 1. SpeedViewer.Gen program. (Available on March–April ReRUN disk. See binder card at page 32.)

VIDEO BYTE II the only FULL COLOR! video digitizer for the C-64, C-128

Introducing the world's first **FULL COLOR!** video digitizer for the Commodore C-64, 64-C, C-128, & 128-D computer. **VIDEO BYTE** can give you digitized video from your V.C.R., LASER DISK, B/W or COLOR CAMERA or OFF THE AIR or CABLE VIDEO (thanks to a fast! 2.2 sec. scan time). New version 3.0 software features full **RE-DISPLAY** with **MULTI CAPTURE MODE, BUILTIN PRINTING MODE, EXPANDED COLORIZING MODE, FREEZE COLOR** feature and much, much more!

FULL COLORIZING! Is possible, due to a unique SELECT and INSERT color process, where you can select one of 15 COLORS and insert that color into one of 4 GRAY SCALES. This process will give you over 32,000 different color combinations to use in your video pictures.
SAVES as KOALAS! Video Byte II allows you to save all your pictures to disk as FULL COLOR KOALA'S. After which (using Koala or suitable program) you can go in and redraw or color your V.B. pic's.
LOAD, DISPLAY & PRINT Video Byte II allows you to load, display & print all **VIDEO BYTE or KOALA** pictures from Video Byte's menu.
MENU DRIVEN! Video Byte II comes with easy to use menu driven UTILITY DISK with V3.0 video digitizer program. (64 MODE ONLY).
COMPACT! Video Byte II is compact! In fact no bigger than most cartridges! VB II **(plugs into MODEM PORT)** comes with 3' cable.
INTEGRATED! Video Byte II is designed to be used with or without EXPLODE! V5.0 color cartridge. Explode! V5.0's menu will return you to VIDEO BYTE II's menu. EXPLODE! V5 is the **PERFECT COMPANION!** AT ONLY **$44.95** or W/DISABLE SWITCH **$49.95.**
FREE! Video Byte II users are automatically sent **FREE SOFTWARE** updates along with new documentation, when it becomes available.
PRINT! Video Byte II will printout **VB or KOALA pictures** in 4 GRAY SCALE to most printers. However when used with Explode! V5.0 your printout's can be done in FULL COLOR 8 by 11's SIDEWAYS on the **RAINBOW NX - 1000, RAINBOW NX - 1000 C, JX - 80, Seikosha 3000 AI. (OKIDATA 10/20's (print larger 6" by 9")**

ONLY $79.95

USER SLIDE SHOW program w/auto or manual display is standard with VIDEO BYTE program. And can be backed up! Why DRAW a car, airplane, person or for that matter . . . anything when you can **BYTE it. . . VIDEO BYTE it instead!**

All units come w/90 day WARRANTY. All orders add $3 for UPS BLUE LABEL S/H. UPS BLUE available only in 48 states. FOREIGN ORDERS are US FUNDS +$6.35 S/H. ORDER BOTH EXPLODE! V5 & VIDEO BYTE II together and receive FREE!! UPS S/H. ***Note all SALES are FINAL, 90 DAY WARRANTY covers PARTS & LABOR ONLY. All SOFT GROUP UTILITY DISKS COME w/built-in CATALOG of PRODUCTS.

*IN 64 MODE ONLY **TO ORDER CALL 1-708-851-6667** IL RESIDENTS ADD 6% SALES TAX PLUS $3.00 S/H. NO C.O.D'S. FOREIGN ORDERS U.S. FUNDS ONLY $6.35 S/H. Personal Checks 10 Days to Clear

Print a Month!

Get yourself organized in 1990 with monthly calendar printouts filled with your own important reminders.

By JARED REYNOLDS

If your family or organization plans activities well in advance, you can save time and frustration in scheduling by using Print-a-Month, a C-64 program that prints out monthly calendars filled in with your own reminders. I wrote the program to help my soccer coach keep track of two teams he was coaching at one time, and now my Scout troop is using it to schedule outings and other events.

Print-a-Month provides space for six entries for every date in the month. By saving your calendars to disk, you can use them as planning guides for the following year's activities.

Type in the program from Listing 1, using *RUN*'s Checksum program to catch any typing errors. You also need to customize line 1360 to work with your printer. Variables CPI17$, FFEED$ and RESET$ in that line specify Condensed mode (17 characters per inch), form feed and printer reset (initialize), respectively. Place the appropriate numbers from your printer manual into these variables using CHR$ codes.

In addition, you may need to precede some commands with the escape code CHR$(27) and place your printer interface in Transparent mode. When you've finished customizing Print-a-Month, save it to disk.

Creating and Editing

Print-a-Month works through the menu shown in Table 1. When you select Option 1 to start a new calendar, the program displays a message telling you that if you continue, all of the notes in memory will be erased. If you wish to proceed anyway, enter Y at the prompt; otherwise, enter N, which will return you to the menu.

Assuming that you proceed, the program asks you to enter a month and year separated by a comma, such as 1,1990. The calendar display that appears is headed by the month and year, so you can make sure you entered the numbers correctly. If everything's okay, enter Y to return to the menu.

Option 2 lets you add and edit up to six notes for individual days. Enter the ►

```

 WINTER CAMPOUT
```

RUN it right: **C-64; printer**

day you want, then enter up to 18 characters into the first note line for the date, omitting colons, commas and quotes. After you're done, press the return key to move to the next line. Pressing return at the sixth line brings you back to the calendar to choose another date. Pressing return at the calendar without entering a new date brings you back to the menu.

To view your notes without editing them, select Option 3 and press the cursor-right and -left keys to scroll from date to date.

To print out your calendar, select Option 4. The program then checks to make sure you want to continue, and, if you press Y, it proceeds to send the calendar to your printer.

Option 5 lets you load a previously saved calendar so you can update or print it.

Table 1. The Print-a-Month menu.

Start a New Calendar
Add/Edit Notes on Calendar
View Notes on Calendar
Print Calendar
Load Calendar
Save Calendar
Quit

Save your calendar to disk with Option 6. The notes currently in memory will be saved in a format that Print-a-Month recognizes, so you can load the calendar by merely entering the month and year. You should be aware that saving a calendar will replace one that may have been previously saved for the same month; so if you want to save a second calendar for any month, you must use a second disk.

Print-a-Month is written completely in Basic, so you can see how it works. Lines 1460–1480 calculate the day of the week on which the selected month begins.

Lines 840–860 and 1210–1230 set up the notes in memory in a format the program can use for printing and saving. The Save and Load options both check the drive for any errors that may occur during data transfer. Ⓡ

Jared Reynolds is currently a junior in high school, where he's involved in a course that teaches C and Pascal. He began to teach himself Basic on a C-64 in 1982.

Running Instructions: **Type in Listing 1, using *RUN*'s Checksum, and save a copy to disk before running it.**

Listing 1. Print-a-Month program. (Available on March–April ReRUN disk. See binder card at page 32.)

Color Me Quick

With this ingenious little program in memory, you can make screen-color changes by tapping one key.

By STEVEN GREGG

A friend of mine, who programs strictly in Basic, once asked me to write a routine that would give him instantaneous control over the screen, border and text colors of his monitor display. The program had to use only three keys, be totally compatible with Basic and not slow down a running program. As if that weren't enough, it needed to be a short routine. Seems like a pretty tall order? Not really—not for machine language, anyway. That's exactly the type of job machine language does best.

Sixty times per second the C-64 interrupts a running program to check for keypresses, update the system clock, and do other "housekeeping" chores. Screen Color Interrupt (SCI, for short) works by diverting the interrupt routine slightly. If, during the interrupt, the computer detects that F3, F5 or F7 has been pressed, it changes the background, border or text color, respectively, to the next color on the C-64 palette. Press the key again, and the color changes again with nary a hint of hesitation in the program that's running.

The program in Listing 1 is actually a Basic loader that pokes the machine language SCI into memory beginning at 49152 ($C000). The program then remains active until the computer is turned off. It will deactivate if you press run-stop/restore, but can be reactivated with SYS 49152. The machine language is a scant 131 bytes long, leaving ample room for other programs.

SCI can run as a stand-alone program, but it's really meant to be incorporated into other programs. To use SCI with your own program, include a Gosub to SCI's first line in your code. Then, to return execution to your program, replace the END in SCI's third line with RETURN. The Gosub call to SCI should be located at the beginning of your program, where it will be run only once.

If you need the F3, F5 and F7 keys for other functions in your program, you can alter SCI by pressing another key in conjunction with a function key. Just replace the last 0 in line 60 with the value you want from Table 1 in SCI's REM statements. For example, if you replaced the 0 with 2, the screen would change color when you pressed F3, F5 or F7 along with the Commodore logo key.

The values in the second REM statement table assign the function keys to SCI use. A value is given for F1, in case you'd like to use F1, F3 and F5 instead of F3, F5 and F7. By all means, leave the REM statements in the program.

When you type in Screen Color Interrupt, be sure to use *RUN*'s Checksum program to detect any typing errors. Once it's on disk, you can slip it into your own programs for the screen colors you want—when you want them! Ⓡ

Steven Gregg's primary interest in programming on the C-64 is "unraveling the mysteries of machine language."

Running Instructions: **Type in Listing 1, using *RUN*'s Checksum, save it to disk and run it to activate Screen Color Interrupt.**

Listing 1. Screen Color Interrupt program. (Available on March–April ReRUN disk. See binder card at page 32.)

SAVE! Over ½ OFF an AUTOMATIC PRO

for your IBM or Compatible, Tandy,

QUIKPRO+II comes complete in its own vinyl storage binder, with 80 page manual and disk ready to use.

To Computer Users,

Now you can tell your computer what you want and your computer can write your programs for you in minutes to your custom design—easily and without requiring any programming background from you. . . with QUIKPRO+II.

A Breakthrough In Micro Computer Technology

You know your computer is fantastically fast. . . once it knows what to do. Programs and software are what makes it happen. Every task your computer performs for you requires some kind of program. Until now, you could only get programs in just one of two ways: buy a canned package that many times doesn't meet your needs or hand over hundreds or thousands of dollars for a custom programming job. Now, you have a better choice. . .

Programs Without Programming

Automatic programming is what it's all about. And, with QUIKPRO+II the Automatic Program Writer, your computer can actually write programs for you. You can quickly generate a new individual application program when you want it with QUIKPRO+II . Each program you create is a completely stand alone program that will run in the standard BASIC language you already have on your own computer.

Best of all, **you do not have to become a programmer** to use QUIKPRO+II. The QUIKPRO+II software becomes your personal programmer, waiting to do your work for you any time of the day or night you choose to use it.

How To Get Over ½ Off

Like all successful software QUIKPRO+II was originally sold for well over $100 per copy, and we have sold thousands. So why are we willing to let you buy at less than half price?. . . because our tests prove that at $29.50 we sell over ten times as many. Obviously this cuts our costs because of the huge volume, so **we pass all savings directly to you.**

So, ORDER Now. Call Toll-Free 24 Hours or Mail in your Order. This offer is limited to those computer types listed on the Special Discount Order Form.

APPLICATION CHECKLIST

Here are a few of the thousands of possible applications you can do with QUIKPRO+II. . . And most can be created in a few minutes.

BUSINESS USES
Customer Filing
Master Files for General Ledgers
Accts. Receiv.
Accts. Payable
Telephone Logs
Telephone Lists
Hotel/Travel/Data Reservations
Property Control
Library Catalogues
Inventories
Key Employee Data

EDUCATIONAL USES
Student Records
Grade Records
Teacher Lists
School Lists
Program Design
Course Design
Tuition Data
Enrollment Data
Property/Equipment
Athletic Schedules
Player Statistics
Test Scores
Menus

HOME & HOBBY USES
Personal Records
Check Lists
Club Rosters
Telephone Directories
Recipe Files
Medical Information
Insurance Records
Tax Records
Christmas Gift Lists
Deposit Files
Due Dates
Mortgage Data
Travel Records

Not to mention the unlimited number of general filing, and crossfiling, technical and scientific uses.

d get QUIKPRO + II GRAM WRITER

TRS-80 or Apple Computers.

The All-In-One Program

The custom programs you can generate from the new QUIKPRO + II will let you perform Personal Filing, Fast Data Retrieval, including Changes, Deletions and Searches. You can selectively Print Custom Letters, all kinds of forms (if you have a printer). This new feature is called **Free Form Reporting**. You can even include calculations in the programs you create. QUIKPRO + II is perfect for creating inventory programs. You can use QUIKPRO + II to prepare letters and selectively address the letters to only certain people. And of course you can **SORT** your reports so that they print out information in the order that you want it, or print out only certain information. In fact, you can actually use QUIKPRO + II to create an easy to use Data management program or a simple spread sheet. You can do all of this and more with this All In One Program . . . and the best part is that **you need no BASIC programming experience**.

How Does It Work?

You can do it simply by answering easy questions that appear on your screen. You won't have to learn any Computer commands or special Programming Lanuages. Instantly the QUIKPRO + II software instructs the computer to write efficient error free, BASIC Programs and puts the **Programs right onto your own disk, ready for you to use**.

The resulting custom program is truly a separate BASIC program. You can list it. You can modify it. You can customize it to you own liking. You can actually see what makes it tick.

What People Say About QP Software

From a GENERAL CONTRACTOR/CONSTRUCTION COMPANY owner:

*"The program seems to be good and I must compliment you on the documentation. It is the **best** of its kind that I have seen."*

From an INSURANCE AGENCY MANAGER:

*"I would like to compliment you on . . . **an excellent** . . . **program.**"*

From a HOBBYIST USER out in Oklahoma:

"I thought I would drop a quick note about QUIKPRO. I have it running and it ***will do*** *what I bought it for. I am very pleased with it . . ."*

This from a Vice-President of a Federal Savings & Loan:

*"In the past several weeks, I have used QUIKPRO software on four **different** programs. I am pleased with the results achieved so far. With your help over the telephone, I have created an /ISI file for a **large** data file that was **already** in existence, and the data file now works with an input program created by QUIKPRO."*

Proven and Widely Used

128 Mode

The C-128 is no longer in production, but the king of Commodore computing lives on.

By MARK JORDAN

COMMODORE'S DECISION TO stop making the C-128 has certainly seemed like bad news for us 128 users. After all, over the past decade most computers that have been discontinued have slipped out of the limelight. I'm thinking of the diminutive Timex Sinclair, the Bill Cosby-promoted TI/99-4A, the hacker-friendly Atari 400/800 series, the techie crowd's TRS-80, and even great IBM's colossal mistake, the PC jr. If you were watching, shortly after manufacture stopped on those machines, they lost coverage in the computing press, software manufacturers fled from them, and eventually they started appearing at porch sales, alongside Nehru jackets and old Gary Lewis and the Playboys albums.

That's bad! And if I were the worrying type, I'd be worried now. But I'm not the worrying type, at least when it comes to the C-128, and neither should you be. The C-128 is not ready for porch sales, and I guarantee it—for several reasons.

First, the C-128 is two computers, not one. Never forget that inside your 128's housing lives a C-64, and Commodore is *not* stopping production on the C-64. That means at least half (and some would say far more) of the machine you own is still active in the marketplace. That's not just good—it's excellent!

Just consider, more than seven million C-64s have been sold, a good percentage of those are still in daily use, and software companies continue to make C-64 programs. Rare is the game that doesn't appear in a 64 version, and many games are released *first* for the 64. Also, magazines devoted to the C-64 (and C-128) are still alive and kicking.

I can hear the wails already: "But we want C-128 programs!" So do I. But it's important for C-128 owners to remember the primary reason for choosing a 128 over a 64 in the first place: to run 80-column productivity programs while retaining compatibility with the wealth of software available for the 64. Those 80-column spreadsheets, databases and word processors arrived almost immediately after the 128 came out, and they're good. Meanwhile, entertainment and education programs have continued to flourish for 64 mode. Even if not a single new title is released for 128 mode, the C-128 is still a hard deal to beat, because it does everything it's supposed to.

The second reason not to worry is a happy parallel in the computer industry: the Apple II family. Although certain members of that family are no longer being made, the fact that the IIgs and IIc are still coming off the line keeps the Apple II family intact. Believe me, as a schoolteacher I know that many of those early, primitive Apples are still burning up electrons. Shouldn't the C-128, which is more, rather than less, powerful than its still-being-made brother, follow suit? You bet!

Want a third reason? How about the fact that over four million C-128's have been sold, and to active users. C-128 owners are the cream of the Commodore computing crop. They've written hundreds of public domain programs, and, by sheer nagging force, they got Berkeley Softworks to put out a C-128 version of GEOS. They also support a grassroots 128-specific magazine, *Twin Cities 128*, a 128-specific disk magazine, *LoadStar 128*, and *RUN*'s own 128 programs, both in the magazine and on the ReRUN disks. This is not a dying crowd of people.

Finally, the C-128 is simply a marvelous machine. It has Basic 7.0, a tinkerer's—as well as a pro's—delight. It has a built-in machine language monitor for tweaking at an even more advanced level. It can run CP/M, something I still haven't had time to play with. It has a video display chip with still-untapped potential. The keyboard is excellent, the operating system works like a charm, and the hardware is very reliable. In fact, one of the main reasons Commodore elected to stop production on the C-128 instead of the C-64 is that the 128 is more expensive to make; it's a loaded piece of equipment.

Someday the C-128 will meet its Celestial Maker, but that day hasn't come. Until the advent of the next quantum leap in computer technology (I'm talking laser-everything), your venerable, friendly, all-purpose C-128 will serve you well. Long live the king! ■

Mark Jordan, a high school English teacher by profession, has been programming Commodore computers since 1983.

ILLUSTRATED BY ROB COLVIN

GOLD MINE

Here are the keys to unlock the secrets in your games.

By LOUIS F. SANDER

4 × 4 OFF ROAD RACING: On the four courses where you must concern yourself with fuel, it's best to carry seven extra cans of gas. You won't run out of fuel while you're still on the course.

—VICTOR R. HEREDIA
EL PASO, TX

ARCADE GAME CONSTRUCTION KIT: I like to keep a little scrapbook of sprites taped to paper. I get the sprites from magazines and various programs, and with them I can make sequels to the game they originated in.

Also, I like to combine one game's scenery blocks and environment with another game's sprites. Once I made "Gerg's Quest" by combining Labyrinth Master and Gerg's game.

—JEFF LUNGER
LANSDALE, PA

ARKANOID II: Are you a frustrated "Arkaholic"? Well, here's a way to get an infinite number of paddles to juggle balls with. First, load and play a game. When it ends, enter DEBBIE S into the high score table. (Don't forget the space before the S). The border will turn blue, and you will have your infinitude of paddles.

—RANDY MURPHY
BRONX, NY

THE BARD'S TALE III: To beat Lucencia, gather one of each kind of rose located outside the city, then go to Violet Mountain and kill the rainbow dragon. Get the crystal key and gather some of the dragon's blood in a wineskin.

Next, go to Cyanis's Tower and get the magic triangle from Cyanis. Go to the bush that doesn't have any roses, and dump the dragon's blood on the bush. Get the rainbow rose from this bush.

Go to Alliria's Tomb. Find your way to 16 North and 7 East, and ring the triangle to crumble the wall. On the second level, give each of the guardians the rose that she wants. After all the roses have been given out, including the rainbow rose, seek out Alliria, the Belt of Alliria, and the Crown of Truth.

—BRIAN STEPHENS
MOGADORE, OH

BUBBLE BOBBLE: On level 13, use the water to wipe out the sharks in the heart. You'll get a very good score.

—ALVIN MAH
MAPLE RIDGE, B.C., CANADA

CARD SHARKS: When you have read a question and have to guess how many people gave the same answer to that question, the instructions tell you to use the up-and-down cursor key to change the numbers by one. You can also use the left-and-right cursor key to change the numbers by ten.

—DAVID M. JORDAN
BUDINGEN, WEST GERMANY

CONTRA: When you get to the waterfall, bend down and start shooting. There's a machine gun nest on the other side of it. Blow it up, then flip up the waterfall's cliffs two times. Wait until the man on the bridge passes, then flip three times and wait for the next man to pass. Flip some more and fire your weapon to destroy the gun nest above.

In the Alien's Lair, destroy the two side guns, then destroy the huge gun by firing at its corner. The next level's easy, so you'll soon be on the last one.

Defeat all the men and the guns, but watch out for electric shocks. Get the Barrier and run as fast as you can. When you get to the heart, fire straight up to destroy it and win the game.

—JON BELOF
POMPTON PLAINS, NJ

THE GAMES: SUMMER EDITION: To get the maximum score in Diving takes three different maneuvers, each perfectly executed. Five 10s are possible if you do it right. It's important to move the diving wheel as close to the diver (far right) as possible.

To get the most points in Springboard Diving, do as many back somersaults as you can before entering the water. My best score is 294.

When competing against the computer in Velodrome Cycling, draft behind the computer cyclist. Use as little energy as possible in the early stages of the race. Begin your sprint after the final corner before the bell lap. If you follow this method and have fast hands, you might beat my record of 7.25 seconds.

—RICK HUBERT
TELL CITY, IN

INDIANA JONES AND THE LAST CRUSADE: When you are on the last level, memorize the first set of letters you jump across. When you get to the next set of letters, jump onto those letters you memorized from the first set. Otherwise, you'll fall off.

—CLAY MCNICHOLS
METROPOLIS, IL

JORDAN VS. BIRD: Before the computer makes his move on offense, get directly in front of him. If he charges straight into you, pull back on your joystick. He'll be called for a charging foul, and you'll get the ball.

When the computer has scored and the screen is changing to give you the ball, push your joystick to the right. After you start to run and get to the curve in the three-point line, push diagonally up to the right. When you're almost to the end of the three-point line, drive on the computer. You will beat him to the basket and get an easy slam.

In the three-point contest, you can shoot from anywhere on the court, as long as it's behind the three-point line. After you shoot, keep pressing your button while the ball is in the air. As soon as it hits or misses, you can shoot again.

Finally, to see a demonstration game, just put both men on Computer mode and the computer will play itself.

—BILLY FRASER
DAMARISCOTTA, ME

NEUROMANCER: You can get your UXB for free by going to Shin's Pawn Shop and telling him that you have no money. Shin really doesn't want the deck lying around, so he will give it to you for free, without even taking your pawn ticket.

At Asano Computing, you can get Asano to lower his prices by as much as $8000. Ask him why Crazy Edo calls him a pig, then insult Crazy Edo.

To get into Freeside's Bank of Gemeinschaft, use the security code BG1066. The only thing in there is a cyberspace jack that will jack you into sector 5.

To get Comlink 6.0, enter Toxoku Imports with 5.0, link code YAKUZA and password YAK. You can then upload 6.0 to Hosaka for $7500.

Here's how to open an account with the Bank of Zurich: Link up with 6.0 using BOZOBANK as the link code. Use the sequencer to gain access to level one. Open an account and deposit the minimum amount. Write down your account number, since you'll need it later.

You can avoid paying high jail fines by depositing all your money in the PAX machine. The next time you're arrested, tell the lawyer to "Put a sock on it." When the judge asks how you plea, ask "Does it matter?" He will sentence you to death, and you'll be resurrected at the Body Shop. Since resurrection costs whatever cash you have on hand, which is none at this point, your resurrection will be free.

To obtain CyberEyes, break into Maas Biolabs in cyberspace and defeat Sangfroid, its AI. From inside the database, turn off the Lawbot security system and unlock the door. Next, jack out of cyberspace and go to Julius Deane. Ask him what he knows about hardware. He'll sell you a gas mask. Put it on by operating it, then go into Maas Biolabs. The gas mask will protect you from the virus security system. The security camera will mistake you for the doctor, and will ask if you would like to test CyberEyes. Say yes and tell the camera that you will test it on yourself. CyberEyes and its 32 program storage capacity is now yours.

After defeating the World Chess AI, download BattleChess 4.0. When you get to sector 7, you can use this program to get into Phantom. After breaking the ICE, use BattleChess 4.0 on the Phantom instead of battling him. He will give you instant access. You'll get the software to beat Musabori's AI, which in turn will give you the software to help beat Neuromancer and the game.

—CONTRIBUTOR UNKNOWN

OPERATION WOLF: When you are close to being killed, hold down the trigger or firebutton and stay on full auto. If a helicopter or gunboat appears, use any remaining grenades. This is an effective way to kill enemy soldiers and stay alive longer.

Often, near the end of a stage, I will be one or two blocks away from death. I use this method to remain alive until the end of the stage.

If you are worrying about losing all your ammo, don't. Ammo will do you ►

WE WON'T PAY YOUR TAXES!

no good if you're dead, and you will usually have an enormous supply.

—MICHAEL MAZZONI
BOCA RATON, FL

PLATOON: In the jungle, look for trip wires just behind bushes that go across the trail. Shoot just before you jump them, and you won't have to worry about enemies on the other side.

In the village, you'll find what you need at the last three huts.

Try not to use flares in the bunker. If you watch the darkness, you'll see the VC shadows covering the blue. Don't take too many shots, or they'll zero in on your muzzle flash.

—MIKE LANCASTER
ADDRESS UNKNOWN

POOL OF RADIANCE: Before entering the Kobald's cave, be sure to have at least two fireballs.

Before entering Mantor's library, have some magical weapons with you, or you'll never make it out.

—ADAM CROSBY
WEST SPRINGFIELD, MA

SPORTING NEWS BASEBALL: Here's a way to improve your chances of striking out the computer at bat. When he hits the ball to the outfield, resist the temptation to throw the ball to the base the computer is running for. Instead, pick up the ball and start running for the base he's coming up on. That puts you closer to the base, where you can throw him out much faster.

Try it; it works for us.

—BART WARD & TONY HARDEY
VERSAILLES, MO

STAR WARS: If you're still trying to destroy Darth Vader's ship, forget it. When Vader appears, shoot him repeatedly until his ship turns white. This makes it impossible for the ship to shoot back until he leaves.

The best way to get through the corridors with the catwalks is to go to the extreme upper left- or right-hand corner. Most fireballs won't shoot there, and, when a catwalk comes, you can just go under it.

To destroy the Death Star, go to the bottom of the corridor, near the middle, and continually fire down.

—DAVE BOYLE
SEVERNA PARK, MD

TECHNOCOP: Having trouble killing the third-level wastedump violator? Try this: Move slowly toward him. When he appears, back him up until he is on the edge of the screen. Wait for the waste barrel to come at you, and jump over it just as it is about to hit you. You should land right in front of the violator, where, if you're very fast, you can shoot him.

If you don't back him up to the edge of the screen, you'll probably land right on top of him. If that happens, he'll waste you and escape as well.

Don't get depressed if this method doesn't work right the first few times you try it. It has to be flawlessly performed to work.

—CONTRIBUTOR UNKNOWN

THE THREE STOOGES: In the Boxing Match, the pattern of obstacles is always the same. Here it is: Trash, Hydrant, Light Pole, Dog, Package, Door, Box, Ladder, Trash, Hydrant, Box, Package, Dog, Box, Light Pole, Trash, Dog, Package, Door, Light Pole, Box, Hydrant, Package, Box, Dog, Light Pole, Trash, Box, Package, Hydrant, Trash, Ladder, Box, Door, Light Pole, Box, Box, Hydrant, Trash, Ladder, Door, Trash, Hodges Radio.

Because they come so close together, it's easier to dodge rather than jump over objects that don't take up the whole sidewalk, such as hydrants, packages and boxes. Larry jumps best at higher speeds.

—JOHN SHULL
FAYETTEVILLE, NC ■

To submit your own C-64 or C-128 game tips for consideration, send them to Gold Mine, PO Box 101011, Pittsburgh, PA 15237. Put your name and address on every piece of paper you send, and be sure to state which Commodore computer your tip is for, or we cannot publish it. Neatness and clarity will be very much appreciated, too. RUN *will pay $5 per submission upon publication, provided you also include your social security number.*

TAX COMMAND©

RUN
REVIEW SAYS
"...contains more forms and schedules than the other programs. It's generally a more professional program, combining completeness and speed."
"The program switches quickly between forms and schedules ...doesn't force you to save data and makes subtotal and tax calculations automatically."
March RUN, 1989

Since 1982

Time Saving • Easy-To-Use • Powerful • Affordable • Guaranteed

RUN says, "This program is suited to the professional tax preparer for completing most returns and quickly checking previously prepared returns." Tax Command is all menu operated. Anything you put in can be easily changed with the help of the built-in calculator. Tabulations are made automatically and schedule totals fed to the proper line on other schedules. You can save data, print for record-keeping or directly on IRS forms. Forms covered include: 1040, Schedules A thru F (incl. new D1), R, SE, Forms 2106, 2119, 2441, 3903, 8615 and estimated tax worksheets. New for 1989 are forms 4562 (Depreciation), 6251 (alternative minimum tax) and the ability to use a 1764 RAM cartridge. Yet despite Tax Command's power and completeness, **90% of users recently surveyed listed EASE OF USE as the primary reason for using Tax Command year after year.**

OUR GUARANTEE: Return for a refund if not satisfied.
Tax Command 1989 — $59.95 Shipping/Handling (US - $2. Foreign air - $3.95) Specify Commodore 64 or 128. Wisconsin residents add 5% sales tax.
Send Check or Credit Card information to: Practical Programs Inc., PO Box 93104, Milwaukee, Wisconsin 53203. Phone orders, CALL:

Users get ½ price annual updates, even if they switch to a PC.

COMMODORE CLINIC

Answers to your questions about RAM expansion, hard disk drives, and Datafile, RUN*'s own database.*

By ELLEN RULE

Q *I'd like to exchange my library of GEOS 1.2 geoPaint files with my friend's library of GEOS 2.0 geoPaint files, but it seems these versions of GEOS aren't compatible. Is there any way to translate or exchange such files?*

—ROWLAND MEDLER
GAINESVILLE, FL

A According to GEOS experts Peter and Paul Hughes (GEOLIB PH and SYSOP PH on QuantumLink), you shouldn't be experiencing any data transfer problems with geoPaint. They recommend two programs to resolve other compatibility problems: Wrong Is Write, for converting geoWrite documents, and Album Reverter, which strips page names from Version 2.1 photo albums for use with earlier versions of GEOS. You can get these two programs by sending a disk with return postage to the author, Joe Buckley, 464 Beale St., West Quincy, MA 02169.

GEOS 2.0 is a major upgrade to the GEOS operating system. It not only has fixed bugs in earlier versions of GEOS, but it also features color and a RAM drive on the deskTop, batch operations and recognition of two disk drives. If you use GEOS extensively, as it seems you do, I urge you to update your operating system in order to take advantage of the many new features of GEOS 2.0.

Q *Your interview with the folks at Berkeley Softworks ("geoFolks,"* RUN*, September 1989) mentions that Commodore has sold the rights to the 1750 REU to another company, which plans to market it. How and where can I get one of these units?*

—BUTCH HOOVER
KOKOMO, IN

Q *In the November 1987 issue of* RUN *(see "The Tale of the RAM and the Mouse"), author Barbara Mintz states that it is possible to use a 512K 1750 RAM expansion unit with the C-64, if you clip out resistor R-4. She also states that you must have a "beefed up" power supply. How do I know if my new power supply qualifies as "beefed up"? Its output is 5 volts dc (8.5 volt-amps) and 9 volts ac (9.0 volt-amps). I would also like to know if the resulting "souped-up" REU would work correctly with GEOS 2.0.*

—ADAM KROPELIN
JEFFERSONVILLE, VT

Q *Is it possible to modify the 1700 REU to create a 1750? I obtained a 1700 before local support of the 128/64 died, but now I need a 1750 for programs such as Spectrum 128. There are no REUs to be found in this country, and the cost of importing them is prohibitive.*

—LEONARD SMITH
MEREDALE, SOUTH AFRICA

A There are several options for Commodore owners looking for 512K RAM expansion. Berkeley Softworks recently announced geoRAM, which plugs into the cartridge port on either the C-64 or C-128 and provides 512K of RAM exclusively for use with GEOS. The standard C-64 power supply is adequate to power this unit, since the device uses low-power-demand chips. Order from Berkeley Softworks by calling 1-800-888-0848, extension 1741.

For those seeking a more fully compatible 512K, a qualified technician can upgrade the 1764 REU to 512K, or modify the 1750 REU for use with the C-64, with no loss of compatibility. The 1750 Clone is a 1764-to-1750 RAM upgrade offered by Software Support International (2700 NE Andresen Rd., Vancouver, WA 98661; phone 1-800-356-1179) for either customer-supplied 1764s or for those provided by SSI itself. This upgrade requires the use of the Commodore heavy-duty power supply, also available from SSI. This power supply is identical in output to that of the C-128: 4.3 amps at 5 volts dc and 1.1 amps at 9 volts ac. Since volt-amps equals volts times amps, Adam Kropelin's 8.5 volt-amp power supply is only equal to 1.7 amps at 5 volts and is not sufficient power to meet this standard.

I understand that the later 1700 REUs contain the same RAM controller chip as the 1750 and 1764, and that the 64K RAM chips in these 1700 REUs can be replaced with two banks of socketed 256-by-1 RAM chips for a total of 512K. (Unfortunately, this means desoldering and resoldering almost 300 connections.) In addition, a minor modification to the circuit board must be made. One last caveat: I know of no way to determine whether a 1700 REU has the right controller chip without opening it—a process that can damage the hardware inside if not done properly. One Commodore-authorized repair service that will perform the upgrade on qualifying 1700 REUs is D-5 Associates, 100 Ashburton Ave., Woburn, MA 01801; phone 617-937-8086.

As many REU owners have discovered, not all software recognizes the presence of added RAM. To resolve this, Creative Micro Designs (PO Box 646, East Longmeadow, MA 01028) is currently developing RAMLink, a device that will allow commercial software to access the 1700, 1764 or 1750 REU as a RAM disk. This unit, slated for release this spring, will be priced at under $100.

Q *Is it possible to merge two files created with Datafile? My only alternative would be to retype several hundred records. Perish the thought! Can you help me?*

—JIM TIMBERLAKE
FORT MYERS, FL

A Your word processor can be used to merge data files created by any database (including Datafile) that saves data as ASCII text files. Load the first ASCII datafile into your word processor, then append the second file to the first. After making sure that the data within the combined files is consistent—that is, that the same number of fields exist in each imported segment and that they are of compatible size and type—save the file as ASCII text. A database program like Datafile, with the proper fields configured, can then import the merged files. ■

GEOWATCH

More geoNews and geoTips to keep the geoFans happy!

By TIM WALSH

LAST MONTH, I MENTIONED Berkeley Softworks' promise of a 512K RAM expansion unit (REU) for both the C-64 and C-128. The latest word from BSW is that GEORAM 512 will include a revamped boot disk for both the 64 and 128 versions of GEOS 2.0.

According to a BSW spokesperson, the boot disk, entitled GEOS 2.0r, will contain new deskTop and Configure files. Lacking the 2.0 versions of geoPaint, geoWrite and less significant files, this new GEOS will be helpful to users who have yet to upgrade to 2.0, but want to sample the advantages 2.0 offers over older versions of GEOS. While the need for a modified version of GEOS 2.0 might come as unfavorable news to some GEOS afficionados, it's undoubtedly worth the added speed and overall improvement in versatility.

We're also pleased to report that *RUN*'s GEOS Companion disk will make its appearance by the time you read this. It is scheduled for a January 1990 release. For this disk, we've assembled ten all-new utilities and applications.

One of my favorites is geoMusician, the best 8-bit sound editor I've heard yet. The sounds you can create with this program very nearly equal those created by Amiga sound editors. Along with geoMusician, there's geoAnimator, geoMusic Player, clip art and a long list of other useful and creative files. I'm certain the GEOS Companion will prove to be one of our most popular GEOS-compatible disks ever.

A while back, I called upon GEOS users from across the land to contribute their finest geoTips for making life with GEOS a little easier. Here are the fruits of their labors.

GEOWRITE FONT PRESERVATION

Like most conscientious geoWrite users, I always save my documents to a dedicated geoWrite file disk. However, I experienced a recurring problem whenever I referenced a previously written geoWrite document. In seeking additional disk-storage space, I would erase the font or fonts the document was created with and leave a 9-point BSW font throughout.

My trick to circumvent this problem is to save the font information in the file's dialog box, which is accessed through the Info menu option on the deskTop. Keeping font information there is an excellent reference for loading the original fonts from another disk, should they be deleted from the geoWrite file disk.

—MARCK C. ABBOTT
LONDON, KY

GEOTERM TIP

GeoTerm 64 and 128 (on both *RUN*'s Power Paks I and II) offer a distinct advantage over traditional 64 and 128 telecommunication programs when the computer "locks up" while online. Nearly every telecommunications computerist has experienced a frozen keyboard when too many users log on to a multi-line BBS. ►

NEW!

SUPER TRACKER

At last an easy way to find out where the protection really is. **Super Tracker** will display the location of your drive head while you are loading a piece of software. This information will be very useful to find where the protection is. Super Tracker has other useful options such as track and half track display, 8 and 9 switch, density display, write protect on/off. This incredible little tool is encased in a handsome box that sits on top of your drive. Works with all C.64/128 and most C/64 compatible drives. Some minor soldering will be required.

Super Tracker **$69.95**

NEW!

SUPER CARTRIDGE

The **Ultimate Utility Cartridge** packed full of useful utilities. Super fast file copier, nibbler, sector editor, graphic label maker, just to mention a few. 128K of software at your finger tips. Super Cartridge can be shut off and uses no memory.

Super Cartridge **$49.95**

GRAPHIC PACK **$24.95**

Our best selling graphic programs plus more, all on one disk. **Graphic label maker, Photo-Copy, Super Label, Converter** (converts Print Shop to Print Master), and **Sprite Editor.** Plus we'll add 60 graphics.

PARAMETERS CONSTRUCTION SET

The company that has **The Most Parameters** is about to do something **Unbelievable.** We are giving you more of our secrets. Using this **Very Easy** program, it will not only **Read, Compare** and **Write Parameters for You;** it will also **Customize** the disk with your name. It will impress you, as well as your friends. The **"Parameter Construction Set"** is like nothing you've ever seen. In fact, you can even **Read Parameters** that you may have already written; then by using your construction set, rewrite it with your new **Customized Menu. $24.95.**

SUPER-CARD +

Have you been watching the war over the "best" backup utility? We would like to state the facts, and put this war to an end . . . once and for all!

- Utilities Unlimited was the FIRST to create a fully functional whole track copier. Our prototype was designed December 6, 1984. Since that time, the product has evolved into the most successful archiver ever created!
- Ultilities Unlimited was FIRST in creating this product for ALL disk drives: 1541/1541C/1541-II/1571/SX-64/ALL Commodore compatibles. While it is true that some of the units required soldering, it is very simple. We offer an installation service for those customers that do not wish to install the card themselves.
- Why would you WANT to wait for parameters? During that waiting period, your precious software could be destroyed! With **SUPER-CARD+** you need not wait! The software is user selectable. So if special changes are required, you can do it yourself! NO WAITING FOR MONTHS. What about those special changes? They (if actually required) are available by calling our office, or through QUANTAM LINK. We can tell you how to backup your software THE SAME DAY YOU GET IT! All versions of our **SUPER-CARD+** software include the latest settings. Even our competitor agrees that we can copy EVERYTHING with the proper settings . . . and we have them!
- Updates — Approximately every 6 weeks we release an update of our software that includes new utilities, copiers, and settings. ALL updates are $5.00... which we feel is a very reasonable fee. Updates are NOT required.
- Across the nation, software rental stores use **SUPER-CARD+** to backup their originals. Our **SUPER-CARD+** has been tested in Europe and has been chosen as the BEST backup utility!
- **SUPER-CARD+** comes complete with the hardware card, documentation, and the latest software release (version 3.0).

So, the facts are on the table . . . you decide for yourself. By the way, they say that *"imitation is the highest form of flattery"* . . . thanks guys!

FINAL CARTRIDGE III

No other cartridge adds 64K of ROM. The additional 32K of RIM is dedicated to a unique desk top accessory, setting it apart from the other cartridges.

Final Cartridge III is inspired by the Amiga and Macintosh. The function keys are laid out logically and are easy to remember. The tool kit is the largest collection on any cartridge (almost 30 commands). Just to mention some of the features — Fastload (15X) Backup, Freezer, Printer FR, Word Problems, Pop-Up Calculator, Color Screen Dump and Windows. **All for only $69.95**

VIDEO BYTE II - the only FULL COLOR! video digitizer for the C-64, C-128

Introducing the world's first **FULL COLOR!** video digitizer for the Commodore C-64, 64-C, C-128 & 128-D computer. **VIDEO BYTE** can give you digitized video from your VCR, B/W or COLOR CAMERA or OFF THE AIR or CABLE VIDEO (thanks to a fast! 2.2 sec. scan time). New version 3.0 software features full RE-DISPLAY with MULTI CAPTURE MODE, MENU SELECT PRINTING, EXPANDED COLORIZING FEATURES, SAVE to DISK FEATURE AND MUCH MORE!

FULL COLORIZING! is possible, due to a unique SELECT and INSERT color process, where you can select one of 15 COLORS and insert that color into one of 4 GRAY SCALES. This process will give you over 32,000 different color combinations to use in your video pictures. **SAVES as KOALAS!** Video Byte II allows you to save all your pictures to disk as FULL COLOR KOALA'S. After which (using Koala or suitable program) you can go in and redraw or recolor your V.B. pic's. **LOAD and RE-DISPLAY!** Video Byte II allows you to load and re-display all Video Byte pictures from inside Video Byte's menu. **MENU DRIVEN!** Video Byte II comes with an easy to use menu driven UTILITY DISK and digitizer program (64 MODE ONLY). **COMPACT!** Video Byte II's hardware is compact! In fact no bigger than your average cartridge! Video Byte comes with it's own cable. **INTEGRATED!** Video Byte II is designed to be used with or without EXPLODE! V5.0 color cartridge. Explode! V5.0's menu will return you to VIDEO BYTE II's menu. Explode! V5.0 is the **PERFECT COMPANION!** Video Byte II users are automatically sent **FREE SOFTWARE** updates along with new documentation, when it becomes available. **PRINT!** Video Byte II will printout pictures in BLACK and WHITE GREY SCALE to most printers. However, when used with Explode! V5.0, your printouts can be done IN FULL COLOR 8x11's on the **RAINBOW NX-1000, RAINBOW NX-1000C, JX-80, Seikosha3000 AI. (OKIDATA 10/20's (print larger 6"by9") USER SLIDE SHOW program w/auto or manual display is standard with VIDEO BYTE program. And can be backed up!)**

ONLY $79.95

Why DRAW a car, airplane, person or for that matter. . . anything when you can **BYTE it . . .Video Byte it instead.**

NEW! SUPER CARTRIDGE By The Soft Group EXPLODE! V.5

The **MOST POWERFUL, DISK DRIVE and PRINTER CARTRIDGE** ever produced for the COMMODORE USER, Super **USER FRIENDLY** with all the features most asked for. New FEATURES. . . (a) Faster non-blanking FASTLOAD. (b) MIRROR imaging of all HI-RES screens. (c) 4 Way color selection with insert, for all HI-RES screens. (d) Infinite FILE COPY for all SEQ. & PRG. files, copy your file only once, then write that file to as many disks as you like. . . great for single file copying by small user groups. (e) **FULL COLOR PRINTING of ALL COLOR HI-RES & MULTI-COLOR SCREENS to ALL COLOR DOT MATRIX PRINTERS** (not for INK JET printers). (f) Direct ONE KEY access back to VIDEO BYTE software thru EXPLODE! V5.0's MENU. (g) Supports all popular printer interfaces. (h) FREE upgraded utility disk.

ONLY $44.95

THE 128 SUPERCHIP - A, B or C (another first)

A — There is an empty socket inside your 128 just waiting for our Super Chip to give you 32K worth of great Built-in Utilities, all at just the Touch of a Finger. You get built-in features: **Files Copier, Nibbler, Track & Sector Editor, Screen Dump,** and even a 300/1200 baud **Terminal Program** that's 1650, 1670 and Hayes compatible. Best of all, it doesn't use up any memory. To use, simply touch a function key, and it responds to your command.

B — HAS SUPER 81 UTILITIES, a complete utility package for the 1581. Copy whole disks from 1541 or 1571 format to 1581. Many options include 1581 disk editor, drive monitor, Ram writer and will also perform may CP/M & MS-DOS utility functions.

C — "C" IS FOR COMBO and that's what you get. A super combination of both chips A and B in one chip, switchable at a great savings to you. **All Chips Include 100 Parameters FREE!** Chips A or B: **$29.95 each** Chip C: **$44.95 each.**

Circle 187 on Reader Service card.

When using conventional 64/128 terminal software, geoTerm's pointer can save the day. Even if the keyboard is locked up, you can usually move the mouse to position the pointer to the top of the screen, and select the Full Duplex mode to instantly revive your system. You can then issue any commands, typically without the loss of a single byte of data.

Bloomington, IN

Squeezing Basic into geoWrite

If you've been looking for an easy way to get a Basic 2.0 or 7.0 listing into geoWrite, you can stop your search. Just load the Basic program into memory and enter the following commands in Direct mode:

```
OPEN 2,8,2,"0:filename,S,W"
CMD 2:LIST:PRINT#2:CLOSE2
```

When the drive light goes out, the file will be on disk. Boot up GEOS, place a copy of Text Grabber in the drive and activate it from the deskTop. Select either "C128 Generic II" or "C64 Generic II" and enter a filename for the destination file.

Place the source disk in the drive and let Text Grabber do its conversion. You can then load the converted file into geoWrite.

—Jason Truesdell
Exton, PA

geoPaint Clip Art

When I tried to share with a friend some clip art I created using geoPaint 2.0, I quickly discovered that my friend's older version (1.3) of Photo Manager would not recognize my Photo Album scrap from GEOS 2.0. To solve this problem, I developed the following method for sharing Photo Albums among various versions of GEOS.

For demonstration purposes, let's assume you want to share clip art with someone who's using GEOS 1.3. The first step is to boot the copy of GEOS 1.3 with which you want to use the GEOS 2.0 Photo Album scrap. Then, create a work disk that contains the 1.3 deskTop and both the 1.3 and 2.0 versions of Photo Manager. (You'll have to use the Rename File option from the deskTop before copying one of them over to the work disk, because they both have the same filename.) Next, place two Photo Albums on the work disk, one created with the 1.3 version, and the other created with the 2.0 version of Photo Manager.

Now, activate the 2.0 version of Photo Manager (answer No to the prompt asking if you want to upgrade an older Photo Album) and copy the 2.0 clip art to a Scrap file. Then, exit the 2.0 version and activate the 1.3 version of Photo Manager. Paste the scrap that you just moved with the 2.0 version. Repeat this process until you have all the desired clip art copied over to the 1.3 work disk.

—C. Douglas Wilcox

RUN's Checksum & Program Typing Hints

TYPE IN *RUN*'S CHECKSUM, which serves for both the C-64 and for the C-128 in either 40- or 80-Column mode, and save it to disk before running it. When typing in a program from *RUN*, first load and run *RUN*'s latest version of the Checksum program, which contains a new feature explained below. The screen will display a SYS number (49152 for the C-64; 3328 for the C-128) that deactivates and reactivates the Checksum. Always disable *RUN*'s Checksum before attempting to run another program. Note: You can abbreviate Basic keywords; spaces affect the checksum only when within quotes; and the order of characters affects the checksum.

When you press return after typing in a program line, a one-, two-, or three-digit number from 0 to 255 appears in the home position. If this number matches the checksum value in the program listing, the line as you typed it is correct. If the number that appears doesn't match the checksum value, compare the line with the magazine listing to find your error. Then move the cursor back up to the line and make your corrections. Now, after you press return, the correct checksum value should appear. Continue entering the listing until all the lines have been correctly typed. Then deactivate *RUN*'s Checksum, using the appropriate SYS number, and save the finished program.

We sometimes get letters and phone calls from new readers who have typed in the Checksum program for the first time. They are confused by the "Out of Data Error in Line 30" message that appears when they try to run the Checksum program. Understandably, they compare line 30 of the listing with line 30 as they typed it in, and cannot find anything wrong. The message unintentionally misleads them into thinking the error is in line 30, whereas the typing mistake is actually somewhere in one of the Data statements in lines 190–350.

So, we've added a new feature to the Checksum program that alerts readers to the number of the Data statement line in the Checksum program where an error has actually been made. **Note that this feature works *only* on the Checksum program itself, and not on any other program listing in *RUN*.**

After you've entered and saved the Checksum program to disk, run it. If you've made any errors in any of the Data statements, the program will give you a specific line number. Find the mistake, correct it, press return, save the program and run it again. Repeat this procedure until the Checksum program runs flawlessly.

Control Characters Demystified

All the graphics and control characters in the listings in *RUN* have been translated into understandable key combinations. They are the instructions you see inside the curly braces. For example, {SHIFT L} means you hold down the shift key while you press the L key once. You do *not* type in the curly braces. What appears on the screen will look quite different from what is designated inside the braces. Here are some more examples:

{22 SPACES}—press the space bar 22 times.

{SHIFT CLR}—hold down the shift key and press the clr-home key once.

{2 CRSR DNs}—press the cursor-down key twice.

{CTRL 1}—hold down the control key and press the 1 key.

{COMD T}—hold down the Commodore logo key and press the T key.

{5 LB.s}—press the British pound key (£, *not* #) five times.

Refer to the following paragraphs for any other Error messages you get from running any program listing in *RUN*.

Other Error Messages

Having heard from many users over the years about their difficulties with typing in listings, we've identified a few recurring problems that plague many people but are easy to fix. So read on and see if your problem is one of these.

- You get an "Out of Data in Line xxx" message. This means that a program line was reading from Data statements and reached the end of the data before it was done reading. There are two possible problems.

One might be with the program line that reads the data, usually a For-Next loop. Make sure you have the proper values for the loop, because if, for example, the listing has a loop of 0 to 150, and you've typed 0 to 160, you'll get the Out of Data message. If the loop is correct, then the problem lies in the Data statements themselves. One possibility is that you omitted a whole line of data. That's easy enough to find and correct. It's more likely that you've skipped one or more individual data items or typed in a period instead of a comma, which causes two data values to be read as one number. Check your typing carefully against the listing. Using *RUN*'s Checksum program when you type in listings from the magazine should help in this case.

- You get an "Illegal Quantity Error in Line xxx" message. This means you've read a number from a Data statement and tried to poke it into a memory address. The error occurs because the number is larger than 255 (the largest value a memory address can contain), which means that somewhere in your Data statements you've made an error by typing in a number larger than 255. Again, this is easy to check for and correct. First look in your Data statements for a number larger than 255. You might have added an extra digit, or perhaps you ran two numbers together (23456 instead of 234,56).
- You get a "Syntax Error in Line xxx" message. This could be almost anything. What it tells you is that there is something wrong in the indicated line. Usually you've misspelled a Basic keyword or omitted some required character. List the line and examine it carefully.
- You get an "Error in Data" message. This occurs in programs that add up all the data as read, and, when finished, compares that sum with what it should be if the data were typed in correctly. If it isn't the same, it means an error somewhere in typing the Data statements. Go back and check the data carefully. Correct the mistake(s), save the new version and try again.
- Finally, we urge everyone who intends to type in one of our listings to use *RUN*'s Checksum program, which will help you avoid every mistake we've mentioned above, except that it won't detect the omission of a line. Ⓡ

Listing. *RUN*'s Checksum program. This program is available on *RUN*'s BBS for users to download.

ATTENTION

ALL COMMODORE 64/64C, AND COMMODORE 128/128D OWNERS

A complete self–tutoring BASIC programming course is available that starts with turning your computer on, to programming just about anything you want! This course is currently used in both High School and Adult Evening Education classes and has also formed the basis of teacher literacy programs. Written by a teacher, who after having taught the course several times, has put together one of the finest programming courses available today. This complete course of over 220 pages is available for the **COMMODORE 64/64C,** and for the **COMMODORE 128/128D** computers. This course (Volume 1) will take you step by step through a discovery approach to programming and you can do it all in your leisure time! The lessons are filled with examples and easy to understand explanations as well as many programs for you to make up. At the end of each lesson is a test of the information presented. Furthermore, ALL answers are supplied to all the questions and programs, including the answers to the tests. Follow this course step by step, lesson by lesson, and turn yourself into a real programmer! You won't be disappointed!

FOLLOW–UP COURSE (Volume 2) – A 200 page self–learning course for each of the above named computers dealing exclusively with **sequential** and **relative files.** Our teacher uses a unique approach to file handling that was designed especially for students with absolutely no prior file handling experience. Yet by the end of the course you will be able to make up many of your own personal and business file programs.

Each course is only $21.95 plus $3.00 for shipping and handling. We have been developing and selling Commodore courses for over 6 years now and **if you do not think that we have the best self–tutoring course you have yet come across, then just send the course back to us within 10 days of receipt for the FULL $24.95 refund.**

Note: We also sell programming courses for all versions of the Amiga computer as well as a self–learning AmigaDOS course.

SPECIAL OFFER FROM RUN MAGAZINE!

MODEM LIQUIDATION SALE!

ONLY $10.00!

HURRY! Supplies Limited!

GET A BRAND-NEW...

Commodore 1660® modem for only $10.00! It's the perfect telecommunications starter kit for every C64 and 128 owner!

WHAT CAN A MODEM DO?

It hooks your C64 or 128 via a phone line to the excitement of telecommunications. Use it to get in touch with other Commodore users, connect to on-line services (like Q-Link, GEnie, and CompuServe), access local bulletin boards, and so much more!

WHY SUCH A LOW PRICE?

The 1660 modem is a 300 baud model –slower than today's modems, but still easy to use and extremely affordable. If you've never used a modem — this one's for you!

YOU GET ALL THIS!

- Commodore 1660® Modem
- Cable to connect to your phone line.
- Commodore's "Common Sense®" software.
- Complimentary Q-Link Starter Kit (with FREE software and FREE time on Q-Link!).
- All for just $10.00!

YES! Send me a brand-new 1660 modem for only $10.00, plus $3.50 shipping & handling per modem.

***RUN*'s BBS**: The RUNning Board is *RUN*'s reader feedback bulletin board, which you can call anytime, day or night, seven days a week, for up-to-date information about the magazine, the Commodore industry and news and information of interest to all Commodore users. Call: 603-924-9704.

ATTENTION GEOS USERS: THE WAIT IS OVER.

For everyone who's ever waited a tad too long for a GEOS screen to redraw itself or an application to load, congratulations. The wait is over. Your chips have come in.

The GEORAM expansion board—for both 64's and 128's—is here.

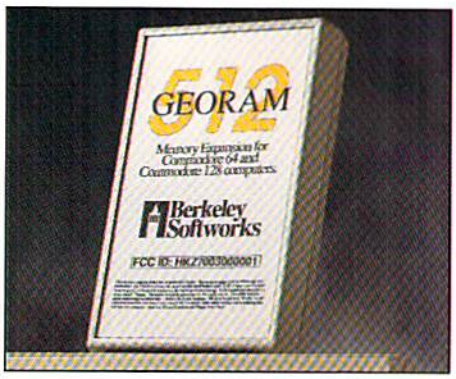

MORE MEMORY, LESS WAITING.

Developed exclusively for GEOS-equipped Commodores, these babies pack an unbelievable 512K of extra memory, which propels GEOS into light speed productivity. Accessories pop up in an instant. Screens redraw in a wink. And applications scream out in a frenzy as you whip them along with your mouse or joystick.

"An additional 512K of memory... is a really impressive upgrade... The usefulness of this becomes evident when using GEOS, as it can practically eliminate the... disk access you normally encounter." —***Run* Magazine**

Hard to believe? Believe it. GEORAM's disk transfer rate is literally 35 times faster than the 1541, 1571 or 1581 disk drive. Which has the industry chattering almost as much as when GEOS first arrived on the scene:

"The difference between operating... on a 640K machine instead of a 128K machine could be compared to flying a jet and walking. Tasks that would normally cause a delay while the disk was accessed run at the speed of light..." —***Commodore* Magazine**

Pretty heady stuff. But every word of it's true. Because GEORAM stores everything electronically. Which means your Commodore doesn't waste time spinning magnetic disks searching for data.

That not only increases your machine's performance. It also increases yours. Because the time you used to spend waiting is being put to better use drawing, writing or doing any of the thousands of things you're using GEOS for.

"RAM expanded C-series machines... running under the GEOS kernel—are nearly as fast and flexible as the powerhouse Mac's, ST's, Amigas and PC's." —***Computer Shopper***

So if you'd like to delete the delay, call us toll free at 1-800-888-0848 and order your GEORAM card today. You'll discover the difference in no time.

"It's the same GEOS, but unless you experience RAM expansion, you can't imagine the transformation... Some operations run a few seconds quicker, others (such as deskTop utilities) seem to appear before you select them... My RAM expander is the most cost-effective purchase I've ever made. Try one, and you'll never go back to magnetic media." —***Computer Shopper***

The GEORAM Expansion Card. It may have been a long time coming, but it's definitely been worth the wait.

Not available in retail stores!
No external power supply needed!

*On top of the disk turbo speed you already get with GEOS.

Mail orders: Send name, address, city, state, zip and phone number along with check or money order for $124.95 plus $4.95 for postage and handling, made payable to Berkeley Softworks (Do not send cash) to: Berkeley Softworks Fulfillment Center, 5334 Sterling Center Drive, Dept. G2, Westlake Village, CA 91361. Allow two to four weeks for delivery.

WHICH WOULD YOU RATHER FACE-OFF AGAINST?

Konami® introduces two more ruthless opponents for your home computer.

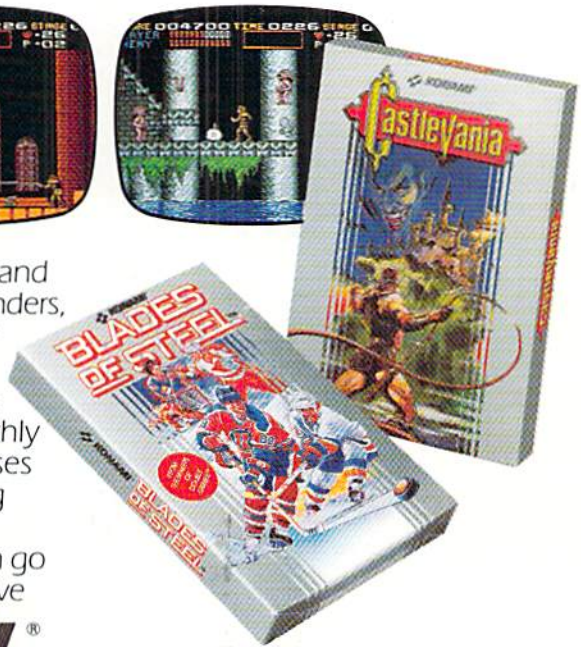

Whether you want to get crushed against the boards or have your body drained of blood, the choice is yours.

In Blades of Steel,® control ice-blistering speed and momentum, as you fire the puck past tenacious defenders, duck punches thrown by high-sticking enforcers or even protect the net from 100 mph penalty shots.

And in Castlevania,® journey through the most horrifying maze of evil ever devised, battling unearthly creatures with your mystic whip and masterful senses until you come face-to-fang with the death defying Count Dracula.

So grab your hockey stick and silver cross, then go head-to-head against the kind of competition you've dreamed about.
And feared.

KONAMI®

Blades of Steel is available for Commodore,® IBM® and Amiga.®
Castlevania is available for Commodore and IBM. Available for Amiga Fall 1990.
